Transportation Commission Meeting

May 18, 2022

7:00 PM

City Hall
301 King Street
Council Workroom

AGENDA

1. Public Comment (Not to exceed 10 min)

2. Minutes of the April 20, 2022 meeting

4. Discussion Item: DOT Paratransit Update

5. Action Item: Consideration of Endorsement of the FY 2022 Low or No Emissions and Buses and Bus Facilities Grant Applications

6. Commissioner Updates

7. Items for Consent
   A. NVRC Ferry Study
   B. West Glebe Road and Mt. Vernon Avenue Bridge Updates
   C. EVRS Implementation and EV Charging Grants Update
   D. WMATA 2022/2023 Metrorail Shutdown Update
   E. WMATA Zero-Emission Bus Transition Plan
   F. Transportation Lands Use Connection (TLC) Grant Award for Safe Routes to School
   G. Mt. Vernon Avenue North Project Public Comment Period
   H. NVTA Six Year Program Public Comment Period
   I. 2021 AlexMoves Transportation Survey Results

8. Other Business

Public hearing items are so noted on the agenda. The Commission may receive public comments on other agenda items at its discretion. When there is no public hearing, the Commission encourages written comments on agenda items be sent to transportationcommission@alexandriava.gov in advance of or after the meeting

Next Meeting: June 15, 2022
The May 18 meeting of the Transportation Commission is being held in the City Council Workroom on the second floor of City Hall (301 King Street, Alexandria, Virginia, 22314) and electronically. Members of Transportation Commission and staff are participating either in-person or from a remote location through video conference call on Zoom. The meeting can be accessed via Zoom by registering at the following link:

https://zoom.us/webinar/register/WN_vhTlsFP_RuO5BB9XdfgBOw

Or by phone: 301 715 8592
   Meeting ID: 941 1661 5483
   Passcode: 068073

Public comment will be received at the meeting. There will be a public comment period at the beginning of the meeting and written testimony can be provided until 3PM on 5/18/22 to Megan.Oleynik@alexandriava.gov

The City of Alexandria complies with the terms of ADA. An individual with a disability who wishes to request an accommodation may contact the Department of Transportation and Environmental Services at 703-746-4086 or TTY/TTD 703-838-5056.
City of Alexandria
Transportation Commission

Regular Meeting

April 20, 2022
7:00 p.m.
Virtual Meeting

MINUTES

Commissioners Present: Vice Chair Bruce Marsh, Commissioner Melissa McMahon, Commissioner Casey Kane, Commissioner James Maslanka, Commissioner Bill Pugh, Commissioner Matthew McManus (virtual), Commissioner Jody Manor.

Staff Present: Christopher Ziemann – Transportation Planning Division Chief, Megan Oleynik – Transportation Planning Division, Martin Barna - DASH.

Audio/Visual presentation is available online: https://www.alexandriava.gov/TransportationCommission

Vice Chair Marsh called the Transportation Commission meeting to order at 7:03 pm.

1. Public Comment Period
   No public comment.

2. March Minutes
   Motion to approve the minutes: Commissioner McMahon
   Second: Commissioner Kane
   Motion carries unanimously

3. DISCUSSION ITEM: Updates on Fare-Free New Dash Network and Consideration of Endorsement of the FY 2023 Transit Development Plan (TDP)
   ISSUE: Update from DASH staff on the fare-free New DASH Network and the proposed service changes in the FY 2023 – FY 2028 DASH Transit Development Plan (TDP).

   RECOMMENDATION: That the Transportation Commission receive the updates from staff and consider endorsing the proposed TDP.

   DISCUSSION: Martin Barna, DASH, provided updates on DASH ridership and service since the
implementation of the Free-Fare DASH New Network in September 2021. Commissioners asked clarifying questions and provided feedback.

**Motion to provide a letter to City Council endorsing the FY23 Transit Development Plan including recommendations currently unfunded in the proposed FY23 City Budget:**
Commissioner Kane  
**Second:** Commissioner McMahon  
Motion carries unanimously

4. **DISCUSSION ITEM: Review of 311 Process and Expectations**  
**ISSUE:** Review of Alex311 process and expectations.

