Remodel the master bathroom on the third level of the unit. As background, the current bathroom is original to the house's construction in 1998, and has a curbed shower with an angled entrance, a toilet, a double vanity/sinks with a single lighting bar fixture above the mirror, and a drop in/framed jacuzzi tub, tiled in, next to the window. All floors are currently tile.				
In the proposed change, the permit is needed for the jacuzzi tub removal and replacement with a stand alone. Please be advised that we will be changing cosmetics through replacement of the toilet; re-tiling and recurbing the shower; replacing the double vanity with slightly smaller one but retain 2 sinks; replace lighting fixture and mirrors above; replace medicine cabinet; and remove the jacuzzi tub in favor of a free standing tub. I would replace all tiling on floor, and tile around 3 walls surrounding the free standing tub.				
The square footage of the bathroom is 80, but the square footage of the tub area is 23.3 sq. ft.
