RECORDS OF CORRESPONDENCE	APPENDIX II

1.0 INTRODUCTION

Geotechnical Consulting & Testing, Inc. (GC&T) has performed a Phase I Environmental Site Assessment (ESA) for a parcel of land located in City of Alexandria, Virginia, identified herein as *912, 916 and 920 King Street* and referred to herein as the *properties*.

1.1 Purpose and Methodology

The objective of this study is to identify *recognized environmental conditions* in connection with the *properties*, pursuant to good standards of customary practices as outlined in ASTM E1527-13, "*Standard Practice for Phase I Environmental Site Assessments*" (ESA).

Recognized environmental conditions are defined as "the presence or likely presence of any *hazardous substances* or *petroleum products* on a *properties* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *properties*, or into the ground, groundwater, or surface water of the *properties* even under conditions in compliance with laws." The term is not intended to include *de minimis* conditions that "generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The four basic components of the Phase I Environmental Site Assessment as defined in **Section 6.2** of ASTM E1527-13 include:

- Records Review - Review of available records searched in connection with *the properties*.
- Site Visit - A visit to *the properties*.
- Interviews - Interviews with current owners and occupants of the *properties*, adjacent *properties*, and local government officials.
- Report - Compilation of research data and the preparation of this Phase I ESA report.

1.2 Limitations and Limiting Conditions

The findings presented herein are based on the information gathered and reviewed as of the specific dates referenced in this report.

A Phase I Environmental Site Assessment (ESA) cannot completely eliminate the uncertainty regarding the potential for *recognized environmental conditions* in connection with the *properties*.

This assessment is intended to reduce, but not eliminate the uncertainty regarding the potential for *recognized environmental conditions*. The information presented herein is considered to be *reasonably ascertainable* and *practically reviewable* within *reasonable time and cost* constraints. Should additional information become available after the submittal of this report which would result in a change in the conclusions of this assessment, GC&T reserves the right to issue an addendum and amendments to this report as necessary. The following concerns were not evaluated or addressed as part of this assessment due to the scope and limitations of this study.

- Soil, water or plant samples were not collected nor tested as part of this study.
- Site utilities or underground structures were not physically located or examined.
- Historical sites, archeological sites, endangered plant or animal species were not located or investigated.

1.3 User Responsibilities

The ASTM standard describes specific tasks which may be performed by the *user* that will help to identify the possibility of *recognized environmental conditions*. These tasks include:

- Reviewing *reasonably ascertainable* land title records to identify environmental liens against the properties.
- Reporting *specialized knowledge* or experience to the *environmental professional* that may be associated with *recognized environmental conditions*.
- Reporting any *actual knowledge* that the purchase price of the properties is significantly less than the purchase price of comparable properties due to known environmental concerns.

These tasks do not require the technical expertise of an environmental professional and are generally not performed by environmental professionals as part of a Phase I Environmental Site Assessment.

A questionnaire was forwarded to Mr. Tom Sawyer to request a response to specific questions related to the above referenced information. **A copy of the completed questionnaire is presented in the Appendix of this report.**

1.4 Geographic Setting

The site is comprised of a 15,332 square feet parcel of land located at 116 South Henry Street

in Alexandria, Virginia. The parcel is identified by City of Alexandria Mapper with Parcel #074.01-06-02, #074.01-06-03 and #074.01-06-03.

The properties is identified on the Site Vicinity and Site Location Maps, presented as Figures 1 and 2 at the end of this report. These maps were used to locate and establish the limits of the subject *properties* during this study.

2.0 RECORDS REVIEW

The purpose of the review is to search available records that will help identify *recognized environmental conditions* in connection with the *properties*. The information is requested from local governmental agencies and Federal and State environmental sources required by the ASTM standard. The factors considered in determining which sources should be searched are based on those records which are *reasonably ascertainable, publicly available, and practically reviewable at a reasonable cost and time*.

Some records searched are based on the specific address and zip code of the *properties* and the zip codes of the surrounding area. Other records are searched within a defined radius given the longitude and latitude coordinates of the *properties*. **Based on our review of the orphan summary provided in the EDR Report, the listed facilities do not pose a risk or concern to the environmental health of the subject *properties*.** These facilities are discussed in section “2.1.7 Leaking Underground Storage Tanks (LUST) & Leaking Tanks (LTANKS)” Item 5 and section “2.1.3 Emergency Response Notification System (ERNS)” Item 1. The EDR Report is presented in Appendix I.

The environmental record sources requested and the search methods used are summarized in Table 1 which can be found in the following table.

TABLE 1
Search Distances for Requested Environmental Record Sources

Record Source	ASTM Search	GC&T Search
Standard Environmental Record Sources		
EPA CERCLIS/NPL	1.00 mile	1.00 mile
EPA RCRA TSD	0.50 mile	0.50 mile
EPA RCRA generators	0.25 mile	0.25 mile
EPA ERNS	Properties only	Properties only
VA-DEQ-SHWS	N/A	N/A
VA-DEQ-Waste SWF	0.50 mile	0.50 mile
VA-DEQ-UST/AST	0.25 mile	0.25 mile
VA-DEQ LUST/LTANKS	0.50 mile	0.50 mile
Additional Environmental Record Sources		
CO. HEALTH DEPT.	Properties only	Properties only
CO. FIRE PREVENTION	Properties only	Properties only

N/A - The State of Virginia does not maintain a State Hazardous Waste Site (SHWS) list. See the Federal CERCLIS list.

2.1 Standard Environmental Record Sources

2.1.1 EPA CERCLIS/NPL List

The EPA CERCLA database, CERCLIS, identifies facilities which have come to the EPA's attention as having the potential for releasing hazardous substances into the environment. This information system is a compilation of potential sites identified by both state and federal authorities. As potential sites are identified, investigations are conducted to evaluate the

environmental hazard, the extent of the contamination, and the risk to the general public. These factors are considered and classified according to the EPA's Hazard Ranking System. This system determines the site's priority for further study and/or remedial action and placement on the National Priorities List (NPL). The following information was obtained from a review of the CERCLIS database extracted by *Environmental Data Resources, Inc* (EDR):

- Facilities registered as NPL sites were identified at locations on or within a one mile (1.00) radius of the *property*. However, five (5) sites were previously listed by the EPA as a CERCLIS site within a one (1) mile radius of the *property*. One site is not listed in the *standard record sources*.
 1. One (1) facility is identified as the Alexandria Municipal Landfill is listed as a CERCLIS NFRAP site. The report lists the address of the site as between Fairfax and Washington Street and most likely is referencing the Alexandria Municipal Landfill located between Montgomery Street and 2nd Street. There are four (4) municipal landfills located within the city limits of Alexandria, only one of which is outside the search radius of this assessment. Two additional municipal landfill CERCLIS sites are listed in this assessment. The EDR report indicates that the facility is not listed on the National Priority List (NPL) and is a No Further Remedial Action Planned (NFRAP) facility. **Due to the status of the facility and lower elevation, this former facility poses no risk to the environmental health of the subject *property*.**
 2. One (1) facility is identified as the R. H. Bogle Site is listed as a CERCLIS NFRAP site. The report lists the address of the site as located at the 'foot of Oronoco Street'. The EDR report indicates that the facility is not listed on the National Priority List (NPL) and is a No Further Remedial Action Planned (NFRAP) facility. The location had been the site of herbicide manufacture and waste water from onsite tank cars is suspected of containing dioxin. **Due to the status of the facility and lower elevation, this former facility poses no risk to the environmental health of the subject *property*.**
 3. One (1) facility is identified as the Alexandria Town Gas & Oronoco Outfall is listed as a CERCLIS State-Lead Cleanup site. The report lists the address of the site as located at 'Oronoco Street', however the City of Alexandria Contaminated Lands website lists the property as located at Lee Street Square, at the corner of Oronoco and North Lee Street. The site is located approximately one-half (1/2) miles to the northeast of the *property* at a lower elevation. The site is the former location of a manufactured gas plant. The EDR report indicates that the facility is not listed on the National Priority List (NPL). The Alexandria Contaminated Lands Website states that there is known

groundwater contamination and remediation is on-going. **Due to the lower elevation and flow of groundwater away from the *property*, this facility poses little to no risk to the environmental health of the *property*.**

