INTRODUCTION

This Final Concept Design package presents the final iteration of the Fort Ward Interpretive Plan, as it has been guided and shaped by staff commentary and stakeholder feedback. This represents the final deliverable under this contract in the design of new interpretive products at Fort Ward Museum & Historic Site in Alexandria, Virginia.

This package includes the elements outlined in the Scope of Work and previously discussed, which together will create a new visitor experience at Fort Ward. Please note that a companion Draft Text document contains a more detailed breakdown of interpretive text to be included within the updated museum exhibit, orientation stations, site markers, waysides, site brochure, and the facilitated dialogue.

Our goal with this presentation is to provide sufficient visualization of three-dimensional elements and graphics standards so that the City and stakeholders will be able to move forward in fabricating new interpretive elements for Fort Ward Museum & Historic Site.

At the same time, we recognize that the brochure, of which we will be responsible for the first print run, may require interim discussion. As such, we have allowed a space for commentary within the companion text document.

This design presents a unified story about Fort Ward, before, during, and after the Civil War. We commend the project team and stakeholders for working together to develop a theme statement, “Bastions of Freedom,” that roots visitors in an overarching narrative.

This passage from prior directives is worth retaining, as we think the ongoing planning makes good on the goals from the 2015 Management Plan:

“... the importance of the ongoing efforts to preserve the Civil War fortification, as described in the FWAG chapter report on Civil War Resources, can be further amplified and emphasized by linking that piece of the story to the broader story of its aftermath. With the limitations of space and staffing identified in the FWAG Draft Chapter on “Cultural Resources—The Museum, its Collections and Programs”—the idea of extending the interpretation outdoors and using the park’s historic landscapes and remaining historic features to help tell the complete story must be a critical component of any future interpretive and educational efforts.”

– Management Plan, January 2015
A variety of design elements are arrayed around the site, including a new exhibit and film inside the Museum. Note that a digital element, a brochure, and an educational program will also be part of the new interpretive scheme.

1. **Museum Enhancements**  
   Updated site-wide, story-wide film and new site overview exhibit.

2. **Orientation Station**  
   Multi-surface including site orientation, map, and interpretive introduction. Scale tactile model of the site.

3. **Orientation Station Duplicate**  
   Propose to duplicate the exhibit located at #2. Depending on budget, may be able to include additional tactiles as a nod to the younger audience at the playground.

4. **Historic Home Footprint**  
   Metal frame outline of the footprint of an original home to give a glimpse of "The Fort" community that once existed here. Proposed at the school/church/residence site.

5. **Community Gateway**  
   Structure marking an entrance to the African American Community Trail, bookending the military fort gate with a community signpost.

6. **Commemoration Space**  
   Contemplative space with seating and light interpretation to encourage visitors to reflect on the site's history.

7. **NOT SHOWN: Existing and New Wayside Panels (see page 12)**  
   Existing interpretive panels on site ("The Fort" community, quantity 6), updated panels (Fort Ward, quantity 9), and new waysides ("The Fort" community, quantity 5).

8. **NOT SHOWN: Site Markers (see page 32)**  
   Low-profile markers indicate key historic features that are no longer visible without impeding the historic atmosphere of the site. Works in tandem with brochure and AV.
MUSEUM ENHANCEMENTS: FILM & EXHIBIT

Updates within the Museum building ensure that this visitor experience reflects the holistic story and experience of Fort Ward, revealing its role in defending the nation and building a community.

Park Film
An updated park film ties site-wide themes and stories into one cohesive storyline. This serves as an overall introduction to the story and the site, launching visitors into a fuller understanding and appreciation of the meaning and relevance of the grounds.

Updated Exhibits
Within the designated space, currently displayed Civil War era history, including the site diorama, will shift to the far left as noted in the rendering below. This will leave the remainder of the space open to incorporate the new Park Film and new exhibits detailing the history of "The Fort" community. Shifting this content will allow the history to be presented as a chronological overview, providing visitors with a comprehensive introduction to the site’s entire history.
FOLLOWING THE CIVIL WAR, African American families began to purchase land at the abandoned Fort Ward. The first residents of “The Fort” and nearby “Seminary” community (located around the Virginia Theological Seminary and Episcopal High School) were probably a mixture of individuals already living in the area and migrants from other parts of Virginia, notably Fauquier County. The 1870 U.S. Census records four family names at Fort Ward: the Pages, the Shorts, the Perkins, and the McKnights. A decade later, the number of names grew to twenty. These families, many of which were connected by marriage and kinship, created a thriving neighborhood in the early 20th century by building permanent homes, establishing churches and schools, and acquiring and dividing land plots to expand the community.

THE BEGINNING OF “THE FORT” began in the 1990s, archaeological excavations and research led by the City of Alexandria coupled with the efforts of local citizens, especially descendants of the Fort and Seminary communities, have played a crucial role in revealing the history of the Fort neighborhood. While the visible legacy of this post-Civil War African American community was erased from view during the establishment of Fort Ward Park in the early 1960s, the foundations of homesteads, grave sites and thousands of artifacts remained buried in the ground. Recent archaeological excavations and historical research have helped shed light on the lives of the people who once called The Fort their home.

RESTORING FORT WARD during the Civil War, thousands of formerly enslaved people migrated to safety behind the Union lines of the Defenses of Washington. In Alexandria, many of these freedmen and free blacks worked to support the Northern war effort. When the war ended in 1865, the land near a number of these Union forts continued to represent freedom for African Americans, who began settling near the abandoned fortifications. On the grounds surrounding the earthen remains of Fort Ward, an African American community developed that became known as “The Fort.” This community endured for nearly a century until the City of Alexandria began to purchase land from The Fort residents in the 1950s to restore the historic fort and establish Fort Ward Park. As you explore the Museum and Park grounds, consider the freedom this land represented for those who lived here.
ORIENTATION STATIONS

These stations provide a robust overview orientation and include a tactile site map to initiate the visitor experience at Fort Ward Museum and Historic Site. Located at the parking lot behind the Museum (we propose replacing the existing kiosk, integrating key information into this new component) and near the new playground location, these duplicate exhibits aim to provide basic site orientation and overview interpretation for all visitors, whether or not they choose to enter the Museum.

