Honorable Mayor and
Members of City Council
Alexandria, Virginia

Gentlemen:

By direction of the Charter of the City of Alexandria, Virginia, this Annual Report has been prepared and submitted for information and has been printed at your request.

I wish to express my appreciation to you for the consideration extended to this office and to acknowledge the support of the other officials of the City, the Department Heads and their employees.

Sincerely,
E. G. Heatwole
E. G. Heatwole

LERROY S. BENDHEIM
MAYOR

November 23, 1956

To the Citizens of Alexandria, Virginia

My dear Fellow Citizens:

The attached annual report of the operations of our municipality should be a source of justifiable pride to all of us residing in the City of Alexandria. I can say to the people of the City that your City Council has been ever conscious of the necessity of maintaining adequate and efficient City services at the lowest possible cost to the taxpayer.

The attached report clearly demonstrates that we have a municipality efficiently operated, modern in its consistency to a true Council-Manager form of government, and progressive in its governmental policies and philosophy. I congratulate the executive officer of the City, his department heads, and all of our many loyal employees upon the accomplishments and achievements exemplified in this very splendid annual report.

Sincerely yours,

Leroy S. Bendheim
Leroy S. Bendheim
Mayor

ACCOMPLISHMENTS

FOR
1955

1956

THE CITY COUNCIL PASSED A BOND ISSUE RESOLUTION AND ORDINANCE DURING THE YEAR IN THE AMOUNT OF \$5,316,000

THE SCHOOL PORTION WAS \$1,571,000

AMOUNT SOLD ON THIS ISSUE ON JANUARY 25, 1956, \$2,300,000

ECONOMIC BASE STUDY AND LAND USE PLAN SURVEY COMPLETED

CAPITAL IMPROVEMENTS

Completion of \$800,000 Incinerator

Approval of plans for remodeling and enlarging city jail at cost of \$400,000

Restoration of Ramsey House, \$24,000

Authorization for construction of Seminary Road Fire House, \$148,267

Storm and sanitary sewers construction, \$782,000

Street rebuilding and resurfacing, \$536,000

Park land acquisition and improvements, \$110,000

PUBLIC REPORTING AND PUBLIC RELATIONS

The City presented its departments and activities at a Municipal Exhibition-Demonstration, Sept. 1955

Special reports and news articles prepared for all news media

Trash and refuse procedures pamphlet placed in every dwelling unit

Municipal operations explained on local civic club bi-weekly radio program

City government participated in Chamber of Commerce Golden Jubilee with dedicatory ceremonies at four sites

SUPPORT OF LOCAL PROJECTS

Aided Alexandria Tourist Council in printing of tourist booklet

Worked jointly with Chamber of Commerce in promoting development of waterfront and harbor

Requested state legislation for action on establishing a parking authority

MAJOR ORDINANCES ADOPTED DURING THE YEAR

Creation of Personnel Department

Reconstitution of Traffic and Parking Board

Reconstitution of Board of Health

Control of street trees

Provision for microfilming of City Records

ADMINISTRATIVE ACTIVITIES

Centralization of city insurance

Commencement of annual assessment program

Acceptance of retirement and pension plan, group life insurance plan and

allowance for payroll deductions for group hospitalization

CHARTER CHANGES

FOR THE INFORMATION AND INSTRUCTION OF THE CITIZENS OF ALEXANDRIA THE FOLLOWING MAJOR CHANGES IN THE CHARTER OF THE CITY OF ALEXANDRIA ARE BEING STATED:

1. The Mayor shall be elected separately from the six Council Members-at-large. A candidate for Mayor shall file his petition specifically for this office. In the event no candidate shall file a petition for the office of Mayor, the ballot shall show no candidate for that office and the member of council receiving the largest popular vote shall be Mayor of the City.
2. The Vice Mayor shall be elected by a majority vote of the Mayor and the six Councilmen at Large.
3. Every ordinance after passage shall be given a serial number and shall be recorded by the Clerk in a properly indexed book kept for that purpose. The Council may have the Ordinance, under the direction of the City Attorney, codified, printed and distributed as it chooses. Changes of section numbers, titles, chapters, articles and correction of printers' errors or other unmistakable errors may be accomplished without further reference. Council can incorporate in its records by reference.
4. The City Manager is directed to prepare and submit to Council a program of capital improvement projects and a budget for such items, covering such a term of years as Council may designate.
5. The City Manager is given the authority to appoint a Real Estate Assessor. An annual assessment and equalization of assessments will be conducted by the administrative official through the Real Estate Assessor; and all real estate shall be assessed at the fair market value as of January 1 of each year by such Assessor.
6. The City Trial Board has been eliminated and all employees in the city service appointed by the City Manager are subject to administrative procedures established by the City Manager.

PROCEDURAL CHANGES

Your State income tax for the income year 1955 must be paid in full by December 5, 1956. In order to help finance badly needed State capital outlays without increasing taxes for the purpose, the General Assembly, at its regular session of 1956, changed the date for the payment of individual and fiduciary income taxes for income years after the income year 1955. Your State income tax for the income year 1956 will be payable at the time you file your return between January 1, 1957 and May 1, 1957; your State income tax for the income year 1957 will be payable at the time you file your return between January 1, 1958 and May 1, 1958, and so on for succeeding years. If one's tax is more than \$50, payment may be made in two installments; in such case, the taxpayer must pay \$50 or one-half of the tax, whichever is the greater, when he files his return, and he may pay the balance, with interest, on or before October 1. Returns must be filed with the commissioner of the revenue of your county or city, as in the past, and the tax must be paid to the treasurer of your county or city. Your cooperation in making arrangements to file and pay on time is earnestly requested for the public good.

ELECTED FISCAL OFFICERS

CITY TREASURER

This official collects all State taxes and licenses, and serves as Custodian of City Funds.

CITY COLLECTOR

This official collects all City taxes and licenses, and all other City revenues.

COMMISSIONER OF REVENUE

This official assesses all State and City taxes and licenses.

SERVICE TO THE CITY

SCHOOLS

The Alexandria Public Schools are controlled by a local School Board composed of seven members, each of whom is appointed by City Council. The Alexandria School Board operates under the laws of the State. It appoints a Superintendent to administer the policies of the Board.

There were seventeen Public Schools with a total enrollment of 11,089 during 1955-1956. The enrollment on the third day of the 1956-1957 school year showed that there was an increase of 1,204 students over the previous year.

The public schools employ 580 teachers and approximately 320 persons in clerical and maintenance services.

The Alexandria Public School System is the only school division in the metropolitan area which is operating on a full day basis. The other school divisions are compelled to operate on half day session for many classes.

The Adult Night School,* which is divided into apprentice training, avocational pursuits, and sessions for adults wishing to finish high school, has more than 1,000 students enrolled each year. The local curriculum is more diversified than any other night school in the State of Virginia.

Summer School sessions are offered each year.

Francis Hammond High School was completed at a cost of \$2,211,385.00 and was constructed at a cost of \$12.50 a square foot. The average is over \$13.00 a square foot.