4. One (1) facility is identified as the Alexandria City Landfill is listed as a CERCLIS NFRAP site. The report lists the address of the site as located on South Payne Street. The City of Alexandria Master Plan *Water Quality Management Supplement* adopted January 13, 2001 states that the site is located near the current wastewater management facility located on South Payne Street. The location of the facility is not mapped in the EDR Report, but is likely located less than one-half (1/2) miles southwest of the *property* at a lower relative elevation. The EDR report indicates that the facility is not listed on the National Priority List (NPL) and is a No Further Remedial Action Planned (NFRAP) facility. **Due to the status of the facility and lower elevation, this former facility poses no risk to the environmental health of the subject *property*.**
5. One (1) facility, not listed in the *standard record sources*, is a third Alexandria Municipal Landfill location. The City of Alexandria Master Plan *Water Quality Management Supplement* adopted January 13, 2001 states that the site is located west of Hooffs Run near the beltway. This site is located within one (1) mile east southeast of the *property* at a lower relative elevation to the *property*. **Due to the lower elevation of the facility, this facility poses little to no risk or concern to the environmental health of the *property*.**

2.1.2 EPA RCRIS - RCRA Generators and TSD Facilities

The Resource Conservation and Recovery Information System (RCRIS) maintains the recorded status of registrations, permits, reports, inspections, enforcement activities, and financial data of those facilities regulated under the Resource Conservation and Recovery Act (RCRA). This act is intended to maintain a historical record of the hazardous substances associated with the facility. The following information was obtained from a review of the RCRIS database extracted by EDR:

- Five (5) RCRIS generator facilities were located within a one-quarter (0.25) mile radius of the *properties*.
 1. Exxon Co USA, a RCRA generator, located at 442 N Henry Street less than one-fourth (1/4) of a mile east of the *properties* at a reported lower elevation is listed

by the EDR Report as a RCRA-Conditionally Exempt Small Quantity Generator (CESGQ). Due to the flow of groundwater away from the *property*, this facility poses little to no risk or concern to the environmental health of the subject *properties*.

2. Bradham Auto Electric Inc, a RCRA generator, located at 220 N Henry Street less than one-eighth (1/8) of a mile northeast of the *properties* at a reported lower elevation is listed by the EDR Report as a RCRA-Conditionally Exempt Small Quantity Generator (CESGQ). Due to the lower elevation than the *properties*, this facility poses no risk or concern to the environmental health of the subject *properties*.
 3. Kingdom Dry Cleaners & Altercation, a RCRA generator, located at 1131 King Street less than one-eighth (1/8) of a mile north northeast of the *properties* at a reported lower elevation is listed by the EDR Report as a RCRA-Conditionally Exempt Small Quantity Generator (CESGQ). Due to the lower elevation than the *properties*, this facility poses no risk or concern to the environmental health of the subject *properties*.
 4. A RCRA generator, located at 228 North Henry Street less than one-eighth (1/8) of a mile east northeast of the *properties* at a reported lower elevation is listed by the EDR Report as a RCRA-Conditionally Exempt Small Quantity Generator (CESGQ). Due to the lower elevation than the *properties*, this facility poses no risk or concern to the environmental health of the subject *properties*.
 5. Sykes Warehouse Inc, a RCRA generator, located at 300 North Henry Street less than one-eighth (1/8) of a mile east northeast of the *properties* at a reported lower elevation is listed by the EDR Report as a RCRA-Conditionally Exempt Small Quantity Generator (CESGQ). Due to the lower elevation than the *properties*, this facility poses no risk or concern to the environmental health of the subject *properties*.
- Facilities registered as RCRA-TSD were not identified on the *properties* or within a one-half (0.50) mile radius of the *properties*.

2.1.3 Emergency Response Notification System (ERNS)

The Emergency Response Notification System combines data from the National Response Center and the Environmental Protection Agency and stores information concerning the reported releases of oil and hazardous substances. The information is recorded when the

incident is initially reported to a federal agency by any party. The following information was obtained from a review of the ERNS database extracted by EDR:

- Spill incident reports were not identified at locations on the properties.

2.1.4 State Hazardous Waste List (SHWS)

- The State of Virginia does not maintain a SHWS list. See the Federal CERCLIS list.

2.1.5 Solid Waste Facilities (SWF)

The Solid Waste Facilities (SWF) list is a compilation of solid waste management sites registered with the Virginia Department of Environmental Quality (VA-DEQ)-Waste Management Division. The following information was obtained from a review of the county-searched database, extracted by the EDR database:

- Solid waste facilities were not identified at locations on the *properties* or within a one-half (0.50) mile radius of the subject *properties*.

2.1.6 Registered Underground/Aboveground Storage Tanks (UST/AST)

Virginia DEQ-Water maintains a list of registered petroleum storage tanks, which include aboveground and underground storage tanks (AST and UST). The following information was obtained from a review of the EDR database:

- **Eleven (11) registered Underground Storage Tanks (USTs) and no Above Ground Storage Tanks (ASTs) were identified on the *properties* or at locations within a one-quarter (0.25) mile radius of the *properties* in the attached EDR report.**
1. V&P Service Station located at 200 N Henry Street less than one-eighth (1/8) of a mile east of the *properties* at a reported lower elevation has one (1) registered UST's with a removed from ground status. **Due to the lower elevation of these UST's, this facility poses no risk or concern to the environmental health of the subject *properties*.**
 2. AMOCO Oil Co located at 1101 Cameron Street less than one-eighth (1/8) of a mile east of the *properties* at a reported lower elevation has one (1) registered UST's with a closed in ground status. **Due to the lower elevation and status of this UST, this facility poses no**

risk or concern to the environmental health of the subject *properties*.