**Introduce Design Vocabulary**
The design concept reflects without exactly mimicking the recent City standards shared with the team. The distinctive flowing bar at the upper edge of the upright also introduces the look of the new wayside designs.

**Exterior Tactile Orientation Map**
This tactile map lays out the site and its many resources—seen and no longer visible—from the years 1860 to 1965. It allows visitors to orient themselves to the site in a manner unique from the Site Tour Brochure, as well as providing an accessible portal to the site and story to visitors who are blind or who have limited vision.

**Interpretive Introduction**
The expanded Orientation Kiosk provides an interpretive overview introduction to the site. The current design envisions integrating the illustrated map—which includes trails and locations of key interpretive areas—along with images highlighting Fort Ward, “The Fort” community, and the Museum.

**Incorporate Existing Regulations Signage**
Perhaps the rear side of the Orientation panel element could include the current regulations information.
WELCOME TO FORT WARD

FORT WARD, one of the largest Union forts in the Defenses of Washington, stood as a “Bastion of Freedom,” guarding the nation’s capital from Confederate attack during the Civil War. Following the war, this land continued to represent freedom for the African American residents of “The Fort,” a community of formerly enslaved people who settled near the abandoned fort. As you explore Fort Ward, consider what this land has meant to those who lived and worked here throughout each stage of its history.

THE STORY OF FORT WARD

FORT WARD

IN MAY OF 1861, Union troops crossed the Potomac River into Virginia and began building fortifications along Alexandria Heights and elsewhere in the town of Alexandria. Fort Ward was one of the 164 forts and batteries that eventually ringed the Federal capital and became known as the Defenses of Washington. Today, Fort Ward is the best preserved of all remaining forts in this formidable defense system. Pass through the reconstructed Ceremonial Entrance Gate to tour the fort and learn more.

“THE FORT”

AFTER THE CIVIL WAR, the Union fort was dismantled and its earthworks abandoned. Several African American families began to purchase land, build homes, and settle in the area. "The Fort" continued to grow into a thriving, self-sufficient community until the 1950s, when the City of Alexandria began buying back the land — sometimes after conditioning the former long-time residents — in order to restore the Civil War fort and establish Fort Ward Park. Enter through the Community Gateway and learn about the people and places that made up "The Fort" neighborhood.

THE MUSEUM

Begin your visit by exploring Fort Ward Museum. Patterned after a Union Army headquarters building, it offers an overview of Fort Ward’s history, and special programs are held in the Defenses of Washington, the Ward Museum. Patterned after a Union Army headquarters building, it offers an overview of Fort Ward’s history, and special programs are held throughout the year. Exhibits, an Amphitheater, a restored Union field kitchen, and an Orientation Station provide additional historical content online.

You can access the web companion at: explorefortward.com

Enter through the Community Gateway and learn about the people and places that formed the wayside signs introduce you to the African American residents of "The Fort," a community of stories of the Civil War soldiers and families of the Civil War fort. As you tour the Park, watch for historic site markers that provide more information. Please also look for the Park brochure in the Museum for additional historical content online.

A life-size frame outline of a home provides a stunning and powerful impression of “The Fort” community. We are modeling this footprint after the school/church/residence, based off recommendations from the park. Note that the floorplan drawn here is a best guess as needed to identify the actual outline of the home. The archaeological reports and oral histories that we have consulted describe interior layout, and—to our knowledge—there is one existing sketch of the school/church/residence building.

Moving forward, descendants, community members, and OHA’s archaeological team should be consulted to determine the appropriate location, and appropriate base materials to rest on the ground.
• Building was approximately 25 x 50, according to the scale included in a historic sketch.
• The building was originally a school, and was converted to a church before becoming a residence for Sgt. Lee Thomas Young and his family.
• Porch along the front of the house and small extended room at the rear.

"Making Sense of the Fort; Civically-Engaged Sensory Archaeology at Fort Ward and Defenses of Washington,” Mary Furlong Minkoff, 2015.
COMMUNITY GATEWAY

These entry markers demonstrate Fort Ward’s dedication to telling how “The Fort” community developed and thrived on the site beginning near the end of the Civil War. Drawing visitors down the new community pathway (much as the recreated Gate does for the military fort), this feature provides an interpretive introduction to exploring the site’s post-Civil War heritage.

The rendering shown at right envisions two pillars, each topped by interpretation of “The Fort.” This scheme posits a tactile site map on the right-hand pillar, and perhaps dimensional tiles with family names on the left-hand structure. The pathway will extend around all sides of the pillars, so that any tactile elements are wheelchair accessible.

Planning and consultation for Fort Ward in previous years has emphasized the importance of “commemoration” to the site. Fort Ward offers a unique place in the United States to remember the sacrifice and struggle of soldiers and civilians alike during the Civil War—and at the same time to consider the struggles, triumphs, and losses of African Americans who built a community in the shadow of this United States fort.

The rendering currently depicts Black Gum and Red Horsechestnut trees, as per a report on common shade trees in Alexandria by the Urban Forestry Management Unit of the Department of Recreation, Parks, and Cultural Activities. Moving forward, OHA should consult this office regarding the best type of tree to be planted in this space, as well as consider the cost of moving these trees within the installation budget.

Original sketch study
WAYSIDES—NEW, UPDATED, AND EXISTING

Interpretive waysides are critical for interpreting the historic site. Under this plan, existing waysides interpreting the military fortifications are updated to meet the new graphic standards proposed for the site. Existing Community waysides remain, and “The Fort” story is augmented by new structures.