**RECOMMENDATION:** That the Transportation Commission receive this update.

**DISCUSSION:** Megan Oleynik, Transportation Long Range Planner, provided a review of the background of Alex311 and the processes and expectations for Transportation cases. Feedback received from Commissioners included that Alex311 should reinstate ability to post photos with cases, that service level agreement timelines should be revisited for some case types, and that there should be more transparency in where cases go that are added to longer-term project lists.

5. **ACTION ITEM: 2022 Long Range Plan Scoring Criteria and Project Lists**  
**ISSUE:** Review of the scoring criteria and project lists for the 2022 update to the Transportation Long Range Plan (LRP).

**RECOMMENDATION:** That the Transportation Commission approve the draft scoring criteria for the LRP and provide feedback on the draft LRP project list.

**DISCUSSION:** Megan Oleynik, Long Range Transportation Planner, presented on the proposed scoring criteria for the LRP based on the Commissioner discussion at the retreat.

Commission McMahon suggested the “How well does the project focus investment near existing or proposed population and employment centers?” and the “How well does project focus investment near opportunities for economic development?” criteria in the “Land Use, Neighborhood Livability, & Economic Development” category be combined. Other Commissioners expressed support for this update.

Ms. Oleynik presented on proposed project updates for the 2022 LRP based on funding changes and plan updates since 2022. Commissioners provided feedback and asked clarifying questions. Commissioner Kane asked that more information be provided for the priority trail project. He asked that the study list be given estimated timelines. He also suggested staff revisit if the Pedestrian/Bicycle Bridge over I-395 and the Telegraph Road tunnel should be included on the Developer Project list or the City Project list. Commissioner McMahon suggested adding a Safe Routes to School project to address the outcomes of FY23 Walk Audits. Commissioner McMahon also suggested a few textual updates to the Scoring Guidelines.

**Motion to approve the discussed revisions to the Long Range Plan Scoring Criteria and Project List:** Commissioner McMahon
Second: Commissioner Kane
Motion carries unanimously.

6. Commissioner updates

Commissioner Kane – the Traffic and Parking Board heard a consent item on the Duke Street Traffic Mitigation that was extended through the end of April. The project has seen improved timings on Duke Street and slight delays on side streets. Also got an update on Capital Bikeshare, 16 of 17 VDOT funded stations have been installed. Approved adding parking, a bicycle corral, and a scooter corral on Mt. Vernon Avenue south of Braddock Road. Noted that he will be the Transportation Commission representative for the Duke Street in Motion Advisory Committee.

Commissioner Manor – No updates.

Commissioner Marsh – provided an update on items discussed at PYMIG including the road network for North Potomac Yard and construction progress.

Commissioner Maslanka – attended a public meeting on the Potomac River Generating Station (PRGS) focusing on transportation and traffic. Attended public meeting on the new Inova Alexandria Hospital site.

Commissioner McMahon – expressed that through construction closures on Potomac Avenue, the road has performed well with only one lane of traffic in each direction.

Commissioner McManus – asked for an update on City progress on Electric Vehicle Charging grant applications.

Commissioner Pugh – provided an update on the new programmatic approach to planting street trees that was presented to the Environmental Policy Commission. He noted that City Council had received the Joint Commission letter and the Joint Commission is awaiting a potential date to discuss further with Council. Finally, he noted that the public comment period is open for the Transportation Planning Board’s Visualize 2045 Plan through May 1.

7. Items for Consent

8. Other Business
   a. TPB Visualize 2045 Plan – Public Comment Opportunity
   b. I-495 Southside Express Lanes Study – Public Meetings in May

Adjournment
At 9:15 pm, the Transportation Commission adjourned.
DATE: MAY 18, 2022

TO: MEMBERS OF THE TRANSPORTATION COMMISSION

FROM: HILLARY ORR, DEPUTY DIRECTOR, T&ES

SUBJECT: AGENDA ITEM #3 – 2022 TRANSPORTATION LONG RANGE PLAN DRAFT SCORES

**ISSUE:** Review of Commissioner draft scores for the 2022 update to the Transportation Long Range Plan (LRP).

**RECOMMENDATION:** That the Transportation Commission discuss draft 2022 LRP scores and docket the adoption of the 2022 LRP for public hearing at the June 15 meeting.

**BACKGROUND:** As part of its responsibility to develop and maintain a comprehensive plan that identifies the City’s long-range transportation needs, the Commission first adopted an LRP in April 2010. The LRP is an unconstrained list of all transportation related capital projects and studies identified in City plans and policies. Once projects on the LRP receive full funding, they are moved from the unconstrained LRP to the City’s constrained Capital Improvement Program (CIP).

Every two years, the Commission updates the LRP transportation projects and studies from plans adopted since the last update. Additional projects and studies not captured in the previous LRP may be added and projects and studies may be removed if they have been completed or completely funded in the City’s CIP or by grants. City staff refer to the LRP when there are calls for grant funded projects and consider the projects against the grant evaluation criteria to determine which might be top candidates for funding.

**DISCUSSION:** The draft 2022 LRP update includes changes on the scoring guidance and updated project, developer project, and study lists as discussed by the Commission at its April retreat and Transportation Commission Meeting.

After the April Transportation Commission meeting, Commissioners individually reviewed the draft 2022 LRP, and prioritized the projects using the adopted criteria. The draft project scores are provided for discussion in Attachment 1. The full project list, developer contingent project list, and study list are provided in Attachments 2, 3, and 4, respectively.
ATTACHMENTS:
1. 2022 LRP – Draft Project Scores
2. 2022 LRP – Project List
3. 2022 LRP – Developer Contingent Project List
4. 2022 LRP – Studies List

City of Alexandria, Virginia

MEMORANDUM

DATE: MAY 18, 2022
TO: MEMBERS OF THE TRANSPORTATION COMMISSION
FROM: HILLARY ORR, DEPUTY DIRECTOR, T&ES
SUBJECT: AGENDA ITEM #4 – DOT Paratransit Update

ISSUE: Receive an update about the City’s paratransit program, Alexandria DOT.

RECOMMENDATION: That the Transportation Commission receive the update on the DOT Paratransit Program and endorse the expansion of the service area into Washington, DC.

BACKGROUND: The Alexandria DOT paratransit program began in 1984 as a service to Alexandria residents who were unable to use public transit due to a disability. The program was modified in 1993 to comply with the Americans with Disabilities Act (ADA). The program offers trips to residents who are approved through a certification process at a reduced rate. In addition to providing service throughout Alexandria, the program currently provides service to Alexandria residents travelling to and from the City to the following Virginia jurisdictions: Arlington County, Fairfax County, City of Falls Church, and City of Fairfax. A contractor provides the transportation for this service primarily with vans, although sedans have been recently added to the service through a subcontractor for overflow trips. The cost per trip ranges from $34-51 based on the volume of trips each month. Residents pay the following fares for this service and the City subsidizes the remaining cost:

- Within Alexandria – Free (as of September 2021 when DASH went fare free)
- Up to 5 miles outside of City limits - $4
- More than 5 miles outside of City limits - $6

The DOT Paratransit program is operated by the City of Alexandria and is separate from MetroAccess, which is the regional paratransit service operated by WMATA. MetroAccess provides trips anywhere in the region that is within a ¼ mile from a WMATA rail or bus route. Alexandria residents can participate in both programs and choose which service to use for trips. The City pays WMATA for trips taken by residents of Alexandria. The per trip rate varies each year based on the total number of MetroAccess trips in the region and the overall service cost. The annual per trip rate has varied drastically over the last several years, but most recently, in FY 2022, the per trip cost was $152.
Prior to the Pandemic, trips with DOT steadily increased from 52,470 in FY 2013 to 66,420 in FY 2019. A client feedback form in 2021 revealed that more than 95% of clients felt the vehicles were safe and clean and that both the reservations staff and drivers were professional and courteous. Because feedback on this program was so positive and MetroAccess costs were rising so quickly, staff initiated the process to expand service to enable clients the option of utilizing DOT for more trips which would also save the City money. More details about the program can be viewed in Attachment 1.

**DISCUSSION:** The Alexandria Mobility Plan (AMP) identified “Modernizing the paratransit program for the City’s aging population” as a key strategy towards achieving the City’s Transit Policies, including “Make transit easier to use”. Operationally, there have been very few changes to the program over the last several decades, while the number of clients and the cost of this service has increased each year. Staff believe there are many opportunities to update the program to make it a more efficient service that can serve more people and be more cost-effective.

