Robin Jones, Program Manager, Energy Division, Virginia Department of Mines,
Minerals and Energy

Contact: Robin Jones, robin.jones@dmme.virginia.gov, 804-692-3224

Each year VSBN members have the opportunity to nominate Green businesses, organizations, design firms, and community programs that represent “the best Green projects or programs in Virginia.” The VSBN Board of Directors votes on the winners. The criteria for the awards are: 1) environmentally responsible products, projects, and programs; 2) emphasis on energy efficiency and renewable energy use; 3) completed projects and on-going programs; and 4) promotion of Green Building and Sustainable Development principles in the local community.

VSBN was also pleased to feature outstanding speakers at our Annual Meeting, which featured the theme of **Corporate Sustainability: The Business Community Role in Advancing Climate Protection**. Topics covered included corporate sustainability products and practices; buildings, sustainability and climate protection; and the federal climate legislation currently being considered by Congress.

The speakers were: Thomas Schuler, Vice President and General Manager, DuPont Building Innovations and panel participants, John Mlade, LEED AP, Senior Associate, Perkins + Will; Jackie Roberts, Director, Sustainable Technologies, Environmental Defense Fund; and Kevin Baird, Plant Manager, Roanoke Cement. VSBN was also pleased to have Ridge Schuyler, District Director for Congressman Tom Perriello, VA-5th District, speak on the role of federal legislation and local action in addressing climate change.

Virginia Sustainable Building Network (VSBN) is the only statewide organization to bring together representatives from diverse sectors who are interested in building healthy, environmentally friendly buildings and sustainable communities. VSBN was incorporated as a non-profit (501-c-3) organization in 1995. To accomplish its mission of promoting Green Building and Sustainable Development, VSBN carries out workshops, regional and state-wide conferences, and provides training and technical resources for members of the design and construction industry, local and state government, private building owners, school systems, and affordable housing organizations. It has developed an ever-growing information clearinghouse and resource directory and serves as a regional networking organization.

Visit the VSBN website for more information: www.vsbn.org or contact Annette Osso, LEED AP, President, VSBN, at 703-486-2966.