Phase IV: Final Concept Design

April 23, 2019
Each of the two bombproofs, measuring 200 feet long by 12.5 feet wide, were located in the center of Fort Ward. During normal operations, the bombproofs were used as meeting rooms, storage facilities, and sometimes as a prison. In the event of an attack, the structures provided temporary protection for the soldiers. Water was supplied by a well located between the bombproofs.

The roof of a bombproof was constructed from logs that projected three feet over the entrance to the structure, forming a platform (banquette) on which infantrymen could stand to fire their muskets if the fort walls were scaled by an attacker.
THE FORT WARD ENTRANCE GATE, COMPLETED IN MAY 1865, provided the only access to the interior of the fort. The gate’s decorative details include stands of cannonballs and the insignia (castle) of the Army Corps of Engineers which designed and supervised the construction of the Defenses of Washington. The present gate is a reconstruction based on the original Corps of Engineers drawing below.

A ditch, or dry moat, surrounded the entire fort. The fort’s earthen walls reached a height of approximately 20 feet from the bottom of the ditch to the arch of the gate. The walls were 12–14 feet thick and could absorb the impact of artillery fire.

THE OFFICERS’ HUTS, soldiers’ barracks and mess hall were located outside the fort, near the present Museum, which is patterned after a Union army headquarters building. These structures were built in a typical board-and-batten style. The above photograph, taken at Fort Ward in 1863, shows the quarters of Capt. Theodore H. Rockwood (seated), of Co. E., First Connecticut Heavy Artillery.

Throughout the war, Fort Ward was manned by companies of the First Connecticut Heavy Artillery, as well as units from New York, Pennsylvania, and Ohio. The fort could accommodate a garrison of approximately 1,200 soldiers, although records indicate that only 300–400 men were stationed here at one time.
THE SOUTHWEST BASTION WAS THE MOST HEAVILY FORTIFIED AREA OF THE FORT with emplacements for seven guns, as well as a magazine and a filling room. The largest gun at Fort Ward, a 100-pounder Parrott Rifle, was located in the Southwest Bastion. This weapon was mounted on a center pintle (circular) carriage and could fire a 100-pound projectile at a distance of about five miles. The Parrott Rifle was important because of its capability of defending both the Leesburg Turnpike and the Little River Turnpike, two major roads into Alexandria.

The viewing platform to the right of this marker spans an opening (outlet) in the fort wall that enabled troops to move through the ditch to an outlying rifle trench without being exposed to enemy fire.
THIS STAIRWAY LEADS UP THE WEST WALL OF FORT WARD between the Northwest Bastion (to your left) and the Southwest Bastion (to your right). Fort Ward had 14 cannon emplacements along this area of the wall that created overlapping fields of fire. Infantry soldiers armed with rifle muskets stationed between the cannon emplacements made this wall of the fort a formidable obstacle to attack. A self-guided tour begins at the ceremonial gate.

The initial construction of Fort Ward was completed in September 1861. The fort was used to protect the approaches to Union occupied Alexandria via the Leesburg Turnpike (King Street) and Little River Turnpike (Duke Street).

By late 1864, the perimeter of the earthwork fort had been enlarged from 540 yards and 24 gun positions to 818 yards and 36 guns. Fort Ward was the fifth largest stronghold in the Defenses of Washington and was considered a model of 19th-century military design and engineering. The fort was named for Commander James Harmon Ward, the first Union naval officer to die in the Civil War. It was dismantled by December 1865.

THE ONLY BATTLE FOUGHT IN THE DEFENSES OF WASHINGTON occurred in July 1864, when General Jubal A. Early’s Confederate forces attacked Fort Stevens, located approximately seven miles north of the White House. At the end of the Civil War, the forts and batteries were dismantled and the material sold at auction. Fort Foote, the last remaining earthwork fort in the Defenses, was deactivated in 1878. Today, extant remains of many of these fortifications can still be found. The above map shows the 37-mile network of Union forts that protected the Federal Capital. The Defenses of Washington was the most expensive fortification system constructed in the Western Hemisphere.

PLEASE HELP PRESERVE FORT WARD for future generations by walking only on designated pathways. Climbing upon the fragile earthen walls of the fort is very destructive to the site.

Updated small wayside (24” w x 18” h)
**AMMUNITION** for the fort’s guns was kept in underground storage facilities called magazines and filling rooms. Shells were armed and sometimes stored in the filling room, while the magazine was used to hold black powder and crated rounds. Implements for firing the cannons could also be kept in the filling room.

Duty in either the filling room or the magazine was hazardous as the slightest spark could ignite the highly explosive black powder. Soldiers assigned to this task were required to remove all metal from their persons and to wear protective coverings on their shoes.
Northwest Bastion

The plan of Fort Ward consisted of five bastions with positions for 36 guns. The Northwest Bastion illustrates how the entire stronghold appeared in 1864. This bastion is armed with six reproduction weapons based on Fort Ward’s original table of armament: three 4.5” Rodman rifled guns (No. 14, 16, 17), two 24-pounder smoothbore Howitzers (No. 13, 15), and one 6-pounder James Rifle (No. 12).

The cannons worked in concert to sweep the field toward Little River Turnpike (Duke Street) to the south, and Leesburg Turnpike (King Street) to the north. Artillery crews in teams of 5–7 men were assigned to each gun position. Infantrymen were stationed along the ledge (Banquette) between the gun platforms.

The Northwest Bastion was restored by the City of Alexandria, 1961–64.

The precise art of firing a cannon was the result of a skilled team effort. A well-drilled gun crew, consisting of seven men plus a gunner, could fire a field cannon 2–3 rounds per minute.

The precise art of firing a cannon was the result of a skilled team effort. A well-drilled gun crew, consisting of seven men plus a gunner, could fire a field cannon 2–3 rounds per minute.