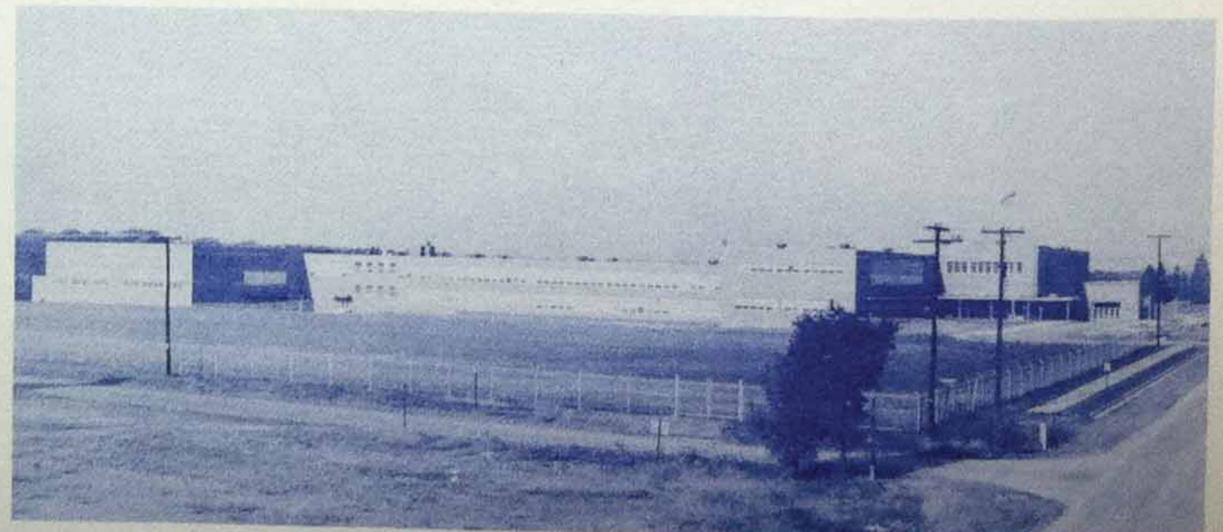

The annual cost to educate one pupil is \$222.69. In order to receive this sum from a real estate tax payment, the sales price on the house would have to be \$21,000.

The following schools have been constructed in the past five years:

Cora Kelly
Robert E. Lee
Patrick Henry
Minnie Howard
Francis Hammond

Additions have been made to:

Maury
George Mason
MacArthur
Mt. Vernon

FRANCIS C. HAMMOND HIGH SCHOOL

SERVICE TO THE CITY

The function of the POLICE DEPARTMENT is traditionally the protection of life and property and the prevention of crime. This Department is divided into 4 divisions: Patrol, Traffic, Detective and Records and Identification, with a total of 110 police officers, 10 civilian employees and 21 school crossing guards. With the increase in our population to nearly 85,000, the work load of the Police Department has increased likewise.

Although the adoption of and changeover to the five day work week was the most noteworthy accomplishment of the past year there were other conditions existing which affected the operation of the Police Department in large measure. The difficulty of securing and maintaining police officers can be said to head the list of problems.

Stolen Property Recovered	\$180,897.00
Parking Meter Revenue	78,409.00
Taxi Cab Licenses	1,981.00
City and State Fines	138,858.00

POLICE

SERVICE TO THE CITY

FIRE

The growth in population, development of both the new area and the older section of the City has caused an over-all increase in Fire Department activities. It is expected that the continued population increase and development of the new territory will require more services from the Fire Department.

Inauguration of five day week for firemen, authorized by City Council on June 28, 1955, has not been possible, due to lack of qualified persons to fill jobs available. Until personnel are hired, the five day week plan cannot be adopted.

MAJOR ACCOMPLISHMENTS

Construction of No. 6 Station on Seminary Road and construction of a fire alarm system is in progress. No. 6 Station will house apparatus and personnel to serve a portion of the western part of the City. The fire alarm system includes an addition to No. 5 Station and will contain the headquarters equipment for the system. Street fire alarm boxes will be strategically located in the high value areas of the City for alarm reporting.

FIRE LOSS

From September 1955 thru June 1956
\$75,321.55

Reported fire losses in *high value areas* census tracts 7, 13, 17, 18, 19, 20 total \$57,674.90, or approximately 75% of the total loss for the period indicated above.

FIRE PREVENTION INSPECTIONS

From January 1956 thru June 1956

Inspections 1,240

Re-inspections 194

Approximately 80% of the total inspections have been made in the high value areas of the City. This program is designed to minimize the fire loss in these areas and while a concerted effort is being made to carry out inspections, we are unable to meet the requirements of the fire prevention ordinance due to the lack of sufficient personnel to perform the work.

In conformity with the National Board of Fire Underwriters' recommendation, two stations now answer each alarm.

Through the development of tactical procedures, commencing of fire alarm system installation and construction of new Number 6 Firehouse the penalty points, assessed by the National Board of Fire Underwriters, dropped from 2,006 to 1,685.

