HISTORIC PHOTOGRAPHIC DOCUMENTATION
OF THE
SOUTHERN R&R ROUNDHOUSE

The work contained in this Presentation Binder of the Southern R&R Roundhouse building was entirely photographed and prepared by Kathryn A. Brown, Photographer, of Alexandria, Virginia. There was direction and assistance by Dr. Pamela Cressey, City of Alexandria Archaeologist, and Mr. Al Cox, City of Alexandria Architect. The Roundhouse is located south of Duke Street within the Carlyle Project development. It was chosen for documentation due to the fact that as the Carlyle Project progresses, the Roundhouse will be demolished. The photography was conducted on a preliminary site visit in December 1993, and in May, June and November 1994; the time line was required by difficult weather and site conditions. Enclosed within you will find both Black & White and Color photography and descriptions in the following format: Key Maps showing the location and direction of each shot; Catalogs numbering and describing each shot; dated and numbered B&W 35mm and 4x5 contact sheets and correspondingly numbered B&W negative sheets; numbered 8x10 and 5x7 prints; and numbered 35mm slides. More information concerning the Roundhouse and the West End Village is to be written by Kurt Schweigert in a project history, to be included herewith upon completion.

Thank you for the opportunity to be the documentary photographer for this intriguing project.

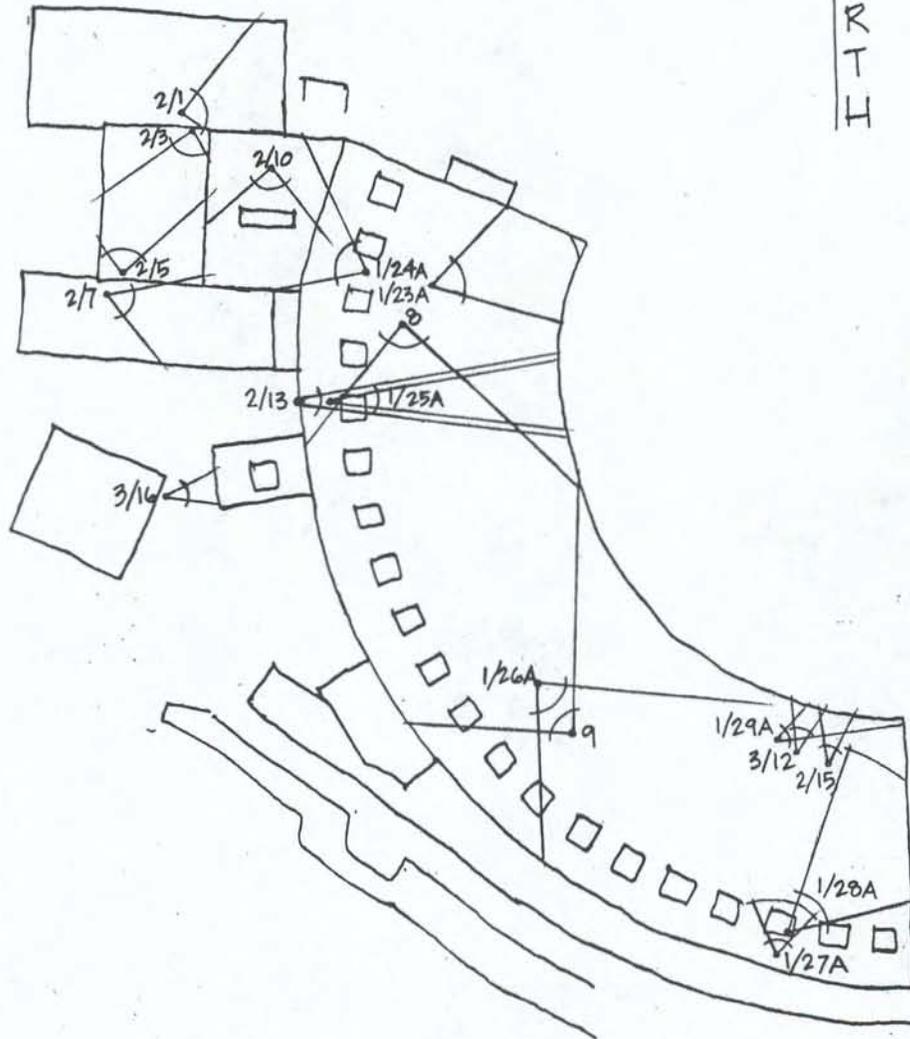

Kathryn A. Brown