Knowing that the existing contracts for both services and a software vendor were expiring, the City partnered with CivStart, a non-profit organization funded by the National League of Cities, to develop a case study with paratransit data. The data that the City had was in various formats that were difficult to compile and analyze. CivStart matched the City with Stae, a technology company providing data extraction, integration, and analytics tools to cities, through their online platform. Stae agreed to help Alexandria extract and analyze historical program data, provide insights to support planning, define program needs and ultimately inform vendor evaluation during an upcoming paratransit operator procurement process. They were able to gain key insights by geocoding address data to reveal travel patterns in the program. The findings from this study were used to craft a Request of Proposals (RFP) for a paratransit service provider as well as new software vendor to help improve efficiencies in data management, routing of drivers and increased options for customers to more conveniently book trips.

The RFP was released in 2021, and Diamond Transportation, the current provider, was awarded the service contract, and Via was awarded the data contract. City staff are currently working with Diamond and Via to launch a reservation system this summer. This new technology will be used by the City, Diamond, and Senior Services (who manage the Call Center) and will provide better reservation options that are coordinated in real-time with Diamond, improved trip routing, and better reporting options. Via will also offer new client communication features including an online reservation system and an app for clients who are comfortable making their own reservations and text notifications about the status of their trip and vehicle arrivals.

In addition to the new technology, staff propose expanding the DOT program into Washington, DC. Given the higher per trip cost of MetroAccess, there is a cost savings to the City by encouraging residents traveling to DC to use DOT instead of MetroAccess. To incentivize users to switch to DOT, staff recommends a $6 fare for trips into DC, which is slightly less than the maximum MetroAccess fare of $6.50.

With all of the changes that could occur, staff will work closely with clients to communication any changes and provide training on the expanded opportunities for booking and travel options.
ATTACHMENT:
  1. Presentation
Paratransit Program Update
Transportation Commission
May 18, 2022
Alexandria DOT is the City’s public transportation service for City residents who can’t use regular public transit due to their disability.

Begin in 1984, service only within Alexandria

Modified in 1993 to meet ADA requirements, service area expanded

Operated by the City, not DASH or WMATA

Similar service, but separate from MetroAccess (WMATA’s paratransit program)
## Program Overview

Program Stats: Trips

• Distribution of trips*
  • 70% within Alexandria
  • 21% within 5 miles
  • 9% more than 5 miles

• Types of trips*
  • 80% Ambulatory
  • 20% non-ambulatory

*Based on Pre-COVID trips
Program Stats: Clients

- ~1,900 Clients certified
- ~500 Active Clients (Prior to COVID)
- Median age – 71
- 26% require a wheelchair accessible vehicle
- 70% female
- 30% male
Transportation to/from **Medical Appointments** is the most common trip type, followed by **Personal Errands**.

95% of clients providing feedback felt **safe** in the vehicles and that they were **clean**.

Majority of clients providing feedback would like to see the program **expand to DC**, followed by Prince William County.

79% of clients still **prefer to call** for reservations, but 21% would use an app or website.
Key Budget Numbers

- FY 22 Operating Budget - $1.6 million
- Revenue Impact of fare-free DASH service ~$75,000
- Per Trip Cost - $51
- MetroAccess Per Trip Cost - $152
Challenges

- Program has not been updated in several decades
- Number of clients increases as population ages
- Cost of the service is increasing (MetroAccess too)
- Inefficient reservation and routing process
- Limited reporting and data
Alexandria Mobility Plan

Policy – Make Transit Easier To Use

ALEXANDRIA MOBILITY PLAN

Strategy 7. Modernize the paratransit program for the city’s aging population

Actions
- Develop more customer-friendly service that is scalable for increased demand
- Identify opportunities to improve cost-effectiveness for long-term program management for DOT Paratransit and MetroAccess services
- Explore partnerships with existing City services, neighboring jurisdictions, and on-demand service providers to improve the effectiveness and efficiency of serving the travel needs of seniors and persons with disabilities
Progress toward Modernizing the DOT Program

Winter 2021 - CivStart Partnership with Stae to analyze existing client and trip data

Summer 2021 Request for Proposals for Service Provider and Reservation and Client Management Software
Upcoming Changes

Partnership with VIA for Reservation Management and Routing – launching Summer 2022