3. 1101 King Street Condominium located at 1101 King Street less than one-eighth (1/8) of a mile east of the *properties* at a reported lower elevation has one (1) registered UST with a removed from ground status. **Due to the lower elevation of these UST's, this facility poses no risk or concern to the environmental health of the subject *properties*.**
4. T D Fraley & Sons Inc located at 214 N Fayette Street less than one-eighth (1/8) of a mile east of the *properties* at a reported lower elevation has one (1) registered UST with an in use status. **Due to the lower elevation of this UST, this facility poses no risk or concern to the environmental health of the subject *properties*.**
5. Fire Station #55 located at 214 N Fayette Street less than one-eighth (1/8) of a mile northwest of the *properties* at a reported lower elevation has one (1) registered UST's with a removed from ground status. **Due to the lower elevation of this UST and closed in ground status, this facility poses no risk or concern to the environmental health of the subject *properties*.**
6. Goodyear ASC 0237 located at 1202 King Street less than one-eighth (1/8) of a mile west northwest of the *property* at a reported lower elevation has one (1) registered UST's with a permanently out of use status. **Due to the lower elevation of these UST's, this facility poses no risk or concern to the environmental health of the subject *properties*.**
7. Check Soda & Refrig Co Inc located at 215 N Payne Street less than one-eighth (1/8) of a mile north of the *properties* at a reported lower elevation has one (1) registered UST with an in use statuses and one (1) UST with a removed from ground status. **Due to the lower elevation of these UST's, this facility poses no risk or concern to the environmental health of the subject *properties*.**
8. Household Bank located at 119 North Washington St. less than one-eighth (1/8) of a mile east of the *property* at a reported lower elevation has one (1) registered UST with a removed from ground status. **Due to the lower elevation and status of this UST, this facility poses no risk or concern to the environmental health of the subject *properties*.**
9. The Atrium Building located at 277 South Washington St. less than one-eighth (1/8) of a mile southeast of the *property* at a reported lower elevation has one (1) registered UST with a closed in ground status. **Due to the lower elevation and status of this UST, this facility poses no risk or concern to the environmental health of the subject *properties*.**
10. T. J. Fannon and Sons located at 1200 Duke Street less than one-eighth (1/8) of a mile southwest of the *property* at a reported lower elevation has one (1) registered UST with an in use status. **Due to the lower elevation and status of this UST, this facility poses no risk or concern to the environmental health of the subject *properties*.**

11. Amoco Oil Co located at 1306 Duke Street less than one-eighth (1/8) of a mile west southwest of the *property* at a reported lower elevation has one (1) registered UST with a closed in ground status. **Due to the lower elevation and status of this UST, this facility poses no risk or concern to the environmental health of the subject *properties*.**

2.1.7 Leaking Underground Storage Tanks (LUST) & Leaking Tanks (LTANKS)

Virginia DEQ maintains records of pollution complaint and spill reports of Leaking Underground Storage Tanks (LUSTs), Leaking Tanks (LTANKS) and other releases of petroleum to the environment and state waters. The following information was obtained from the LUST database extracted by EDR:

- **Fifty-one (51) LUST and LTANK facilities were identified within a one-half (0.5) mile radius of the *property*.**

1. Dr. Cohen Property located at 803 Cameron Street less than one-eighth (1/8) of a mile northeast of the *property* at a reported lower elevation has one (1) LUST case and one (1) LTANK case both with closed statuses. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
2. Exxon #2-1179 located at 442 North Henry Street less than one-quarter (1/4) of a mile north of the *property* at a reported lower elevation has one (1) LTANK with a reported closed status and (1) LUST case with a reported open status. **Due to the ground water flowing away from the property, this facility poses no risk or concern to the environmental health of the subject *property*.**
3. Robinson Terminal NO located at 1 Oronoco Street less than one-half (1/2) of a mile north northwest of the *property* at a reported higher elevation has one (1) LUST case with a closed status, one (1) LTANK case with an open status and one (1) LTANK case with a closed status. **Due to the flow of groundwater away from the *property*, this facility poses no risk or concern to the environmental health of the subject *property*.**
4. Exxon #2-0491 located at 703 North Washington less than one-half (1/2) of a mile northeast of the *property* at a reported higher elevation has two (2) LUST case with a reported open status on one and closed status on the other and two (2) LTANK cases with closed statuses. **Due to the ground water flowing away from the *property*, this facility poses no risk or concern to the environmental health of the subject *property*.**
5. Old Town West Apartment located at 5500 South Alfred Street less than one-half (1/2)

of a mile south of the *property* at a reported higher elevation has one (1) LUST case and one (1) LTANK case both with a reported closed status. **Due to the closed statuses of the cases, this facility poses little to no risk or concern to the environmental health of the subject *property*.**

6. AMOCO #379 located at 725 North Washington less than one-half (1/2) of a northeast of the *property* at a reported higher elevation has one (1) LUST case with a reported open status. **Due to the ground water flowing away from the property, this facility poses no risk or concern to the environmental health of the subject *property*.**
7. V&P Service Station located at 200 North Henry Street less than one-eighth (1/8) of a mile north northwest of the *property* at a reported lower elevation has one (1) LUST case with a reported open status. **Due to the lower elevation of this facility, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
8. Sewer Line located at 1203 King Street less than one-quarter (1/4) of a mile west northwest of the *property* at a reported lower elevation has one (1) LUST and one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
9. Rolband Company located at 112 North Washington less than one-eighth (1/8) of a mile east north east of the *property* at a reported lower elevation has one (1) LUST and one LTANK case both with reported closed statuses. **Due to the closed statuses of the cases, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
10. Household Bank located at 119 North Washington less than one-quarter (1/4) of a mile east of the *property* at a reported lower elevation has one (1) LUST case and one LTANK case both with reported closed statuses. **Due to the closed statuses of the cases, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
11. CRT Inc located at 312 North Washington less than one-quarter (1/4) of a mile northeast of the *property* at a reported lower elevation has one (1) LUST case and two (2) LTANK cases with reported closed statuses. **Due to the closed statuses of these cases, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
12. Fannon Petroleum located at 1200 Duke Street less than one-quarter (1/4) of a mile southwest of the *property* at a reported lower elevation has one (1) LUST with a

- reported open status. **Due to the lower elevation of this UST, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
13. Naval Reserve Association located at 1200 Duke Street less than one-quarter (1/4) of a mile west of the *property* at a reported lower elevation has one (1) LUST with a closed status and one (1) LTANK with a reported open status. **Due to the lower elevation of this facility, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
 14. Security Storage Building located at 621 North Payne Street less than one-half (1/2) of a mile north northwest of the *property* at a reported lower elevation has two (2) LUST cases and two (2) LTANK cases each with reported closed statuses. **Due to the closed statuses of the cases, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
 15. 214 Henry ST S LLC P located at 214 South Henry Street less than one-eighth (1/8) of a mile southwest of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 16. Corillon Carol L Res. located at 819 Prince Street less than one-eighth (1/8) of a mile south southeast of the *property* at a reported higher elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 17. All Tune and Lube located at 200 North Henry Street less than one-eighth (1/8) of a mile north of the *property* at a reported lower elevation has two (2) LTANK cases with reported closed statuses. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
 18. Slatter Jane Residence located at 811 Prince Street less than one-eighth (1/8) of a mile southeast of the *property* at a reported higher elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 19. Compass Point Group L located at 116 and 120 South PA less than one-eighth (1/8) of a mile west of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 20. 118 North Saint ASAP located at 118 North Saint Asaph Street less than one-quarter (1/4) of a mile east of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility**

- poses no risk or concern to the environmental health of the subject *property*.**
21. Jefferson-Houston SC located at 1501 Cameron Street less than one-half (1/2) of a mile west northwest of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 22. Exxon 29310 located at 501 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case with reported closed statuses. **Due to the closed statuses of the cases and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
 23. The Monarch located at 1111 Oronoco Street less than one-half (1/2) of a mile north of the *property* at a reported higher elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
 24. Texaco located at 500 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case both with reported closed statuses. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
 25. Old Club located at 555 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case with an open status both with reported closed statuses. **Due to the lower elevation, this facility poses little to no risk or concern to the environmental health of the subject *property*.**
 26. Demaine Funeral Home located at 520 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case both with reported closed statuses. **Due to the closed status of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
 27. Morris Construction located at 411 Queen Street less than one-half (1/2) of a mile east northeast of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
 28. Moore Mary Burrell E residence located at 409 Queen Street less than one-half (1/2) of a mile east northeast of the *property* at a reported lower elevation has one (1) LTANK

