

RABIES ALERT

Rabies is a preventable, deadly viral disease spread through saliva due to a bite or scratch from an infected animal

Situation

- On 9/21/17, an unidentified, aggressive, medium-sized black and white dog bit two pedestrians on 200 block of N. Saint Asaph Street
- If you have seen an aggressive dog matching this description, please call Animal Control
- If you or a family member have been **bitten** or had **physical** contact with an aggressive dog, please call the Health Department

How to Keep You and Your Pets Safe

- Do **not** feed or approach any wild, stray or feral animals, even if they appear friendly or injured
- Make sure your dogs and cats are up-to-date on their rabies vaccinations
- Dogs must be on a leash in all public areas and parks

Symptoms of Rabies in Animals

- Unexpected aggression from an animal
- Extreme drooling or foaming at the mouth
- Walking as if drunk or unusual sluggishness or stupor

If you have concerns about animals or see these animals, please call:
