**VALET PARKING**

Zoning Ordinance Section 11-513 (N)

**Qualify for Administrative Review?**

Will the proposed valet parking be located in the King Street Overlay zone? [X] Yes [ ] No

If yes, the business qualifies for administrative review. If no, speak to P&Z staff about the full SUP process.

**WORKSHEET – Answer each question. Attach a separate sheet of paper if necessary.**

**VALET PARKING PLAN**

[X] Please provide a copy of the plan with your application. [See email]

A detailed plan must be submitted showing and explaining all components of the valet parking, including at least the following:

- (a) The location of the drop off area as well as the location for the parked vehicles to be stored;
- (b) The proposed days and hours of operation of the valet parking plan;
- (c) The number of spaces available at the vehicle storage site, which must be of sufficient capacity for the use or uses from which vehicles will be valeted;
- (d) Adequate assurance that the owner and operator of the vehicle storage site is agreeable to the proposed valet plan;
- (e) The size and design of the drop off site and identification of any on street parking spaces that will be lost during the period that the valet parking plan is in effect, such spaces to be kept to a minimum;
- (f) Demonstration that the location of the drop off site will not interfere with traffic, remaining parking, bus stops, or transit passengers or pedestrians;
- (g) The proposed graphics for the drop off site, including signage and uniformed staff, with sufficient visibility but designed to be compatible with the streetscape as determined by the director;
- (h) The proposed number of attendants, which must be sufficient to adequately staff the operation; and
- (i) If the proposed valet plan includes more than one business, the identity of the party or entity responsible for compliance with the approved valet parking plan.

**LOCATION OF STORED VEHICLES**

[X] Vehicles may not be parked or temporarily stored by an attendant on streets or sidewalks.

Where will the parked vehicles be stored? THIS IS A GARAGE WITH 169 STRIPED SPACE FOR TENANTS

**SHARED PARKING PROGRAM**

[X] No structures are permitted in conjunction with a valet parking program, unless associated with a shared parking program among several businesses, and only after the design is reviewed for comment by the Old and Historic Alexandria District Board of Architectural Review. Please review Section 11-513 (N) of the Zoning Ordinance for more detail.

Are any structures proposed as part of the valet parking program? N/A

[X] If so, please include a detailed description and plan for the structure with your application. Attach a separate sheet, if necessary.

Is the program part of a shared parking program with other businesses? N/A

[X] If so, please describe the program and identify the other businesses to be included. Attach a separate sheet.

Subject: 1701 Duke - Attendant Assist Parking
Attachments: 1701 Duke St Garage Map sans cars.pdf

Madeleine,

We will mail you the application and the $325 check for 170 Duke Street. Our position, from zoning counsel, remains that because 1701 Duke Street is in the KST overlay that the garage is exempt from the application requirement. We are also still of the opinion that how 1701 Duke Street is operated, as are most garages in Alexandria, is not as a traditional ‘valet’ garage that the market thinks of and what Alexandria’s application is focused on. As discussed, we are submitting the application but request that you vet the application and our position with others in your group.

None of the office building garage operators we have reached out to have heard of this requirement in office building garages. Other than collecting parking fees, the primary role of the parking attendant at 1701 Duke Street is to manage the garage by sending arriving parkers to open areas of the garage and, as needed, taking the keys of a few parkers a day to manage those cars so that that any blocked in parkers can exit.

There is no defined key drop off or storage location in the garage. Either action can happen anywhere in the garage because the way the garage is operated is not as a traditional valet system. There is not a set place where some customers not parked in striped spaces give their keys to the attendant and there is no set place where the attendant will move a car to. The attendant takes the keys of 7-10 parkers each day, moves a few cars each day and is not taking any spaces otherwise available to monthly customers. The attendant’s role is to facilitate additional parking for our office monthly customers and their visitors for this functionally tenant and tenant guest only garage.

The arriving drivers park their own cars (and take their keys with them) in striped spaces and other open areas until there are no available areas to park without blocking a car that was self-parked earlier. The parking attendants pay close attention to the number of cars arriving and they know when additional cars arriving will exceed that capacity. Once the number of cars in the garage gets to the point that any additional cars parked would block in an existing parked car, the next arriving parker typically parks their own car and then leaves the keys with the attendant.

This allows the attendant to move the car if the owner of the car that has been blocked in wants to leave. The attendant will move the blocking car out the way of the departing car and then move the blocking car into the striped space of the departing car. There are also times where the arriving parker just leaves their keys with the attendant at the first level parking booth and the attendant will park the car assigned to daily/guest parkers on the P1 level.

Christian

Christian,
Thank you for sending this in via email for a preliminary review, however we will still need a formal version of this and $325 to process the application. The site plan and garage layout needs to show the area where valeted cars are stored as well as where the key hand-off takes place. Once this information is received we can begin our analysis and review of the request.

We look forward to receiving your application.

Kind regards,

Madeleine

Subject: 1701 Duke - Valet Parking

Hi Madeleine,

Please note the attached Valet Parking application for 1701 Duke. I have not spoken to Duncan Blair directly, but in a December email he said that 1701 Duke Street is not required to have a valet parking Administrative SUP. As I noted in our call, his feedback was that the KST overrides the OCH Regulations and by extension that parking garages in the KST are not required to have these valet permits.

Aside from that position, practically speaking the questions in the application point to what we typically view as Valet Parking, namely curbside parking in front of restaurants, malls, etc, versus the inside of a private parking garage. What we have at 1701 Duke is functionally a tenant-only garage that also accepts some visitors of our tenants. On busy days when the striped spaces fill up for a portion of the day, the attendant will take the keys of 1-10 cars to stack park those cars. There is no additional parking charge paid by the parkers beyond their monthly contract or daily fee cost.

As we discussed, in the event that it is determined that a permit is not required for 1701 Duke, we will retract our application.

Valet Parking Plan – most of the answers below also in Administrative SUP:
   a. Drop off and storage could be anywhere in the garage
   b. M-F 7AM-7PM
   c. 169 striped spaces
d. We are the owner and we also engage the operator to manage the garage

e. N/A – no parking outside the garage

f. N/A – no parking outside the garage

g. N/A – no parking outside the garage

h. 1 FTE attendant to manage garage, with primary responsibility to collect fees and be a customer service rep for the building

i. N/A

Have a good weekend,

Christian