• Online bookings & an app
• Better reporting features
• More efficient routing
• New client communication features (e.g. texts, certifications)
• Improved client tracking and updating

Improvements with transportation provider - Diamond

• Sub-contracting with UZURV (a TNC)
• More efficient booking process

Expanded service area into Washington, DC – Council Approval June 14

• Potential for future expansions into Maryland and Prince William County
Future Improvements

- Look at pricing to incentivize travel behavior (Shared & Off-Peak rides)
- Look at trip patterns for potential weekly shuttles
- Online certification for eligibility
- Travel Training (advances AMP Goal Supporting Travel Options)
- Exploring potential grant opportunities
DATE: MAY 18, 2022

TO: MEMBERS OF THE TRANSPORTATION COMMISSION

FROM: HILLARY ORR, DEPUTY DIRECTOR, T&ES

SUBJECT: AGENDA ITEM #5 – CONSIDERATION OF AN ENDORSEMENT OF THE FY 2022 LOW OR NO EMISSION AND BUSES AND BUS FACILITIES PROGRAMS GRANT APPLICATIONS

ISSUE: Consideration of two grant applications to the Federal Transit Administration for low and now emission buses and bus facilities.

RECOMMENDATION: That the Transportation Commission provide a letter of endorsement to the City Council for the approval for the FY 2022 Low or No (Low-No) and Buses and Bus Facilities grant applications.

BACKGROUND: In 2021, Congress passed the Bipartisan Infrastructure Law (Infrastructure Investment and Jobs Act) to fund infrastructure improvement programs. In 2022, the FTA announced $1.1 billion and $372 million respectively for the Low or No Emissions (Low-No) and Buses and Bus Facilities competitive discretionary grant programs.

The Low-No Program aims to support the transition of the transit fleet to the lowest polluting and most energy-efficient transit vehicles. The Bus and Bus Facilities Program assists in financing buses and bus facility capital projects. Grant applications are evaluated by the FTA with considerations including demonstration of need, environmental justice, racial equity, a zero-emission fleet transition plan focusing on workforce development, and other selection criteria. Awards will be announced by August 15, 2022, and funds must be obligated by September 30, 2025.

DISCUSSION: In 2018 the City and DASH committed to shifting to an all-electric bus fleet by the year 2037. DASH currently has 14 electric buses with charging infrastructure and 87 active clean diesel and hybrid buses. The DASH Fleet Replacement plan for FY 2023 and FY 2024 shows that 20 buses and 5 five trolleys will meet their useful life and need to be replaced. To replace these assets with battery electric vehicles (and associated charging infrastructure) the
estimated cost is $30.2 million. The City currently has budgeted approximately $10.7 million in the FY 2023-2024 CIP for fleet replacements, leaving a gap of $19.5 million. Additionally, the City was previously awarded $4.4 million in Smart Scale funds for six clean diesel buses and to upgrade these to electric would cost an additional $2.5 million.

In FY 2018, the City and DASH secured $9.5 million in Smart Scale and Northern Virginia Transportation Authority (NVTA) funds to design and construct Phase I of a new open-air bus and charging facility. The project is anticipated to be constructed by FY 2025 and will include charging infrastructure for 20 buses. DASH is ultimately planning for a fleet of up to 140 buses and needs to upgrade the electrical service and capacity of the existing DASH building to handle the ultimate charging needs for the DASH campus – including the new facility. Staff is currently working with a consultant to determine a more precise cost estimate for this upgrade but is requesting authority to apply for up to $10 million as part of this application as a conservative estimate.

To be strategic with funding awards and amounts, DASH and City staff will likely submit multiple applications to this grant program with the goal of securing the maximum amount of funding. How those applications are structured and scaled will be determined after additional conversations with FTA. Applications will likely be submitted to both Low-No and Buses and Bus Facilities, and FTA will decide from which funding source the project would be awarded.