Large updated wayside (36" w x 24" h)

Potential raised tactile elements for Northwest Bastion structures, rifle trench, and map outline

Potential raised tactile elements for “Firing a Cannon” drawings

Fig. 1: Fort map showing Northwest Bastion
**PROFILE OF THE FORT**

**THIS EXTERIOR VIEW** of the restored Northwest Bastion illustrates the effectiveness of an earthwork fort. The fort walls were 18–22 feet high, 12–14 feet thick, and slanted at 45 degrees.

To gain access to the fort an attacker would have to cross the field of fire (the open area to the front of the fort), penetrate the abatis (the line of felled trees that surrounded the ditch), enter the ditch, and scale the walls while the defenders were well protected behind the embankments.

These restored walls illustrate how the entire 818-yard perimeter of Fort Ward appeared in late 1864.

*Help preserve this historic site* by entering the fort only via the bridge to the left. Please do not enter the ditch or climb upon the walls during your tour of Fort Ward.
RIFLE TRENCH

**THIS RIFLE TRENCH** extended from the North Bastion toward Battery Garesché located beyond Leesburg Turnpike (Route 7). Another rifle trench extended from the tip of the South Bastion near the Fort Gate. The rifle trenches prevented enemy troops from moving towards the rear of the fort.

**FIG.1** / Map showing rifle trench location

Potential raised tactile elements for rifle trench, Fort outline, and other map elements

Updated small wayside (24” w x 18” h)

**EXISTING GRAPHIC**
THIS OUTLYING SIX-GUN BATTERY was constructed to cover the ravine where Interstate 395 is located today. The remains of a covered-way rifle trench that extended from the Northwest Bastion is visible near the park road. This trench provided protection for troops moving from the fort to support the outlying gun battery.
New waysides representing “The Fort” community will be added to provide additional interpretation beyond the existing, relatively new, waysides. The new panels will incorporate the same base for a uniform look.

7.16 We Are Still Here
Provides an overview of the African American descendants of “The Fort” and Seminary communities today.

7.17 Faith and the Community
Based at the Oakland Baptist Cemetery. Interprets the churches and cemeteries at Fort Ward—why and how they were founded.

7.18 Education at "The Fort"
Overlooks the original location of the Seminary School and interprets the role of education in the Fort Ward African American community—something that many residents traveled at great length to achieve, in addition to the schoolhouse set up here.

7.19 A Community at “The Fort”
Looking out across the homesites, interprets families and neighborhood leaders like the Adams, McKnights, Caseys, and Belks, and traces how families grew and changed their community through decades of ongoing inequality.

7.20 From Fort to Community
Connects both the Outlying Gun Bastion and Jackson homesite as an opportunity to trace the evolution of Fort Ward from military installation to homesite to municipal park. May also be appropriate at the site of the McKnight property, inside the fort.

NOTE: Locations for new waysides (7.16-7.20) are approximate and will be determined during installation.
IN 1898, CLARA SHORTS ADAMS AND ROBERT ADAMS

... donated a quarter-acre of land to the Falls Church School
District to build a school for African American children. At
the time, schools in Virginia were segregated by race. Until
this donation, “The Fort” and “Seminary” communities did
not have equal access to educational resources. After the
community took education into their own hands, the one-
room “Colored School Building at Seminary” opened as the
first public schoolhouse for African American children in
the area and remained until 1925.

“They (residents of “The Fort”) were mostly
educated people, and they all went to school,
though most of them went to school together
in the little one-room schoolhouse…”

BARBARA ASHBY GORDON / 1939

AFTER THE CLOSURE OF “THE FORT’S” FIRST SCHOOL IN 1925, The Seminary School opened in 1927 after community efforts and support. Douglas Wood donated the land, and the community raised $1,000. “The Fort” also received $900 from the Rosenwald Fund and $4,000 of public funding to build The Seminary School’s new, three-room building.

IN THE 1990s, archaeologists began conducting a series of interviews with former members of “The Fort” community in order to draw attention to their story as well. Since, historians and the Descendants Society have worked to continuously remind the Fort they are still here—and their story deserves to be heard equally. As you explore the site, think about how your Fort Ward experience might have differed without mention of “The Fort” community.

“Alexandria should have preserved some of that area as a salute, if nothing else, to the former slaves who once lived there ... and we [residents of “The Fort”] all came from slavery.”

/ BARBARA ASHBY GORDON

ALTHOUGH THE PHYSICAL PRESENCE OF “THE FORT” ceased to exist after the City of Alexandria reclaimed the land in the 1960s, those who lived in the community and their descendants have not forgotten. The Fort Ward and Seminary African American Descendants Society has a long history of fighting to “preserve and promote the history and cultural heritage of communities in the geographic proximity of Fort Ward.” Beginning in 2008, the group made their voices heard by advocating for the importance of including the community’s story within the Fort Ward Park and Historic Site experience.

“Alexandria should have preserved some of that area as a salute, if nothing else, to the former slaves who once lived there ... and we [residents of “The Fort”] all came from slavery.”

ORGANIZED RELIGION was an important aspect of daily life for community residents, and had been an integral part of African American culture even before the Civil War. There were many churches in Alexandria for residents to attend, and by 1882, they had established their own church: St. Cyprian’s Episcopal Chapel. Residents gathered at St. Cyprian’s for baptisms, weddings, funerals, and Sunday School. As Baptist Christianity grew in popularity, members of the community established a second place of worship, the Oakland Baptist Church, in the 1890s.

SEVERAL PROMINENT COMMUNITY MEMBERS, including Clara Adams, John Casey, John Terrell, and Harriet Shorts, were considered to be founding members of the Oakland Baptist Church and Cemetery. In 1929, the Javins family deeded more land to the church to expand the original cemetery, known as the “Old Grave Yard.” Members of the Javins and McKnight families are buried at Oakland Baptist.

“Going to Oakland Baptist cemetery. Amen. It was all woods then, you know, but you could stumble all over the graves. Amen…. Only way they could get to the cemetery was through a lane here, and that looked like the same old lane.”