- case with a reported closed status. **Due to the closed status of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject property.**
29. Lyles Crouch Element located at 530 South Saint Asaph Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case both with reported closed statuses. **Due to the closed statuses of the cases and lower elevation, this facility poses no risk or concern to the environmental health of the subject property.**
 30. Royal Market Place located at 333 North Royal Street less than one-half (1/2) of a mile east northeast of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed statuses of the cases and lower elevation, this facility poses no risk or concern to the environmental health of the subject property.**
 31. Exxon 27432 located at 700 South Patrick Street less than one-half (1/2) of a mile south of the *property* at a reported higher elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject property.**
 32. Amoco 198 located at 701 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject property.**
 33. Alexandria City Property located at 311 Lee Street less than one-half (1/2) of a mile east southeast of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject property.**
 34. Alexandria City Property located at 401 Holland Lane less than one-half (1/2) of a mile west southwest of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject property.**
 35. Naval Research Association located at 1619 King Street less than one-half (1/2) of a mile west southwest of the *property* at a reported lower elevation has one (1) LTANK case with a reported open status and one (1) LUST case with a reported open status. **Due to the flow of groundwater away from the property, this facility poses no risk or concern to the environmental health of the subject property.**
 36. Oliver Carr Company located at Diagonal Road less than one-half (1/2) of a mile west

- of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case both with reported closed status. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
37. Fannon Petroleum Services located at 1200 and 1300 Duke Street less than one-quarter (1/4) of a mile east of the *property* at a reported lower elevation has three (3) LTANK cases with reported closed statuses. **Due to the closed statuses of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
38. Household Bank located at 119 North Washington Street less than one-quarter (1/4) of a mile east of the *property* at a reported lower elevation has one (1) LTANK case with a reported closed status. **Due to the closed status of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
39. Shuman's Bakery located at 430 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LTANK case and one (1) LUST case both with reported closed statuses. **Due to the closed statuses of the cases and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
40. Texaco #23-068-0121 located at 500 South Washington Street less than one-half (1/2) of a mile south southeast of the *property* at a reported lower elevation has one (1) LUST case and one (1) LTANK case both with reported closed statuses. **Due to the closed status of the case and lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**
41. Chevron #122153 located at 700 South Patrick Street less than one-half (1/2) of a mile south of the *property* at a reported higher elevation has three (3) LUST cases each with reported closed statuses. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
42. Williams 66 Inc. located at 203 South King Street less than one-half (1/2) of a mile east of the *property* at a reported lower elevation has one (1) LUST case each with a reported closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
43. Nee Property located at 212 South King Street less than one-half (1/2) of a mile east of the *property* at a reported lower elevation has one (1) LUST case and one LTANK case each with a reported closed status. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**

44. Alexandria Southern located at 425 Holland Street less than one-half (1/2) of a mile west southwest of the *property* at a reported lower elevation has one (1) LUST case and one LTANK case each with a reported closed status. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
45. Hess Station 46500 located at 620 South Patrick Street located less than one-half (1/2) of a mile south of the *property* at a reported higher elevation has one (1) LUST case with an open status and three (3) LTANK cases each with a reported closed status. **Due to the flow of groundwater away from the *property*, this facility poses no risk or concern to the environmental health of the subject *property*.**
46. Fayette Court located at 722 Fayette Street located less than one-half (1/2) of a mile north northwest of the *property* at a reported higher elevation has one (1) LUST case with an open status and one (1) LTANK cases each with a reported closed status. **Due to the closed statuses of these cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
47. Merit Oil located at 620 South Patrick Street less than one-half (1/2) of a mile south of the *property* at a reported higher elevation has one (1) LUST case with a closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
48. Marriott Property located at 11460 Duke Street less than one-half (1/2) of a mile west southwest of the *property* at a reported lower elevation has one (1) LUST case and one (1) LTANK case both with closed statuses. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
49. Williams 66 Inc. located at 203 South King Street less than one-half (1/2) of a mile east of the *property* at a reported lower elevation has one (1) LUST case with a closed status. **Due to the closed status of the case, this facility poses no risk or concern to the environmental health of the subject *property*.**
50. Starwood Urban Retail Inc. located at 118 King Street less than one-half (1/2) of a mile east of the *property* at a reported lower elevation has one (1) LUST case and one (1) LTANK case both with closed statuses. **Due to the closed statuses of the cases, this facility poses no risk or concern to the environmental health of the subject *property*.**
51. Hudnall Jr William J. located at 216 Wilkes St. less than one-half (1/2) of a mile southeast of the *property* at a reported lower elevation has one (1) LTANK case with a closed status. **Due to the closed status of the case, this facility poses no risk or**

concern to the environmental health of the subject *property*.

2.1.8 U.S. Brownfields & Virginia Brownfields

The U.S. Brownfields is a listing of Brownfields sites. Included in the listings are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Target Brownfields Assessments (TBA). TBA program is designed to help states, tribes and municipalities minimize the uncertainties of contamination often associated with brownfields. The Virginia Brownfields must meet the Federal definition of a Brownfields and should have contamination issues that need to be addressed and a redevelopment plan supported by the local government and community. Virginia's Department of Environmental Quality performs brownfields assessments under a cooperative agreement with the U.S. Environmental Protection Agency at no cost to communities, properties owners, or prospective purchases.

- U.S. Brownfields and Virginia Brownfields properties were not identified on the *properties* or within a one-half (0.50) mile radius of the *properties*.

2.1.9 U.S. Institutional Controls

Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, properties use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of institutional controls.

- Institutional control property were identified within a one-half (0.50) mile radius of the *property*.
 1. Carlyle-Ballenger East, Carlyle Ballenger West, Carlyle Block O located at within the Carlyle development to the west southwest of the property at a reported lower elevation is listed by the EDR Report as having institutional controls. The institutional control is identified as a deed restriction on groundwater.
Deed restrictions provide information that indicates that areas in the vicinity of the facility with the institutional control may also be underlain by contaminants identified at the facility. Groundwater located at this facility is unknown and pending further information from the DEQ.

2. Duke Street Shopping Center located at 1712 -1728 Duke Street approximately one-half (0.50) miles west of the *property* at a reported lower elevation is listed as a having institutional controls. This site was a former dry cleaning business. Groundwater in the vicinity of this site is known to be contaminated with PCE and TCE. The institutional control is identified as a deed restriction on groundwater due to dry cleaning activity. This site is listed at a lower elevation than the *property*, limiting the potential for similar groundwater contamination at the subject *property*.

2.1.10 Voluntary Cleanup Program Sites (VCP)

The Voluntary Cleanup Program oversees owner or developer initiated voluntary remediation of contaminated lands and buildings that return actual or potential contaminated properties to productive uses.

- Seven (7) VCP properties were identified within a one-half (0.5) mile radius of the *property*.
1. Four (4) VCP sites are part of the Carlyle Project. This project consisted of several blocks and included the environmental remediation of the nearby Norfolk Southern Railroad Yard. The VCP sites listed in the EDR report have varying addresses shown below. The distances to these sites vary from 0.45 to 0.50 miles from the *property*. The elevation of these sites is lower than the *property*. **Due to the lower elevation, this facility poses little to no risk to the environmental health of the property.**

Ballenger Avenue West
Ballenger Avenue East
Emerson Avenue
Duke Street and Holland Lane

2. Two (2) VCP sites are listed for the Alexandria Town Gas site located at Lee and Oronoco Street approximately 0.50 miles to the northeast of the *property*. This site was a former manufactured gas plant. Groundwater in the vicinity of this site is known to be contaminated with PAH's, BTEX and arsenic. This site is listed at a lower elevation than the *property*. Groundwater located at this facility is believed to flow in an easterly direction away from the *property*, limiting the potential for similar groundwater contamination at the subject *property*.