The following projects ($44.7 million total) will be submitted within these applications:

- **FY23 Bus Replacement** ($17 million): Retire and replace ten (10) buses and five (5) trolleys with electric
- **FY24 Bus Replacement** ($10.8 million): Retire and replace ten (10) buses with electric
- **FY24 Expansion Buses** ($2.5 million): Upgrade six (6) Smart Scale clean diesel buses to electric
- **Charging Equipment** ($2.4 million): Install required charging infrastructure to support new electric buses
- **Electric upgrades at DASH Facility** ($10 million): Build new electrical service, including on-site equipment and infrastructure to support all electric bus charging requirements fleet conversion up to 6 megawatts of power
- **Workforce Development** ($2 million): Required 5% of federal request

The total grant request is $44.7 million but staff is requesting approval to submit up to $50 million as cost estimates are refined. While it is unlikely the full grant request will be fulfilled, staff determined the best path forward is to propose all needs in a scalable manner by which the FTA could assess and award funds as available.

**ATTACHMENTS:**
Attachment 1: Draft Letter of Endorsement for the FY 2022 Low or No Emission (Low-No) and Buses and Bus Facilities Program.
Honorable Mayor Wilson and Members of City Council  
City Hall  
301 King Street  
Alexandria, VA 22314  

May 18, 2022

Re: **Endorsement of Grant Application for the FY 2022 Low or No emission (Low-No) and Buses and Bus facilities Program**

Dear Mayor Wilson and Members of City Council:

At its May 18 meeting, the Transportation Commission voted to endorse the staff-recommended projects for the FY 2022 Low or No emission (Low-No) and buses and Bus facilities program through the Federal Transit Administration.

The following projects ($44.7 million estimated total) will be submitted within these applications, and the Commission endorses a submission of up to $50 million in the event cost estimates increase:

- **FY23 Bus Replacement** ($17 million): Retire and replace ten (10) buses and five (5) trollies with electric
- **FY24 Bus Replacement** ($10.8 million): Retire and replace ten (10) buses with electric
- **FY24 Expansion Buses** ($2.5 million): Upgrade six (6) Smart Scale clean diesel buses to electric
- **Charging Equipment** ($2.4 million): Install required charging infrastructure to support new electric buses
- **Electric upgrades at DASH Facility** ($10 million): Build new electrical service, including on-site equipment and infrastructure to support all electric bus charging requirements fleet conversion up to 6 megawatts of power
- **Workforce Development** ($2 million): Required 5% of federal request

This request supports the goals of the Alexandria Mobility Plan and the Environmental Action Plan 2040. The Transportation Commission appreciates the opportunity to review staff recommendations for Lo-No Grant and Bus and Bus Facilities grant applications, as well as to provide its endorsement to Council.

If you have any questions, please do not hesitate to contact me.
Sincerely,

Oscar Gonzalez

Chair, Alexandria Transportation Commission

cc: Alexandria Transportation Commission
Jim Parajon, City Manager
Emily Baker, Deputy City Manager
Yon Lambert, Director, T&ES
Josh Baker, General Manager and CEO, DASH
Hillary Orr, Deputy Director, T&ES
Christopher Ziemann, Division Chief, Transportation Planning
MEMORANDUM

DATE: MAY 18, 2022

TO: MEMBERS OF THE TRANSPORTATION COMMISSION

FROM: HILLARY ORR, DEPUTY DIRECTOR, TRANSPORTATION

SUBJECT: AGENDA ITEM #7 – ITEMS FOR CONSENT

ISSUE: Staff update to Transportation Commission on various projects.

RECOMMENDATION: That the Commission receive the items for consent.

A. NVRC Ferry Study
   The Northern Virginia Regional Commission (NVRC) has launched a study to determine the business case for a ferry along the Potomac and Occoquan rivers, and which stops and governance structures will attract investors. The goal is not to recommend a specific route or operational model so much as to determine which route or model will attract public and private financing. The City is participating in this study because it aligns with the Alexandria Mobility Plan’s Strategy 2, “Use the Potomac River to expand transportation options”, under the “Supporting Travel Options” Chapter. The study began this February and is expected to run until September. The study is considering 16 different routes and 18 different governance structures, as well as several operational factors like fleet size and type, and landside infrastructure needs. Study consultants are currently selecting case studies for further study. Staff are participating on the study’s steering committee, along with representatives from the military community, other NVRC members, DDOT, and several Maryland jurisdictions.