/Sgt. Lee Thomas Young / 2009
**EDUCATION AT “THE FORT”**

**IN 1898, CLARA SHORTS ADAMS AND ROBERT ADAMS** donated a quarter-acre of land to the Falls Church School District to build a school for African American children. At the time, schools in Virginia were segregated by race. Until this donation, “The Fort” and “Seminary” communities did not have equal access to educational resources. After the community took education into their own hands, the one-room “Colored School Building at Seminary” opened as the first public schoolhouse for African American children in the area and remained until 1925.

“They (residents of “The Fort”) were mostly educated people, and they all went to school, though most of them went to school together in the little one-room schoolhouse...”

/ BARBARA ASHBY GORDON / 1994

**AFTER THE CLOSURE OF “THE FORT’S” FIRST SCHOOL IN 1925,** The Seminary School opened in 1927 after community efforts and support. Douglas Wood donated the land, and the community raised $1,000. “The Fort” also received $900 from the Rosenwald Fund and $4,000 of public funding to build The Seminary School’s new, three-room building.
A COMMUNITY AT “THE FORT”

Throughout the community’s existence, residents of “The Fort” were subject to discrimination and segregation within the broader Northern Virginia area. Residents were forced to build their own churches, and the original Seminary School was constructed after no local schools would accept African American children who lived at “The Fort.” Despite the discrimination, community leaders, including the Adams, McKnights, Caseys, and Belks, were able to facilitate a strong neighborhood bond amongst families within “The Fort.” The result was a strong, thriving, predominately African American community within the midst of a segregated Alexandria.

“I felt secure because of being loved. The neighbors loved me and the people took care of the children. When somebody worked at home, they watched out for the children … we were poor and we didn’t have much, but I felt secure and loved.”

/ SHIRLEY STEELE / 2008

Potential raised tactile map highlighting community structures

Large wayside (36” w x 24” h)
IN ADDITION TO THE McKNIGHTS, other families settled on the western side of the present-day Park. James Jackson purchased two large lots on what is now much of the western sector of Fort Ward Park, where his home and a community cemetery were located. His property occupied areas that today include part of the fort's restored Northwest bastion and glacis, the man-made earthen slope surrounding the fort, adding to the layered history of Fort Ward.

"I'll tell you about Fort Ward. They call it Fort Ward now, but it was "[The] Fort," [to us]!"
/ ELIZABETH DOUGLAS / 1992
SITE MARKERS

A series of low-profile graphics mark out key sites and locations throughout the built and natural landscape, many of which are no longer visible or are not otherwise interpreted. These locations help visitors appreciate the enormity of Fort Ward’s story and shine a light on the efforts of archaeologists and community members to record these features. The panels will also feature historic imagery. The site markers will also include a link to the mobile digital feature, which will provide additional information regarding the historic locations.

Ten such markers are currently budgeted.

**Potential Sites to Mark**

1. Changes in the Land
2. Craven Home
3. Fort’s Well
4. Schoolhouse Lane
5. Clara Adams’ Burial Site
6. Peters Home
7. Javins Home
8. School / Church / Residence Site
9. Shorts Home
10. The Homes at West Braddock Road

NOTE: Locations for all site markers are approximate and will be determined during installation.
SCHOOL / CHURCH / RESIDENCE SITE

THE SITE'S NAME honors the longevity and adaptability of the members of "The Fort" community. The community built a schoolhouse here around 1898. In 1932, the structure was converted into St. Cyprian's Episcopal Chapel. Once the church was no longer in use, the building was sold to the Claiborne family, who then converted it into a home and sold the building to Lee Thomas Young. Sgt. Young lived in this home with his family until the City of Alexandria purchased it in 1964.

This aerial photograph of the School/Church/Residence was taken in 1962, after the building had been renovated into a home and sold to Sgt. Young. Please visit explorefortward.com to learn more about the School/Church/Residence and the longevity of "The Fort" community.

Element 8

CHANGES IN THE LAND

THE BOUNDARY LINES around Fort Ward Park enclose a piece of land with a long and varied history. Archaeological excavations have uncovered Native American artifacts, providing a glimpse into the early years of the land's occupation. Before the Civil War, the land was divided into two plantations, and farmed by enslaved people. During the Civil War, the U.S. Army built Fort Ward to defend Washington, D.C. By the time the fort was constructed, the land itself had been reduced to rocky soil, unable to support farming. After the war, formerly enslaved African Americans established “The Fort,” a thriving community, on this land. As you explore the Park today, can you discover the remaining evidence of these earlier eras?

The excavation of Fort Ward’s Northwest Bastion, which was conducted by the City of Alexandria in 1961.

Please visit explorefortward.com in order to learn more about the excavations that occurred at Fort Ward Park.

CRAVEN HOME

THE CRAVEN FAMILY arrived at “The Fort” around 1910 to pursue employment opportunities during WWI. They owned one of the largest plots of land within the community. Of the homes that have since been excavated, the Craven/Hogan family home is one of only 5 surviving foundations to be uncovered. At this home site, archaeologists found pieces of pottery, fragments of Glefand’s Mayonnaise jars, and toothbrushes. What does this tell you about the daily lives of those who lived in “The Fort” community?

FORT’S WELL

DURING THE CIVIL WAR, soldiers stationed at Fort Ward relied on this well, as during a siege it would be their only source of fresh water. Residents of the post-Civil War “Fort” community used this well, and others, for their water, too. Before indoor plumbing and modern refrigerators became standardized, “The Fort” community relied on wells for water and to keep food cool. For the soldiers, access to this well was essential to survival. For the community, the wells also reflected their ingenuity and self-sufficiency. For both the soldiers and the community, the wells were symbols of endurance against outside opposition.

Image & caption to be determined.
Please visit explorefortward.com to learn more about the Fort’s Well and its significance to Civil War Soldiers and the community.

