Sprint is proposing to install the following antennas equipment on the rooftop of the condominium building located at 4600 Duke Street, Alexandria, Virginia 22304 (see Sheets A1-A3 of the zoning drawings dated 5/29/18 that were submitted with this application):

- Three (3) new DT 465B-2XR antennas
- Three (3) new RRH-2x50-800 RRUs
- Three (3) new TD-RRH8x20-25 RRUs
- Three (3) new 1.54hybriflex lines
- Six (6) 36 unistrut pieces for new RRHs

Sprint (and T-Mobile) already has telecommunications equipment installed on this rooftop (documentation of prior approval attached). This equipment includes steel platforms, an equipment shelter, a cable tray, a fiber distribution box, RRHRRUs and antennas. All of this is shown in detail on Sheets A1 through A3. None of the existing equipment or antennas are to be removed.

The dimensions for the antennas and equipment to be installed are included on Sheet A5

The building is 178 feet in height to the top of the penthouse and 160 feet in height to the top of the main roof. The antennas will be installed in each of three (3) sectors as indicated on the zoning drawings at a centerline of 160 feet and will be mounted to the exterior of the building. They will add no additional height to the structure and are designed and oriented to maximize signal propagation. This proposal utilizes an existing rooftop and negates the need for a macro tower thereby minimizing visual impact on surrounding properties. Additionally, the antennas will be painted to match the exterior of the building.

The property is not located within the historic district or the Carlyle Development.
