1. Census block boundaries do not follow small area plan boundary. This table was prepared from Census 2010 block statistics by assigning all of each census block to a single small area plan area based on the location of the block centroid. In cases of overlap, adjacent small areas will have complementary errors in population and housing estimates. Overlap areas are listed below. These areas may or may not include residential units. Overlaps result when small area plan boundaries fall midway between streets, keeping both sides of the street for streets such as King Street and Washington Street within a single planning area.

Braddock Road Metro Small Area Plan: Includes King Street frontage in Old Town Small Area Plan and King Street Metro/Eisenhower Small Area Plans and some Washington Street frontage in Old Town North and Old Town Small Area Plans. Columbus Street frontage from Oronoco Street to Wythe Street is included in statistics for the Old Town North Small Area Plan.

Fairlington/Bradlee Small Area Plan: Includes Woodbine Street and Crest Street frontages in Northridge/Rosemont Small Area Plan.

King Street Metro/Eisenhower Avenue Small Area Plan: Braddock Road Metro Small Area Plan includes King Street frontage.

Northridge/Rosemont Small Area Plan: Crest Street and Woodbine Street frontages included in Fairlington/Bradlee Small Area Plan

Old Town Small Area Plan: King Street frontage included in Braddock Road Metro Small Area Plan. Some Washington Street frontage included in Braddock Road Metro Small Area Plan.

Old Town North Small Area Plan: Washington Street frontage from Wythe Street to Montgomery Street is included in the Braddock Road Metro Small Area Plan statistics. Columbus Street frontage in the Braddock Road Metro Small Area Plan from Wythe Street to Oronoco Street is included in the statistics for the Old Town North Small Area Plan.