3. Duke Street Shopping Center located at 1712 -1728 Duke Street approximately one-half (0.50) miles west of the *property* is listed as a VCP site. This site was a former dry cleaning business. Groundwater in the vicinity of this site is known to be contaminated with PCE and TCE. This site is listed at a lower elevation than the *property*, limiting the potential for similar groundwater contamination at the subject *property*.

2.1.11 Formerly Used Defense Sites (FUDS)

Formerly Used Defense Sites (FUDS) properties are locations where the U.S. Army Corps of Engineers is either actively remediation or planning necessary cleanup actions.

1. Q M Market Center located at Henry Street and First Street less than one-quarter (1/4) of a mile south of the *property* at a reported lower elevation. This property has a disused UST. **Due to the lower elevation, this facility poses no risk or concern to the environmental health of the subject *property*.**

2.1.12 Formerly Used Sites Remedial Action Program (FUSRAP)

The Formerly Utilized Sites Remedial Actions Program (FUSRAP) was established by the Department of Energy to clean sites where radioactive contamination remained from Manhattan Project and U.S. Atomic Energy Commission facilities.

1. American Machine and Foundry Co - Alexandria located at 1101 N. Henry Street less than one (1) mile northeast of the *property* at a reported higher elevation. This facility had been licensed to handle 308 pounds of refined uranium for use in fuel element fabrication research and development. The elimination documents site no evidence that there had ever been any association with MED or ACE. This property has been eliminated from further consideration under FUSRAP. **Due to the groundwater flow away from the *property*, this facility poses little risk or concern to the environmental health of the subject *property*.**

2.1.13 Dry Cleaners

The EDR Report provides a listing of dry cleaning facilities located within a one-eighth (0.125) mile radius of the property.

- Three (3) dry cleaning facility was identified within neighboring or adjoining properties.
 1. Launder Center is listed as a former dry cleaning business based on the EDR Historical Cleaner list. This business was located at 900 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**
 2. Lee Tuck is listed as a former dry cleaning business dating from based on the EDR Historical Cleaner List. This business was located at 902 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**
 3. Premier Cleaners and Dryers is listed as a former dry cleaning business based on the City Image Directory dating from 1921 to 1926. This business was located at 904 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**

2.2 Additional Environmental Record Sources

2.2.1 City of Alexandria Fire Marshal's Office

GC&T forwarded a letter to the City of Alexandria's Office. The letter referenced the City of Alexandria map number of the *properties* and requested a search of their records for any information associated with the release, presence, transportation, storage, disposal, or complaint of hazardous materials, petroleum products, health code violations, or other reports of groundwater contamination or dumping at the *properties*.

A response has **not** been received. If information becomes available, GC&T will review the information and issue an addendum to this report should the information change any conclusions of this Environmental Site Assessment.

2.2.2 City of Alexandria Environmental Health Services

GC&T forwarded a letter to Mr. Dube of the City of Alexandria Environmental Health Services on October 20, 2016. The letter referenced the County GPIN number of *the properties* and requested a search of their records for any information associated with the release, presence, transportation, storage, disposal, or complaint of hazardous materials, petroleum products, health code violations, or other reports of groundwater contamination or dumping at the properties. A response has **not** been received. If information becomes available, GC&T will review the information and issue an addendum to this report should the information change any conclusions of this Environmental Site Assessment.

3.0 HISTORICAL USE INFORMATION

Historical sources are reviewed to establish the previous uses of the *properties* and the surrounding area, and to identify the likelihood of past use(s) that may have led to *recognized environmental conditions* in connection with the *properties*. The *standard historical sources* which are *reasonably ascertainable* include aerial photographs, recorded land title records, USGS 7.5 minute topographic maps, and County zoning and planning records. Historical information is also requested from the *properties* owner, occupants, and/or owners of adjacent properties.

3.1 Zoning and Planning

The City of Alexandria GIS website maintains an updated publication of the zoning ordinance of the County. GC&T personnel reviewed the current zoning maps of the *properties* and the immediate vicinity. The following information was noted during a review of the available resources.

- The subject *properties* are currently zoned by City of Alexandria as KR (King Street Urban Retail). The properties to the north, west and east are zoned as King Street Urban Retail. The properties to the south are zoned as Commercial Low (CL) and Commercial Downtown (CD).

3.2 Land Title Records

Public land records are typically reviewed to identify the present and past owners of a properties. The owner name, especially when corporate or other business-oriented names appear during a search, may indicate the previous uses of *the properties*. Additionally,

environmental liens may indicate that past uses of the properties have resulted in some enforcement action.

The available historical information did not reveal evidence of previous industrial uses on the *properties*. However, we recommend a review of the land title records dated from 1940 to the present to identify previous owners of the *properties* and to determine if there are any environmental liens recorded against the *properties*.

3.3 Aerial Photographs

GC&T personnel reviewed aerial photo maps of the *properties* and the immediate vicinity. The photos available were dated 1944, 1949, 1952, 1963, 1970, 1979, 1981, 1988, 1994, 1998, 2000, 2002, 2005, 2007, 2009, 2011 and 2012. The aerial photos are presented in the Appendix of this report.

The photos were reviewed to identify visible features on the *properties* that may indicate the historical uses of the *properties*. The following observations were noted during a review of these photographs:

- The 1963 to 2012 aerial photography imagery shows that the site is developed as a parking lot.
- There appear to be buildings located on the property between 1944 to 1952.

In summary, the photos do not reveal evidence of past uses on the *properties* or adjacent properties that would pose a concern to the environmental health of the *properties*.

3.4 Historical Topographic Maps

GC&T reviewed the Historical Topographic Maps entitled Occoquan, Quantico and Mount Vernon dated 2012, 1983, 1979, 1972, 1971, 1965, 1956, 1951, 1945, 1900, 1897, 1894, 1891 and 1890. The Historical Topographic Maps are presented in the Appendix.

- The maps dated 1890 to 2012 show contours which do not indicate development.

3.5 City Directory Abstract

GC&T reviewed the EDR City Directory Abstract. The City Directory Abstract includes a search and abstract of available city directory data based on the *Haines Criss-Cross Directory*. The EDR City Directory Abstract is presented in the Appendix of this report.

- The *properties* and surrounding properties identified in the City Directory Abstract pose a risk or concern to the environmental health of the subject *properties*
-
- 1. In 1921 a dry cleaner was located at 904 King Street adjoining the *property*. Due to the proximity to the *property*, this facility may poses a risk or concern to the environmental health of the subject *property*.
- 2. In 1969 a printing company named Instant Printing Service of Cooper Trent was located 900 King street adjoining the property. Due to the proximity to the property, this facility may pose a risk or concern to the environmental health of the subject property if a spill or release occurred and was not contained.

3.6 Sanborn Fire Insurance Map Report

Sanborn maps are certified copies produced by Environmental Data Resources, Inc. (EDR) under arrangement with the Sanborn Library, LLC. Sanborn Fire insurance maps from 1996, 1993, 1989, 1959, 1941, 1921, 1912, 1907, 1896 1891 and 1885 were available for review. The Sanborn Fire Insurance Map Report is presented in Appendix I.

- The *property* appears to be unchanged in the Sanborn Fire insurance Maps between 1989 to 1996.
- The Sanborn Fire Insurance Maps show one large building and two smaller buildings located at 912 King Street.
- The Sanborn Fire Insurance Maps dated 1941 and earlier exhibit buildings located at 912, 918 and 920. The uses of these buildings is not labeled.