SCHOOLHOUSE LANE

SCHOOLHOUSE LANE functioned as a main entry point into the community. The small lane extended directly off West Braddock Road, and connected the community and the original Seminary School building. This site is an example of how the community changed the landscape of this area from a defensive fortification to a place where people lived, worked, played, and attended school. Today, although the road itself is now gone, large trees still loosely mark the outline of the original path to the school house.

Image & caption to be determined.
Please visit explorefortward.com in order to learn more about Schoolhouse Lane and the landscape of the community.
CLARA ADAMS’ BURIAL SITE

CLARA ADAMS was an integral figure in the founding of “The Fort” community and Oakland Baptist Church. In 1898 she sold a piece of her land to the Falls Church School Board to establish the first school within “The Fort” community. In 1943, Adams also donated land to the Oakland Baptist Church, to expand the local cemetery. Her home, located just south of her gravesite, remained in her family from the community’s founding until 1964, when the City of Alexandria purchased the property.

Clara Adams’ Burial Site can be visited for those who wish to pay their respects. Please visit explorefortward.com in order to learn more about Clara Adams, her burial site, and other cemeteries used by “The Fort.”

PETERS HOME

FROM ITS FOUNDING, members of “The Fort” community engaged with and worked in the broader Alexandria community. Male members of the Peters family — who lived near this site — worked as a janitor, a chauffeur, a general handyman, and at Fairfax Seminary. Women typically worked as laundresses or domestic servants. During both World Wars, members of the Peters family, and many others, joined the military or took jobs supporting the war efforts. This was especially true during World War II, when large numbers of African Americans took wartime jobs in an attempt to gain social, political, and economic standing during the era of segregation.

Arthur Peters, grandson of James M. Peters, taken during his service in World War II. Please visit explorefortward.com in order to learn more about the Peters family, their home, and “The Fort” community.
AFTER THE INITIAL RESIDENTS SETTLED AT “THE FORT,” a second wave of families bought property in the late nineteenth century. One of these families was the Javins, who arrived in the 1880s. By the 1920s, community members were using Samuel Javins’ property as a local burial site for their loved ones. In 1929, Javins deeded a portion of his land to the Oakland Baptist Church, establishing the Oakland Baptist Cemetery. The Javins, along with the Cravens and Garnett Ashby, sold their property in 1934 to George Garett and Robert Dye, white men interested in developing a residential community on Fort land.

THE SITE’S NAME honors the longevity and adaptability of the members of “The Fort” community. The community built a schoolhouse here around 1898. In 1932, the structure was converted into St. Cyprian’s Episcopal Chapel. Once the church was no longer in use, the building was sold to the Claiborne family, who then converted it into a home and sold the building to Lee Thomas Young. Sgt. Young lived in this home with his family until the City of Alexandria purchased it in 1964.

BURR SHORTS and his family were one of the first to purchase land at Fort Ward ca. 1870. Like the other families who joined them, they were searching for employment opportunities and a permanent place to build a home. The community continued to grow through the 1870s as more families began purchasing land in the area surrounding Fairfax Seminary and the abandoned Fort Ward. As the decades wore on, the land continued to be passed down, change hands, and be divided to accommodate more families. The families’ original ownership of the land allowed the community to continue through several generations.

Image & caption to be determined.

Please visit explorfoward.com to learn more about the Shorts’ family, their home, and “The Fort” community.

THE HOMES AT WEST BRADDOCK ROAD

“THE FORT” COMMUNITY contained a small cluster of homes near West Braddock Road. These homes, which included the Ashby family house and the School/Church/Residence building, served as a central point within the community, as members gathered at the nearby church, school building, and cemetery. The Craven/Hogan family home was the first to be built close enough to the road that it could be seen by a person traveling down West Braddock. These homes provided a glimpse into the lives of those who lived in “The Fort,” as they housed a variety of families and significant community gathering points.

A historic aerial view of Fort Ward, focusing on West Braddock Road (right) and the homes within “The Fort” that stood nearby.

Please visit explorfoward.com to learn more about the group of homes that stood along West Braddock Road and the broader community.
The client team determined following the last presentation that the City has the ability to use an existing mobile platform, and that resources should not be devoted to developing a stand alone mobile app. This direction led the design team to consider how best to present additional content to users via their smartphones/mobile devices.

Redmon Group prepared a document presenting initial wireframes and content layouts for the mobile web element. That document includes more detailed information related to the proposed design and functionality of the element. This page includes images that also appear in the accompanying document.

Note also that the mobile web site could also work in conjunction with other interpretive elements. The budget includes approximately 10 sites, based on the level of content depicted in this example. The final deliverable under this contract will include one working model, which will be found at www.explorefortward.com.

To view a working Mobile Prototype, click on any of the wireframe images to the right, or visit the following web address: https://xd.adobe.com/view/d082bd14-d01f-4233-7b36-8e725d35a34e-a6b3/?hints=off

Development of the Fort Ward brochure is tied closely to the interpretive elements selected for the site. We recommend the following elements be included:

**Site Tour**
Visitors will use the Brochure as part of a self-guided tour of the Fort Ward site. The Brochure follows the holistic, single story interpreting the site, directing visitors not only through the different and changing spaces of Fort Ward but also its different and changing eras. Visitors will be able to clearly identify major pathways, and the brochure will recommend a clear route for exploring the site.

**Tie-Ins to Static Interpretive Elements**
Locations featured in the brochure should connect to static interpretive elements—waysides, site features, and commemorative spaces. These highly recognizable features will help visitors find their way around the site and follow aspects of the story that most interest them; hopefully, returning for more exploration.

**Using Authentic Voices**
Orientation on the brochure will be supplemented with primary source history and imagery. Doing so reminds visitors of the people that inhabited this place, and facilitates closer connections to the story while exploring.
At left and below are drawings for elements of the orientation map to be used in the brochure and on the orientation kiosks. The intended look is a relatively loose, but detailed, watercolor style with a bird’s eye perspective.
VISITING THE PARK

Fort Ward Park includes an expansive 45-acre site, located just minutes from downtown Alexandria. The Park is accessible daily, 9:00 a.m. to sunset.