SERVICE TO THE CITY

TRAFFIC

The Traffic and Parking Board is composed of seven lay citizens appointed by the City Council for a term of two years. The ordinance adopted by the City Council designates the City Manager or any member of his staff as he may select to advise the Board in their consideration of certain problems. The same ordinance also created the position of the Director of Traffic and defines the duties of that office. The Traffic and Parking Board held sixteen regular and eight special meetings for the year 1955-1956.

OUTSTANDING ACCOMPLISHMENTS OF THE TRAFFIC DEPARTMENT

1. The adoption and rapid replacement of the "yellow" STOP sign with the "red" STOP sign with increased reflectorization for night observance.
2. The installation of a "flashing speed limit" sign in the immediate vicinity of schools.
3. The adoption of the "Yield Right of Way" sign at intersections.
4. The use of the electric speed timer to determine accurately the speed of vehicles on a given street.
5. The first full complete installation of a "Walk — Don't Walk" system which can be controlled by the pedestrian.
6. The first installation of the "12" red signal lens to aid in the reduction of signal violations.
7. A comprehensive analysis of traffic problems in a given area or at a particular location.
8. The reflectorization of street name signs.

SERVICE TO THE CITY

INSPECTIONS

DEPARTMENT OF CONSTRUCTION AND INSPECTION

Research has been conducted and reports prepared in conjunction with legislation which has been adopted changing permit fees and builders license fees, which resulted in a more equitable tax burden on local contractors and the collection of such revenue on a more current basis.

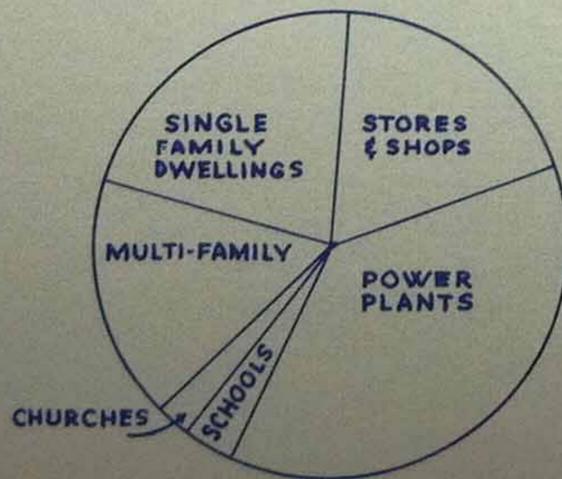

The expansion and development of regular periodic physical testing of materials for the purpose of improving the quality of such materials that enters into construction of buildings has been initiated.

During the past year arrangements were made for in-service training of personnel in the Department of Civil Engineering at the George Washington University in Washington, D. C. The particular courses pursued were in advanced work in the field of reinforced concrete design and construction. Similar programs are being arranged for the coming scholastic year which will involve the pursuit of studies in the recent development in the uses of steel and glued laminated wood. This particular activity is being carried out at no cost to the city government nor to the employees.

DISTRIBUTION OF BUILDING CONSTRUCTION EXPENDITURES 1955-1956

SERVICE TO THE CITY

PLUMBING INSPECTION DEPARTMENT

The fiscal year of 1955-56 was one of much progress in this department. During this period an ordinance, making frost-proof toilet installations unlawful became effective. As a result of this ordinance, this department began a survey of the city to determine the locations of these health menaces, and a drive to eliminate them. This drive during the period of July 1, 1955 to June 30, 1956 resulted in the removal of 500 of these toilets and the installation of a like number of modern bathrooms and kitchens, and greatly improved living conditions in these as well as more valuable homes.

On July 1, 1955 this department began the inspection of all sewer lateral connections to the public sewers. This means that now this office does the complete job of plumbing inspections in all premises.

Under this method all sewers are constructed with extra heavy cast iron pipe, which means a permanent installation, and which should eliminate many of the sewer problems with which the city has been confronted in the past. 679 such installations were inspected, approved and recorded during the past year.

The Department has installed a card system of filing sewer records, which shows the exact location of the private sewer tap to the public sewers. This record will be valuable in the future when, for any reason, it may become necessary to know the exact location of a sewer.