3.7 Data Gaps

Data Gaps are defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.

- Significant data gaps that may change the conclusions of this Phase I Environmental Site Assessment report were not identified.

4.0 SITE VISIT

On October 14, 2016, GC&T personnel visited the *properties* to observe the existing conditions of the site and the immediate vicinity. Conditions which limited the visual and physical observation of the *property* in accordance with the standard practice outlined in ASTM E1527-13 were not noted.

4.1 Site Description

The *property* is currently developed as Paid Parking Lots and are approximately square feet in size. The parking lots are surrounded by residential buildings on all sides. Commercial buildings are located in all sides of the properties (Photograph 2, 3).

4.2 Surface and Unusual Features

The ground surface and general site features, i.e. surface soils, concrete slabs, paved areas, bodies of water, and vegetation, were observed *visually and physically* to the extent that they were not obstructed by disturbed soils, man-placed fill material, buildings, or other structures.

- Denuded areas and sparse vegetation were not observed on the *properties*.
- Stained soils and stressed vegetation were not observed on the ground surface during our site visit.
- Deceased game or unusual odors were not observed or noted on the *properties*.

4.3 Unidentified Containers and Drums

The *properties* was inspected for containers (5 gallons or greater) and drums (55 gallons) which may store or may have been used to store hazardous substances or petroleum products.

- No unidentified containers were observed on the properties.

4.4 Solid Waste Disposal

The *properties* was inspected for any evidence of waste disposal or illegal dumping which may involve hazardous substances or petroleum products.

- Evidence of solid waste disposal across the *properties* was limited to minor miscellaneous litter, waste from construction and domestic trash. Some of the items observed included paper and plastic products.

4.5 Storage Tanks and Leakage Assessment

The *properties* were visibly inspected for storage tanks which may contain hazardous materials or petroleum product. The *properties* were inspected for evidence of filler ports or vent pipes extending above the ground surface, which may indicate the presence of underground storage tanks.

- Aboveground or Underground Storage Tanks were not observed on the subject *properties* on the day of the site visit.

4.6 Indication of PCBs

The *properties* were visibly inspected for overhead or on-grade electrical transformers. The exterior of the unit is inspected for identification labels indicating "NON PCB" labels. The ground surface adjacent to or beneath the units are visually inspected for stained soils, oil drippings or stressed vegetation which may indicate the presence of PCB's.

- Electrical transformers were observed on the *properties* on the day of the site visit (Photographs 7, 5). No oil drippings, stressed vegetation or stained soils were located within the vicinity of the pole mounted transformer. Non-PCB labels were not observed on the transformers.

It is understood that any waste management associated with leaking transformers containing PCB's are the responsibility of the electric supplier.

4.7 Physical Setting and Pollution Migration

Surface

The *properties* are identified on the USGS 7.5 Minute Topographic Series Map, entitled "Alexandria, Virginia Quadrangle". Surface runoff generally flows from the middle of the site towards lower elevations in the east and west.

Subsurface

A review of the published geological information indicates that the site is geologically located in the Atlantic Coastal Plain Physiographic Province of Virginia. The Coastal Plain deposits are composed of sand, gravel, silt, and clay in fairly well sorted and bedded fluvial deposits. The deposits are generally described as well-rounded cobbles and pebbles of gravel and quartz sand interbedded with layers of silt and highly plastic clay. Groundwater is believed to flow to the east towards the Potomac River.

4.8 Personal Interviews

Mr. Tom Senior, Co-Owner of Sacred Circle

GC&T conducted an interview with the Co-owner of the Sacred Circle. Mr. Senior had been with Sacred Circle for 10 years. He had no knowledge of any petroleum or hazardous substances associated with the *properties*. Mr. Senior had no knowledge of hazardous materials or petroleum products in connection with the *properties*. Mr. Senior had no knowledge of spills, chemical releases or environmental cleanups that have taken place on the *properties*. Based on his knowledge and experience, Mr. Senior stated that he did not know of any obvious indicators that point to the presence or likely presence of contamination of the *properties*. Mr. Senior stated that he had no knowledge of above ground or underground storage tanks. Mr. Senior was not aware of any adjacent properties that are or were used for industrial purposes such as gas station, motor repair facility, commercial print shop, dry cleaner, photo developing, laboratory, junkyard, landfill, waste storage, disposal, processing, or recycling facility. Mr. Senior was not aware of what the previous use of the *properties* had been.

4.9 Sewage Disposal System

The *properties* were visibly inspected for sewage disposal systems. Indications of a septic system were not observed.

5.0 NON-ASTM ISSUES

5.1 Asbestos-containing Materials

The *properties* was not investigated for the identification of asbestos-containing building materials (ACBM) due to the scope and limitations of this study. Historically, asbestos-containing building materials were used in construction prior to the 1980's before building codes regulating the use of ACBM were implemented. We recommend that all materials encountered during the future development of the *properties* (i.e. building demolition, trash removal), if any, be inspected to evaluate the potential presence of asbestos. Emphasis should be placed on construction debris consisting of floor and ceiling tiles, siding, roof shingles, and thermal insulation.

5.2 Naturally-occurring Radon Gas

Based on information provided with the Geotest service of the EDR report, the Environmental Protection Agency (EPA) has classified the subject *property* area as "Zone 3", with indoor average radon levels typically below 2 Pci/L. Of 549 sites tested, 93.81% had radon concentrations below 4 Pci/L, 4.92% had radon concentrations between 4 to 10 Pci/L, 0.91% had radon concentrations between 10 to 20 Pci/L, and 0.36% had radon concentrations between 20 to 50 Pci/L. Please see Table 1 below for more information.

Table 1: Area Radon Information.

AREA RADON INFORMATION					
EPA Region 3 Statistical Summary Readings for Zip Code: 22314					
Number of sites tested: 549.					
Maximum Radon Level: 40.8 pCi/L.					
Minimum Radon Level: -0.1 pCi/L.					
pCi/L <4	pCi/L 4-10	pCi/L 10-20	pCi/L 20-50	pCi/L 50-100	pCi/L >100
515 (93.81%)	27 (4.92%)	5 (0.91%)	2 (0.36%)	0 (0.00%)	0 (0.00%)
Federal EPA Radon Zone for ALEXANDRIA CITY County: 3					
Note: Zone 1 indoor average level > 4 pCi/L.					
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.					
: Zone 3 indoor average level < 2 pCi/L.					

5.3 Wetland Areas

Published maps showing updated resource protected areas (RPA) or wetland areas were not reviewed for this assessment. Field markers that may delineate resource protection areas on the *properties* were not identified.

6.0 CONCLUSIONS

GC&T has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 and the scope of services as outlined in our Proposal/Agreement No. 216M-8517. Any exceptions to or deletions from this practice are described in **Section 1.2 "Limitations and Limiting Conditions"** of this report.

6.1 Recognized Environmental Conditions

Recognized environmental conditions are defined as "the presence or likely presence of any *hazardous substances* or *petroleum products* on a *properties* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *properties*, or into the ground, groundwater, or surface water of the *properties*" even under conditions in compliance with laws.

- *Recognized environmental conditions* were identified in connection with this *properties* during this assessment.