Museum open hours are:

**HOURS**
- Tuesday – Saturday: 10:00 a.m. – 5:00 p.m.
- Sunday: Noon – 5:00 p.m.
- Monday: Closed

**Closed:** New Year’s Day, Christmas Day, and Thanksgiving Day

Museum Phone Number: 703.746.6848

RESERVATIONS

For picnic area reservations, call the Department of Recreation, Parks and Cultural Activities at 703.746.5414.

The End of “The Fort”

As early as the 1950s, the City of Alexandria sought to purchase land from the owners and residents of “The Fort.” The owners strongly opposed. The City claimed they were unsanitary, unsafe, and forced off the land, but they also hold dear the memory of the community as a symbol of endurance and freedom.

The families who lived at “The Fort” created a proud, self-reliant community. “The Fort” was a center for social, cultural, and religious activities. It was a neighborhood of homes, schools, and churches. Despite facing social and legal inequalities, the residents of “The Fort” community thrived during the Civil War (1861–1865). They were a testament to the resilience of the human spirit.

Fort Ward Museum

Visiting Alexandria, VA 22304 and Historic Site

**BASTIONS OF FREEDOM**

AS PART OF THE DEFENSES OF WASHINGTON, Fort Ward protected the nation’s capital during the Civil War (1861–1865). After the war, a group of formerly enslaved African Americans bought land here and created lives—building homes, schools, and churches. Despite facing social and legal inequalities, the residents of “The Fort” community thrived for nearly a century. Their legacy reflects enduring ideas of freedom.

As you explore the area, consider the complex history of Fort Ward. What does this place mean to you?

Experience Fort Ward

This brochure provides information on significant sites throughout Fort Ward Park and will help acquaint you with features, people, and events that make this a special place. Please use the map to guide your exploration of the Museum and Park.

Please help preserve Fort Ward Historic Site by observing all Park rules.

THE HISTORY OF FORT WARD

The Defense of Washington
In May of 1861, Federal troops crossed the Potomac River and began building fortifications on the heights overlooking the Union capital. The construction rapidly increased after early Confederate victories at Manassas (Bull Run). By the end of the Civil War, 164 earthwork forts and batteries surrounded Washington, D.C. As the fifth largest fort in the formidable defense system, Fort Ward was considered to be a model of military design and engineering for the time period.

Commander James Harmon Ward
Fort Ward’s namesake, Commander James H. Ward, became the first Union naval officer killed after the outbreak of the Civil War. An authority on tactics and gunnery, Ward helped establish the U.S. Naval Academy. Due to his extensive qualifications, the newly constructed Fort Ward was named to recognize his contributions to the Union war effort.

The Beginning of “The Fort”
Following the Civil War, African American families began to purchase land at the abandoned Fort Ward. The first residents of “The Fort” and nearby “Seminary” community (located around the Virginia Theological Seminary and Episcopal High School) were probably a mixture of individuals already living in the area and migrants from other parts of Virginia, notably Fauquier County. The 1870 U.S. Census records four family names at Fort Ward: the Pages, the Shorts, the Perkins, and the McKnights. A decade later, the number of names grew to twenty. These families, many of which were connected by marriage and kinship, created a thriving neighborhood in the early 20th century by building permanent homes, establishing churches and schools, and acquiring and dividing land plots to expand the community.

Daily Life at “The Fort”
The families who lived at “The Fort” created a vibrant community. They forged close kinship ties and friendships with their neighbors, and established schools, churches, and stores within the community. “The Fort” is a proud, self-reliant community.

The End of “The Fort”
As early as the 1950s, the City of Alexandria sought to purchase land from the owners and residents of “The Fort” in order to restore the Civil War fort and establish Fort Ward Park. Some residents sold their properties and relocated. For those who refused to sell, the City condemned the properties claiming they were unsanitary, unsafe, or “substandard,” reasons which the owners strongly opposed. The City eventually prevailed. Some of the former residents and descendants of “The Fort” still remain bitter about being forced off the land, but they also hold dear the memory of the community as a symbol of endurance and freedom.

Restoring Fort Ward
In 1961, the City of Alexandria began archaeological fieldwork on Fort Ward which uncovered valuable information on the construction of the fort, and led to the authentic reconstruction of the fort’s Northwest bastion as a Civil War Centennial project. The fort, Museum and historic Park opened to the public on May 30, 1964. Since then, continued archaeological investigations and research have revealed more information on the site’s Civil War past, as well as the discovery of homestead foundations, grave sites and artifacts that have helped shed light on the lives of the residents of The Fort community.
**FORT WARD**

**MUSEUM AND HISTORIC SITE**

**ORIENTATION STATIONS**

Begin your visit by stopping at one of the two site Orientation Stations. Learn more about Fort Ward's story and familiarize yourself with the layout of the site. Restrooms are located near both Orientation Stations.

**MUSEUM EXHIBITS**

Discover the story of Fort Ward's significance to the Defenses of Washington, and experience exhibits, an orientation film and historical objects that interpret the Civil War soldiers and African American Fort Community residents who occupied this place.

**COMMUNITY GATEWAY**

As you pass through the gateway, prepare to learn about "The Fort;" a community of African American families who lived on this land for decades after the end of the Civil War.

**HISTORIC HOME FOOTPRINT**

Reimagine Fort Ward Park as "The Fort." Can you picture the homes, church buildings, and gardens of those who lived here?

**NORTHWEST BASTION**

Visit the reconstructed Northwest bastion, authentically reconstructed to its 1864 condition, and view the fort's original preserved earthwork walls. Can you imagine what the entire fort would have looked like during the Civil War?

**PICNIC SPACE**

Enjoy a break during your visit, or reserve an area for your next family or social gathering.