In-service training was used by the Department to the fullest extent possible.

SERVICE TO THE CITY

PUBLIC WORKS

The Department of Public Works is charged with the responsibility for the contract construction, maintenance and repair of all city streets, curb and gutter, sanitary and storm sewers. It is also responsible for the collection and disposal of refuse, the cleaning of streets, operation of a city garage and the maintenance of public buildings. The Department is also responsible for the acquisition of land for city purposes, the maintenance of records pertaining to public improvements, the issuance of permits, such as sewer connection, street opening, tree planting and removal, and the supervision of the installation of public improvements in all new subdivisions.

In addition to the above, the Department of Public Works operates its own engineering division, which includes engineering surveys, design and drafting of many public improvements. A total of 22,000 man hours was utilized for the above in 1955-1956.

For the past two years this Department has gradually been changing from doing public improvement work by city forces to performing work by contract. As of July 1, 1955, the last two remaining types of construction, sanitary sewer and storm drain, which work was formerly done by city forces, was changed to contract work.

HIGHLIGHTS

Following is a report of the major items handled by the Sanitation and Service Division and the Highway Division.

SANITATION AND SERVICE DIVISION

The major addition of this Division was the completion of the new city incinerator in June, 1956. The operation of this plant provides for the most sanitary method of disposing of refuse and, in addition, it reduces the volume of ash to one-tenth of the original volume. On July 1, 1955, the city made a change in the method of refuse collection from three separate and costly collections to one economical once per week collection.

SANITATION SECTION	1954-55	1955-56	SANITARY SEWER SECTION (CONSTRUCTION)	1954-55	1955-56
Tons refuse collected by city.....	16,800	17,500	New sewer, city	36,330	9,418
STREET CLEANING SECTION			New sewer, developers	23,908	35,124
Machine swept, curb miles.....	7,210	9,810	Sewer permits issued	213	171
Flushed, curb miles	2,054	2,719	SANITARY SEWER SECTION (MAINTENANCE)		
Hand swept, curb miles	3,232	4,632	Miles of sewers cleaned.....	26	37
			Catch basins cleaned	29,272	33,780
			Sewer stoppages investigated	165	142

REFUSE COLLECTION

MAJOR ITEMS HANDLED BY THE HIGHWAY DIVISION CONSTRUCTION, STREETS AND STORM DRAINS

New streets, city and developers, miles.....	2.75	4.8
Curb and gutter, city, miles.....	4.11	1.57
Curb and gutter, developers, miles.....	2.40	7.50
Sidewalk, city, miles	2.24	1.39
Sidewalk, developers, miles	2.60	6.10
Concrete pipe drain, city, miles.....	1.45	0.14
Concrete pipe, developers, miles.....	4.52	3.72
STREET MAINTENANCE		
Surface treatment, miles	9.70	16.30
Plant mix resurfacing, miles	2.74	3.70
STREET OPENINGS		
Street opening permits issued.....	1,626	1,351

Among the many functions within the Highway Division are maintenance of streets, bridges, curb and gutter, sidewalks, trees, and the cutting of weeds and grass, snow removal and ice control. Also included under this division is the repair of all utility cuts made in the streets.

HEALTH

When you accept delivery of a quart of milk; when you turn on the water faucet; when your children are not threatened with diphtheria and typhoid fever; when you eat your wholesome dinner at an attractive restaurant — do you realize that all of these are indirect services of your Health Department? But it is true! These are results of the direct services shown on the steps of the Health Department.

All through your life — from the issuing of the birth certificate — your Health Department serves you. All of these services are part of a team activity — physician, nurses, sanitarians, laboratory technicians, clerks, maintenance personnel — designed to bring total health care to you, your family and your community.

SERVICE TO THE CITY

Our first responsibility, as we see it, is to provide financial assistance and case service to a needy adult, a family or a child who has been visited by human disasters, with the hope that each may regain and maintain a place in community life which is as nearly normal as possible.

The work with children is an investment in the future. With the aged, ill or handicapped it is the relieving of economic need and human suffering; with those who have serious personal problems it means helping to reestablish them as productive members of society.