1. Launder Center is listed as a former dry cleaning business based on the EDR Historical Cleaner list. This business was located at 900 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**
2. Lee Tuck is listed as a former dry cleaning business dating from based on the EDR Historical Cleaner List. This business was located at 902 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**
3. Premier Cleaners and Dryers is listed as a former dry cleaning business based on the City Image Directory dating from 1921 to 1926. This business was located at 904 King Street neighboring the property to the east. **Due to the proximity to the *property* and an equal to higher elevation, this facility poses a risk or concern to the environmental health of the subject *property*.**

6.2 De Minimis Conditions

For the purposes of this report, *de minimis conditions* shall be defined as those recognized *environmental conditions* which are in small enough quantity that they do not present a material risk of harm to the public health or the environment. These conditions generally would not be subject to an enforcement action if they were brought to the attention of appropriate government agencies.

- Evidence of solid waste disposal across the *properties* was limited to minor litter, wooden palettes and domestic trash.

7.0 LIMITATIONS

The findings and conclusions presented in this report are based on the evaluation of the information gathered and reviewed as of the specific dates referenced and our experience and knowledge of the general area. It is noted that some records are obtained from government agencies which do not permit non-personnel to review their files. Therefore, our evaluation is limited to the records searched and provided by others.

A Phase I Environmental Site Assessment cannot completely eliminate the uncertainty regarding the potential for recognized environmental conditions in connection with the properties. This assessment is intended to reduce, but not eliminate the uncertainty regarding the potential for recognized environmental conditions. The information presented herein is considered to be reasonably ascertainable and practically reviewable within reasonable time and cost constraints. Should additional information become available which would result in a change in the conclusions of this assessment, Geotechnical Consulting & Testing, Inc. reserves the right to issue addendum and amendments to this report as necessary.

The decision to implement recommendations or to perform additional services is exclusively at the discretion of the user. If a higher confidence level in the environmental health of the properties is desired, Department of General Services may consider the collection of subsurface soil and groundwater samples across the properties for environmental testing and chemical analysis. Electrical transformers, including one electrical transformer with burn marks, were observed on the properties on the day of the site visit. Non-PCB labels were not observed on the transformers. Stained soils, oil drippings or stressed vegetation were not observed. It is understood that any waste management associated with leaking transformers containing PCB's are the responsibility of the local electric supplier. The presence of leaking transformers containing PCB's could pose a risk to the environmental health of the properties. Higher than normal amounts of radon were detected within the target area. When radon becomes trapped in buildings and concentrations accumulate and increase indoors, exposure to radon can become a concern. The presence of radon is considered a non-scope issue by ASTM and/or beyond the scope of the assessment.

This report was prepared for the exclusive use of Department of General Services. Any use of this report for purposes other than general information or by any third parties is at the sole risk of the user.

No warranty, guarantee or certification of the properties being free of contamination is implied or expressed by the preparation and submittal of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	1202 KING ST	WNW 1/8 - 1/4 (0.145 mi.)	J56	46

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

FUELS PROGRAM: This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

A review of the FUELS PROGRAM list, as provided by EDR, and dated 05/24/2016 has revealed that there is 1 FUELS PROGRAM site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used

EXECUTIVE SUMMARY

whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

ALEXANDRIA TOWN GAS	SEC ORONOCO AND N LE	ENE 1/2 - 1 (0.546 mi.)	116	149

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 24 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CTC: 27.800000000000001
 Current Owner: Other; Private Sector
 Future Prog: Not reported
 Description: Records do not indicate if any improvements have been placed on the site; however, a site visit showed that the building was constructed in 1929 and may have operated as a cold storage facility prior to DOD ownership. In a telephone conversation on 5 December 1991, Mr. Dwyer stated that he had removed some of the sheds and paved over the railroad siding, he also stated that there remains an underground tank of some type on the property. The original wood-framed building is a neatly kept series of business storage units arranged within an "L-shape". A newly paved parking area provides access to loading ramps for each of the units. Heat pumps provide heating and cooling for each of the units. The filler cap for an UST is located in the paved area adjacent to the building (see site location map). The owner, William Dwyer, stated he has never used the tank and did not know its size or the type of product it contained.
 Current Program: Not reported
 History: The United States acquired 0.81 acre in 1943 for use as an Army Quartermaster storage facility. The site is located adjacent to Henry Street and First Street in the city of Alexandria. The site was excised to GSA on 24 July 1959. During GSA ownership from 1959 to 1978, the building was used for general storage by the Civil Air Patrol. The site is now divided into separate units for business storage and operates under the name of Depot Warehouse. GSA conveyed the property to Mr. W. C. Dwyer on 30 October 1978. In a telephone conversation on 5 December 1991, Mr. Dwyer stated that he had removed some of the sheds and paved over the railroad siding, he also stated that there remains an underground tank of some type on the property.

Incident Summary:	Not reported
Reported:	Reported dumpster fire. A truck caught fire and ruptured saddletank. FD contained spill, clean up contractor enroute. Mr. TJ Fannon reported that a cab on a fuel truck caught fire and the heat scorched material in an adjacent dumpster and damaged the fuel line causing a small leak. No soil was excavated, no free product was on the ground. Mr Fannon believes 5-10 gallons lost, washed away with fire extinguishing efforts.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704

Number of Days to Update: 135	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VA BROWNFIELDS: Brownfields Site Specific Assessments

To qualify for Brownfields Assessment, the site must meet the Federal definition of a Brownfields and should have contaminant issues that need to be addressed and a redevelopment plan supported by the local government and community. Virginia's Department of Environmental Quality performs brownfields assessments under a cooperative agreement with the U.S. Environmental Protection Agency at no cost to communities, property owners or, prospective purchasers. The assessment is an evaluation of environmental impacts caused by previous site uses similar to a Phase II Environmental Assessment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VA SPILLS NO: PREP Database

The Department of Environmental Quality's POLLUTION RESPONSE PROGRAM, known as PREP, provides for responses to air, water, and waste pollution incidents in order to protect human health and the environment.

Date of Government Version: 09/23/2009	Source: Department of Environmental Quality, Northern Region
Date Data Arrived at EDR: 09/29/2009	Telephone: 703-583-3864
Date Made Active in Reports: 10/30/2009	Last EDR Contact: 09/06/2011
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/19/2011
	Data Release Frequency: No Update Planned

VA SPILLS PC: Pollution Complaint Database

Pollution Complaints Database. The pollution reports contained in the PC database include the initial release reporting of Leaking Underground Storage Tanks and all other releases of petroleum to the environment as well as releases to state waters. The database is current through 12/1/93. Since that time, all spill and pollution reporting information has been collected and tracked through the DEQ regional offices.