**COMMEMORATION SPACE**

Reflect for a moment on the sacrifice of the soldiers who served at the fort and the African American community members who built, and later lost, their homes here.

**OFFICERS' HUT**

Take a peek into the lives and homes of Civil War-era officers. Explore this reproduction quarters, in which military officers would have lived and overseen their troops.

**HISTORIC WAYSIDES**

As you explore the Park, learn about the people, structures, and events of Fort Ward through interpretive panels. Take a moment to stop, read, and discover!

**HISTORIC SITE MARKERS**

Can you find all of the historic site markers? As you find them, visit explorefortward.com for extra information!
As part of this Interpretive Plan, we have developed a series of Facilitated Dialogue Interactives — an example of an Audience Centered Experience — using the existing Oral History interviews.

The interactive will consist of a series of “scripts,” from which two visitors will read their corresponding lines, and “act out” a scene relevant to the history they learned throughout the rest of the site. In this case, the scripts will be attached to a portable stand, allowing the interactive to be placed in different locations within the museum, or be taken to schools to use during educational programming.

A Facilitated Dialogue interactive allows visitors to place themselves in the position of the historical figures highlighted in the exhibit, making their connection to the material more personal. Within these facilitated dialogues, the scripted scenes are directly based on memories recounted within oral history interviews — in some cases, the lines are even direct quotes.

By including these personal memories within the facilitated dialogues, rather than focusing on “historically significant” events, we are allowing visitors to connect with families who lived at “The Fort,” closing the gap between real, relatable families and distant historical figures.

These facilitated dialogues will not only prompt visitors to think about and remember the material they learned from the site, but also consider what makes their own families similar to those that lived within “The Fort” Community.
RELIGION was an important aspect of daily life for members of “The Fort” community, and St. Cyprian’s Chapel and the Oakland Baptist Cemetery served as central locations for community gatherings throughout the year. Elizabeth Douglas, who lived in the community as a child, recalls attending Christmas events at St. Cyprian’s each year. Place yourself in Elizabeth’s shoes, and recreate the scene before Christmas—one of you will play Elizabeth and the other her mother. Can you recall a similar exchange with your own family?

THE CHAPEL AT CHRISTMAS

ELIZABETH DOUGLAS / SCENARIO NO. 1

You read the part of Elizabeth Douglas (in bold).

YOU / ELIZABETH BEGIN:
“Mama, are we having Christmas at the chapel this year?”

MRS. DOUGLAS:
“Have you finished your homework and all of your chores?”

YOU / ELIZABETH:
“Yes, I have! Please, can we go? They’re having a little Christmas tree and presents and everything.”

MRS. DOUGLAS:
“Well, as long as you take your brothers and sister with you. Now, you all can go to the Chapel.”

YOU / ELIZABETH:
“Thanks, Mama! Merry Christmas!”

MRS. DOUGLAS / SCENARIO NO. 1

You read the part of Mrs. Douglas (in bold).

ELIZABETH BEGINS:
 “Mama, are we having Christmas at the chapel this year?”

YOU / MRS. DOUGLAS:
“Have you finished your homework and all of your chores?”

ELIZABETH:
“Yes, I have! Please, can we go? They’re having a little Christmas tree and presents and everything.”

YOU / MRS. DOUGLAS:
“Well, as long as you take your brothers and sister with you. Now, you all can go to the Chapel.”

ELIZABETH:
“Thanks, Mama! Merry Christmas!”

As the community increased in numbers, land was traded and divided in order to accommodate more families. At the time of Clara Adams’ death, Sergeant Lee Thomas Young and his family owned the property on which her husband, Robert Adams, was buried. A relative of Mrs. Adams called Sgt. Young to ask his permission to bury Clara on his property, with her husband. Although they were not related, Clara Adams was so well known within the community, Lee Young and many other residents affectionately referred to her as “Aunt Clara.” Place yourself in the shoes of Sgt. Young, and reenact the phone call—one of you will play Sgt. Young, while the other will play Mrs. Adams relative. What would you have done?

MRS. ADAMS' BURIAL

You read the part of Sgt. Young (in bold).

YOU / SGT. YOUNG BEGINS:

“Hello?”

RELATIVE:

“You read the part of a relative (in bold).

SGT. YOUNG BEGINS:

“Hello”

YOU / RELATIVE:

“Hello, Sergeant. Young? I have some terrible news for you, Clara Adams has passed away.”

YOU / SGT. YOUNG:

“Oh my, Aunt Clara? That’s horrible.”

RELATIVE:

“I’m sorry to tell you the news over the phone, but we have an important question for you. Her husband is buried on your property. Are you willing to let us bury her there, so they can be together?”

YOU / SGT. YOUNG:

“Of course, Aunt Clara was a good lady, she taught me a lot. I’ll do anything I can to help.”

RELATIVE:

“Thank you, sir, we appreciate your kindness.”

THE McKNIGHT’S FAMILY TRAITS

THE ADAMS-McKNIGHT FAMILY was one of the most prominent throughout “The Fort’s” history. One of the first families to build a home on the land, they contributed to the founding of the Oakland Baptist Church, donated land to build schools, and helped establish local cemeteries. Despite their historical significance, they were also a family with similar physical characteristics, such as the McKnight family’s skinny legs. Take a moment to step into the shoes of Charles McKnight as a boy and his great-aunt Clara Adams as they discuss their family’s traits. What are some things you have in common with your family members?

YOU read the part of Clara Adams (in bold).

YOU / CLARA BEGIN:
“Charles, dear, what’s wrong?”

CHARLES McKNIGHT:
“I wish my legs weren’t so skinny!”

YOU / CLARA, LAUGHING:
“Oh Charles, they always teased me for having skinny legs, too!”

CHARLES:
“You have them too, Aunt Clara?”

YOU / CLARA:
“You have them too, Aunt Clara?”

CHARLES, SEEING HAPPIER:
“Well, I guess I’m glad I’m not a girl so I can hide them with my pants!”