There are three divisions within the Welfare Department:

THE FAMILY DIVISION determines if prescribed eligibility requirements are met and reviews from time to time to establish if circumstances have changed in any way so that proper adjustments in grant may be made. Withdrawal of state funds from this group in February, 1955, has hampered the effectiveness of service to this group, since even the basic financial needs are not being met.

THE CHILD WELFARE DIVISION is concerned with children of all ages. In order to place children, studies must be made of the homes in which the children are to make their home.

MEDICAL DIVISION plans with those persons who are not receiving any other type of assistance from the agency, but who are found to be unable to meet the cost of hospitalization, physician's care, when bedridden or cost of medications.

The Department of Recreation has developed several new areas during the past year. Improvements were made at Johnson Memorial Pool, George Mason Playground and Potomac View Playground. Work commenced on the development of the Armory lot for use as a small neighborhood park. Additional land was purchased at Fort Ward Park and Fort Williams Park.

CTW

TAX FACTS

Here are some of the taxes applicable in the City of Alexandria. This listing is not complete nor are all the provisions within the license tax ordinance included below. These taxes are listed merely as an indication of the scope and type of the licenses authorized by the City Council and administered by Officials of the City.

REAL ESTATE TAX is \$2.75 per \$100 of assessed value. The assessed value is that value to which the tax rate is applied to determine the levy on each parcel. Currently 42½ % of the appraised value is applied to determine the assessed value. In Alexandria the appraised value of real estate for tax purposes averages 80% to 90% of the selling price. Therefore, the formula for determining real estate taxes in Alexandria is the appraised value times 42½ % which sum is the tax bill.

PERSONAL PROPERTY TAX is \$3.00 per \$100 of assessed valuation. Privilege would be given the property owner to take 10% of the assessed value of the home times the rate instead of listing his personal belongings. Other provisions are made for the person who is renting.

CONTRACTORS, \$50.00 annual license tax.

ANNUAL REGULATORY LICENSE tax, \$25.00.

NON-REGULATORY, professional occupations and businesses, \$.50 per \$100 of gross receipts in excess of \$500.

PERSONAL SERVICES, business services and occupations, repair services and occupations, retail merchants, and restaurants, \$.29 per \$100 of the gross receipts in excess of \$8,620.

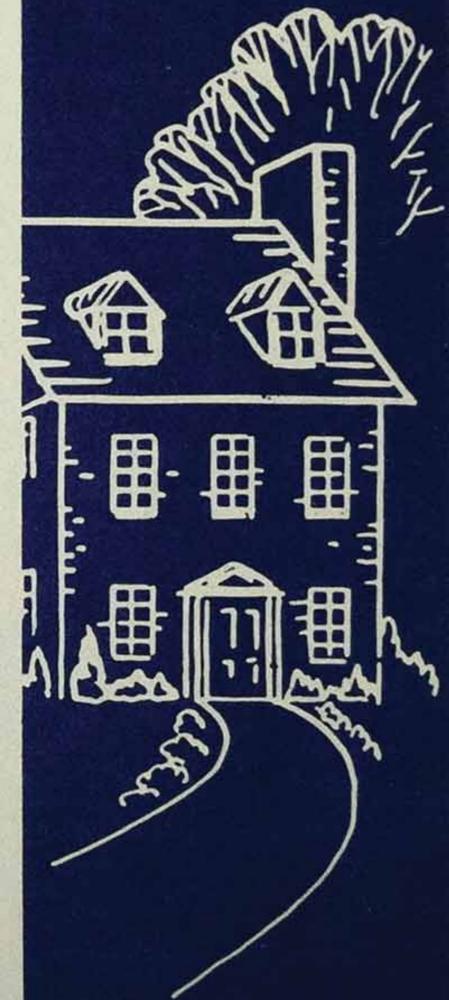

WHOLESALE MERCHANTS, \$.29 per \$100 of the gross receipts in excess of \$11,904.

AMUSEMENTS AND ENTERTAINMENT, \$.59 per \$100 of gross receipts in excess of \$4,238.