Date of Government Version: 06/01/1996	Source: Department of Environmental Quality
Date Data Arrived at EDR: 10/22/1996	Telephone: 804-698-4287

VA SPILLS: Prep/Spills Database Listing

The Department of Environmental Quality's POLLUTION RESPONSE PROGRAM, known as PREP, provides for responses to air, water, and waste pollution incidents in order to protect human health and the environment. PREP staff often work to assist local emergency responders, other state agencies, federal agencies, and responsible parties, as may be needed, to manage pollution incidents. Oil spills, fish kills, and hazardous materials spills are examples of incidents that may involve the DEQ's PREP Program.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Longitude (West):	77.049954 - 77° 2' 59.83"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	321992.4
UTM Y (Meters):	4296949.5
Elevation:	43 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5950781 ALEXANDRIA, VA
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

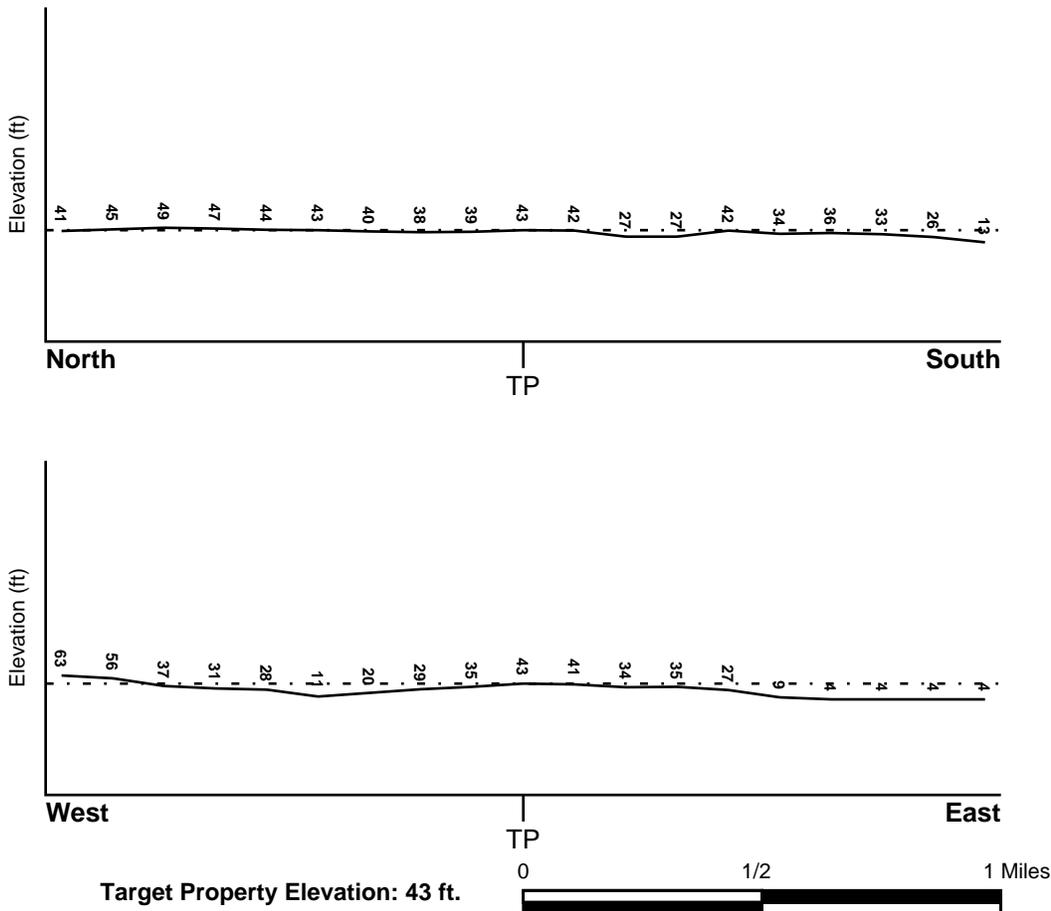

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
51059C0320E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
51013C0079C	FEMA FIRM Flood data

51059C0315E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ALEXANDRIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

System: Cretaceous
Series: Lower Cretaceous
Code: IK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: DUMFRIES

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 5.50 Min: 4.50
2	10 inches	29 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 6.00 Min: 2.00	Max: 5.50 Min: 4.50
3	29 inches	35 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 6.00 Min: 2.00	Max: 5.50 Min: 4.50
4	35 inches	72 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 5.50 Min: 4.50

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

Surficial Soil Types: loam

Shallow Soil Types: loam
clay loam

Deeper Soil Types: stratified
sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Geotechnical Cons & Testing were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Site Name:

912, 916 & 920 King Street
916 King Street
ALEXANDRIA, VA 22314
EDR Inquiry # 4746371.18

Client Name:

Geotechnical Cons & Testing
4899 Prince William Parkway
Woodbridge, VA 22192
Contact: Aditya Rayudu

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geotechnical Cons & Testing were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 6E29-4644-9520

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Geotechnical Cons & Testing (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

RECORDS OF CORRESPONDENCE

**PHASE I ENVIRONMENTAL SITE
ASSESSMENT USER QUESTIONNAIRE**

PROPERTY: 912, 916 and 920 King Street

GC&T No. 216M-8560

USER: Ms. Donna Poillucci

Department of General Services

The purpose of this questionnaire is to identify the possibility of recognized environmental conditions in connection with the above referenced *property*. We request a response to the following questions from yourself or from others who are reasonably available and may have personal knowledge of the *property*.

Do you have any knowledge of any hazardous substances or petroleum products, under any conditions, in association with the *property* or those surrounding it? Yes No
If yes, provide a brief explanation _____

Do you have any knowledge that the purchase price is or was significantly lower than that of comparable properties? Yes___ No_____. If yes, could this reduced price be related to an environmental condition? Yes No

Do you have any knowledge of any Activity and Use Limitations (AUL) per ASTM-E2091-11, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes No
If yes, provide a brief explanation _____

As the user of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? Yes No

Are there any previous environmental assessments or audit soils, geotechnical, wetland, floodplain or other reports available for review? Yes No _____
(If yes, please forward a copy to us for our review)

Do you know if the *property* or adjacent properties are or have been used for Industrial purposes or as gas station, motor repair facility, commercial print shop, dry cleaner, photo developing, laboratory, junkyard, landfill, or as a waste storage, disposal, processing or recycling facility? Yes No _____ *(If yes, please circle all that apply)*

Are there currently or to the best of your knowledge any storage tanks (above or underground) chemical drums or bags, automobiles or industrial batteries, transformers, paints or pesticides in connection with the *property*? _____ (If yes, please circle all that apply)

Do you have any knowledge of commonly known or reasonably ascertainable information about the *property* that would help the environmental professional to identify conditions indicative of releases or threatened releases?

1. Do you know the past uses of the *property*? Yes No
If yes, provide a brief explanation _____

2. Do you know of specific chemicals that are present or once were present at the *property*? Yes No
If yes, provide a brief explanation _____

3. Do you know of spills or other chemical releases that have taken place at the *property*? Yes No
If yes, provide a brief explanation _____

4. Do you know of any environmental cleanups that have taken place at the *property*? Yes No
If yes, provide a brief explanation _____

As the user of this ESA, based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*? Yes No
If yes, provide a brief explanation _____

The ASTM standard dictates that the user determines if there are or have been environmental liens placed on the property via a title search.

Has a title search been ordered? Yes No _____
Are any environmental liens recorded? Yes No _____

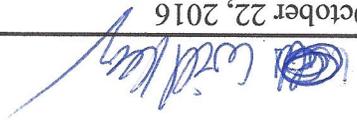

COMPLETED BY: _____ DATE: _____

Name (Please type/print) _____ Title/Position: _____

Alexandria as Tax Map No.: #074.01-06-02, #074.01-06-03, #074.01-06-03

Property inquiry (address): 912 King Street, 916 King Street, 920 King Street

Property Name: 912, 916 and 920 King Street

Any information relating to the release, presence, transportation, storage, disposal, or complaint of hazardous materials, petroleum products, health code violations, or reports of groundwater contamination or dumping.

Requested information:

We (G&T, Inc.) understand that completion of this information request is expected to take about ten working days and we are in agreement with this timeframe. If unforeseen problems arise (i.e., records are at another location, etc.), we will be notified immediately of any delays in fulfilling our information request.

In requesting the information listed below, G&T Inc. agrees to pay the charges specified by the City of Alexandria Department of Health and the Department of Fire and Rescue to cover the expense of research (including computer database search, where applicable), and retrieval and copying of any pertinent records.
