

City of Alexandria, Virginia
FY 2023 Proposed Operating Budget & CIP
Budget Questions & Answers

April 12, 2022

Question: What are the light duty fire vehicles programmed for FY23 funding?

Response: The Fire Department plans to replace nine light duty vehicles in FY 2023. The exact vehicles being replaced are dependent upon the outcome of the City-wide electric vehicle program to provide charging stations at Fire Department facilities to enable purchasing electric vehicles in FY 2023.

Light duty vehicles for inspectors, training, and administrative purposes have been identified for replacement with electric vehicles. Light duty vehicles used for emergency response capabilities will be replaced with hybrid emergency response-rated vehicles, which currently is the only alternative fuel option available.