SOLICITING AGENTS, annual license tax of \$1.03 per \$100 of the gross receipts of business done within the City.

MANUFACTURING, MILLS AND PROCESSES, annual license tax \$25.00.

AUTOMOBILE LICENSE TAGS, \$7.00 per year.

STAFF AND MANAGEMENT

ACTIVITIES AND ACCOMPLISHMENTS OF THE CITY MANAGER'S STAFF AND MANAGEMENT UNITS

CIVIL DEFENSE

Prepared and distributed disaster plan
Conducted course in radiological monitoring
Distributed 15,000 air raid instruction cards

FINANCE DEPARTMENT

Tax Inspection Division

240 audits completed
\$76,323.81 collected in rental license tax
\$20,916.89 collected on transient lodging tax

Weight and Measures Division

1,978 weighing and measuring devices tested
5,425 prepackaged foods and fuel deliveries were check-weighed for correct weight and processing (this Division enforces State laws)

Purchasing Division

6,515 purchase orders processed
2,123 requisitions received
\$2,367.30 gained through cash discounts
Tabulates all bids, and informs bidders of results

Accounting Division

Administers quarterly allotments
Exercises budget control by pre-audits
Compiles initial budget requests

Machine Tab

Prepares tax rolls and bills
Prepares payroll and auto license bills

PERSONNEL DEPARTMENT

691 employees on municipal payroll at end of year
1,209 applications were received
39 merit promotions made
Responsible for City-Wide Safety Committee
124 accidents handled; 83 being no loss of time
Conducted employees' attitude survey
Aided Jaycee Municipal Awards program
Coordinated training courses for municipal employees
Administered payroll savings and group hospitalization plans
Maintains personnel file for each municipal employee

PLANNING DEPARTMENT

Completed economic base study and started land use study
Initiated study of minimum housing standards
Cooperated with organizations in port study
Served as technical advisor to Board of Zoning Appeals and Planning Commission

REAL ESTATE ASSESSOR

Supervised continuous real property evaluation and assessment
Aided in preparation of complete mapping for Western Section
\$129,105,949 real estate assessed value, January 1, 1956
\$124,611,467 real estate assessed value, January 1, 1955
\$4,493,982 is the increase for the year

GENERAL ADMINISTRATION

140 major complaints handled
Served as Chairman for City-Wide Safety Committee
Prepared special reports and administrative regulations dealing with such municipal activities as Standard Reporting Procedure, Citizens Advisory Survey Study
Completed data functional survey on City Council and City Manager's Office for fiscal survey
Coordinated Municipal Exposition Demonstration
Coordinated Municipal Activities in Golden Jubilee
Aided in compilation of calendar year report
Served as liaison in study of insurance centralization

CENSUS TRACTS

WHAT

Realizing that there is a definite indication that information on a small area basis is essential for the analysis of modern problems of larger cities for the efficient administration of the municipal, welfare and commercial enterprises, the total corporate area of the City of Alexandria has been divided into permanently established geographic tracts which can serve as comparative information divisions.

WHY

After a careful study of the City, the tracts were laid out with a view to approximate uniformity, population and size, present and future, and each was designed to include an area fairly homogenous with respect to race, economic status, living conditions and neighborhood interests.

WHERE

These tracts have been approved by the U. S. Bureau of Census, which means that information obtained on these tracts today will be updated by the 1960 Federal Census. All operating departments of the Municipal Government whose activities reflect trends and growth, report their monthly activities to the Planning Department through the City Manager.

A degree of flexibility in tract boundaries has been provided to meet the demands of our rapidly expanding community areas. These tracts provide a common base for all local statistics. By careful inventory, the Planning Commission and the City Council will know which areas are deficient in parks, recreational facilities; which areas will need schools and other capital improvements. In certain tracts, substandard conditions exist. Careful study and attention will be given to these tracts so as to prevent further blight.

HOW DOES PROCEDURE HELP

In analyzing the tracts, the City can best relate the problem to its cause by defining it in terms of a district area and the conditions influencing that area.
