This project is at the TD Bank at 525 King St. (https://maps.app.goo.gl/HnEigah2HPTrc27cA) The proposed project consists of installing a new exterior guardrail/handrail section at the existing raised entrance/landing area of the building. The new railing will be located between existing railing sections, as shown on the submitted sketch, and is intended to close the open edge condition while maintaining continuity with the existing entrance railing system. Existing stairs, landings, paving, entrance doors, storefront, building facade, and adjacent railings are to remain. The new railing will be fabricated to match the existing adjacent railing in height, profile, color, and general design, with a black finish to maintain visual consistency with the building frontage. The railing will be installed with post embedment into the existing walking surface and grouted in place, per the indicated embedment detail. The work is limited to the installation of the new railing only. No expansion of building area, change of use, change in occupancy, alteration to the building footprint, modification to site access, or change to parking, loading, landscaping, signage, or site drainage is proposed. The intent of the improvement is to enhance pedestrian safety and provide a code-conscious railing condition compatible with the existing architectural character of the storefront and entrance area.

EMERGENCY HAZARDOUS MATERIAL ABATEMENT ONLY. Materials are actively wet due to a water intrusion event, requiring immediate emergency mitigation to prevent mold proliferation and structural degradation. Testing was performed independently by the unit owner (laboratory report attached). Scope is strictly restricted to environmental containment, negative pressure engineering, and removal/disposal of affected materials per protocol. NO RECONSTRUCTION under this permit. Existing high-rise life-safety systems (sprinklers, fire alarms, standpipes) will be protected with an 18-inch clearance maintained. Work to begin 10/29/2026.

We will install a new 40A circuit in your existing 200A main panel. We will route the wiring from the panel out to the exterior wall and continue in surface-mounted conduit down into a trench out to the exterior side of the back fence, where we will install a freestanding pedestal in place of the existing potted plant and hardwire the charger on the pedestal. The charger will be installed on a 40A circuit and will draw up to 32A continuous. The GM PowerUp 2 Level 2 charger does not feature an active cooling fan and operates completely silently (0 decibels). This is because it uses passive convection cooling instead of internal mechanical fans.

COM	Alteration - Exterior (Only)		BLDC2026-00507	$2,400.00	$125.59	N	This project is at the TD Bank at 525 King St. (https://maps.app.goo.gl/HnEigah2HPTrc27cA) The proposed project consists of installing a new exterior guardrail/handrail section at the existing raised entrance/landing area of the building. The new railing will be located between existing railing sections, as shown on the submitted sketch, and is intended to close the open edge condition while maintaining continuity with the existing entrance railing system. Existing stairs, landings, paving, entrance doors, storefront, building facade, and adjacent railings are to remain. The new railing will be fabricated to match the existing adjacent railing in height, profile, color, and general design, with a black finish to maintain visual consistency with the building frontage. The railing will be installed with post embedment into the existing walking surface and grouted in place, per the indicated embedment detail. The work is limited to the installation of the new railing only. No expansion of building area, change of use, change in occupancy, alteration to the building footprint, modification to site access, or change to parking, loading, landscaping, signage, or site drainage is proposed. The intent of the improvement is to enhance pedestrian safety and provide a code-conscious railing condition compatible with the existing architectural character of the storefront and entrance area.	32	6/11/2026	10/16/2026	525 KING ST

			BLDC2026-00729	$0.00	$251.18	N	Please remove unit number from the application. The chargers are for the entire building not a particular unit. Install two level 2 ev chargers.	0	8/13/2026	10/1/2026	828 SLATERS LN
		R-5	BLDR2026-00772	$1,000.00	$125.59	N	We will install a new 40A circuit in your existing 200A main panel. We will route the wiring from the panel out to the exterior wall and continue in surface-mounted conduit down into a trench out to the exterior side of the back fence, where we will install a freestanding pedestal in place of the existing potted plant and hardwire the charger on the pedestal. The charger will be installed on a 40A circuit and will draw up to 32A continuous. The GM PowerUp 2 Level 2 charger does not feature an active cooling fan and operates completely silently (0 decibels). This is because it uses passive convection cooling instead of internal mechanical fans.	0	8/27/2026	10/28/2026	919 DUKE ST