B. West Glebe Road and Mt Vernon Ave Bridge Updates
   Arlington County engineers closed the West Glebe Road Bridge to all motor vehicle traffic beginning Monday, May 9, due to continued degradation of the bridge beams. Construction of a planned replacement superstructure (road deck and beams) will proceed in May. The bridge’s original piers, which are stable, will be used to support the new superstructure, reducing project costs, construction time and impact on the watershed. Two motor vehicle lanes on the renovated bridge are expected to reopen in early 2023, along with one of two widened sidewalks.
The current structure connecting Arlington and the City of Alexandria over Four Mile Run was built in 1956. Elements have experienced noted deterioration in recent years. In 2018, a 5-ton weight restriction was placed on all user vehicles. Last month, due to signs of continued structural beam degradation, all southbound traffic was detoured away from the bridge. While allowing motor vehicle traffic on the bridge during construction has been ruled out, pedestrians and bicyclists will still be able to use the bridge through June, after which they will be directed to a temporary crossing, independent of the superstructure, to be built along the bridge.

The Mount Vernon Avenue Bridge, located further east over Four Mile Run, will handle northbound traffic detoured from the West Glebe bridge in addition to the current diversion of southbound vehicles. Arlington and Alexandria continue to coordinate closely on the bridge replacement project, which is scheduled for completion by Summer 2023.

Alexandria and Arlington are also coordinating on the future replacement of the Mt. Vernon Avenue Bridge. That project is at the 30% design stage and is not yet fully funded. Construction on that project will begin after the completion of the West Glebe bridge. The anticipated project completion timeline has not yet been determined.

C. EVRS Implementation and EV Charging Grants Update

Implementation
The City’s Electric Vehicle (EV) Planner position is expected is to be advertised in mid-May and proceed to hiring in June. The EV Planner position will:

- Lead implementation of the City’s Electric Vehicle Charging Infrastructure Readiness Strategy (EVRS);
- Develop and implement outreach, education, and programs to support Alexandria’s residents, businesses, institutions, and organizations to transition to operating zero-emission and electric vehicles, including electric bicycles and electric mobility devices.
- Support the implementation of publicly-accessible electric vehicle charging infrastructure in the Alexandria community through coordination and partnership of internal and external stakeholders, state and federal agencies, private charging infrastructure providers, other partner organizations, and members of the Alexandria community;
- Support the transition of the City’s vehicle fleet, DASH transit bus system, and Alexandria City Public Schools (ACPS) to zero-emission and electric vehicles, and planning and implementation of electric vehicle charging infrastructure.

Local/Regional Funding Opportunities
The City is coordinating with the Mid-Atlantic Electrification Partnership (MAEP) to identify grant-subsidized EV-charger opportunities for private parking garages, including the
Carlyle neighborhood. In addition, the City is coordinating with the MAEP to identify opportunities for City-owned parking lots or parking locations.

**State/National Funding Opportunities**
The City’s Infrastructure Investment and Jobs Act (IIJA) Strike Team is monitoring and responding to several EV programs and upcoming grant applications, including:

- **Lo- and No- Emissions Grant** – application going to Council in May 2022
- **Bus and Bus Facilities** – application to the Bus and Bus Facilities to support the DASH Zero-Emission Bus program implementation
- **Charging and Charging Infrastructure** funding opportunity announcement expected in Summer/Fall 2022
- **National Electric Vehicle Infrastructure (NEVI)** state formula grant program – Alexandria staff are in communications with the Virginia Department of Transportation and awaiting guidance on stakeholder engagement and state-wide grant submission actions.

**D. WMATA 2022/2023 Metrorail Shutdown Update**
On May 24, WMATA and City staff will present City Council with initial overview of the mitigation measures planned for the 2022-2023 Metrorail closures during the Potomac Yard Station Cutover and the Yellow Line Bridge and Tunnel Rehabilitation. WMATA plans to have the full mitigation plan available in June. The City will focus on providing mitigations that can be implemented quickly and are complimentary to existing programs.

Reimbursement for City mitigations will be available through the Virginia Department of Rail and Public Transportation (DRPT).

**E. WMATA Zero-Emission Bus Transition Plan**
Metro has provided an outline of how the agency will transition to a zero-emission bus fleet. The full report is available on Metro’s [Zero-Emission Bus Program webpage](#).

The Transition Plan, which is being developed this year, provides a phased approach and associated costs for investment in fleet, facilities, internal workforce, and operations to support a zero-emission bus service. Metro expects to purchase 12 electric buses and associated charging equipment this year as part of the Battery-Electric Bus Test and Evaluation Program. The buses will begin arriving late this year and go into service in 2023 out of the Shepherd Parkway Bus Division. A $4.2 million Federal Transit Administration grant will support the purchase of electric buses for testing and evaluation.

Metro will stop purchasing diesel buses next year and will instead purchase a mix of lower- or zero-emission buses during a transition period so that all new buses entering service by 2030 will be electric or other zero-emission technology.
Beyond purchasing buses, this transition will require purchasing and installing charging equipment, training and workforce development, among other investments. The Northern and Bladensburg bus garages are undergoing redevelopment and will be designed to support electric buses – Northern will reopen in 2026 with the infrastructure and equipment needed to support 150 electric buses. At the same time, Metro is engaging with regional utilities to plan and invest in the grid infrastructure to provide the needed power to these facilities.

Based on preliminary estimates, completing the transition will require approximately $1-2 billion in capital investment over more than 20 years. The results of which will improve regional air quality, reduce greenhouse gas emissions, and provide customers with a quieter, more comfortable bus ride.

F. Transportation Land Use Connection (TLC) Grant Award for Safe Routes to School
In February, the City submitted the following requests to the Metropolitan Washington Council of Government’s (MWCOG) Transportation-Land Use Connections (TLC) Program:

- Up to $80,000 in funding to develop designs for crossing improvements recommended through the City’s Safe Routes to School (SRTS) Program
- Up to $60,000 in funding to conduct SRTS walk audits for Ferdinand T. Day Elementary, George Washington Middle, Francis Hammond Middle, and Alexandria City High School

In April, MWCOG’s Transportation Planning Board voted to award $60,000 in technical assistance to the City to conduct a second phase of SRTS walk audits. The project is expected to kick off in Fall 2022 and conclude in Summer 2023.

G. Mt. Vernon Avenue North Project Public Comment Period
The City will be accepting public comment on the Mt. Vernon Avenue North Project from May 11 to June 5 on design ideas to improve safety at four intersections between W Glebe Road and Four Mile Run. An in-person public meeting is scheduled for May 19. More information is on the project website.

H. NVTA Six Year Plan Public Comment Period
The Northern Virginia Transportation Authority (NVTA) is seeking public feedback on a list of 26 candidate projects submitted by nine Northern Virginia jurisdictions and localities for regional funding as part of the FY2022-2027 Six Year Program (SYP). With a combined request of more than $1.2 billion, the projects being considered cover various modes of transportation, including railway, Bus Rapid Transit (BRT), roadways, pedestrian/bicycle pathways, and transportation technologies.

The public is invited to comment on the SYP candidate projects during the public comment period, April 15, 2022 – May 22, 2022, closing at 11:59 p.m. ET. The project list, individual project description forms, maps, detailed analyses, and Frequently Asked Questions are

The public can provide one comment submission per person by choosing just one of the following mediums:

Email: SYPcomment@TheNoVAAuthority.org
Online: Submission Form Below
Voicemail: 571-354-0065
Mail: Northern Virginia Transportation Authority, 3040 Williams Drive, Suite 200, Fairfax, VA 22031
Public Hearing: Virtual or NVTA’s Offices, 3040 Williams Drive, Suite 200, Fairfax, VA 22031 on May 12, 2022

I. 2021 AlexMoves Travel Survey Results
The City conducted a survey on city-wide multimodal transportation trends and preferences. The 2021 survey is the third iteration of this type of travel survey since 2016.

The results of the survey are presented in a report and presentation available on the City’s Long Range Transportation Planning website. Some key takeaways from the survey include:

- Working from home is much more common since the COVID-19 pandemic. The portion of commute trips that were “work from home” increased from 6% in 2016 to 40% in 2021.
- Commute trips by Metrorail have decreased. Only 6% of work trips were on Metrorail in 2021, compared to 14% in 2016.
- The percent of commute trips by Capital Bikeshare increased from 0% to 3% from 2016 to 2021.
- More children are walking to school. About 40% of respondents with school-aged children indicated that their child walked to school, compared to about 24% in 2016.
- Most respondents indicated they use GPS apps like Google Map or Waze at least a few times a week, with only 16% indicating they never use such apps.
