Subject: Oronoco Outfall Remediation Project Notification

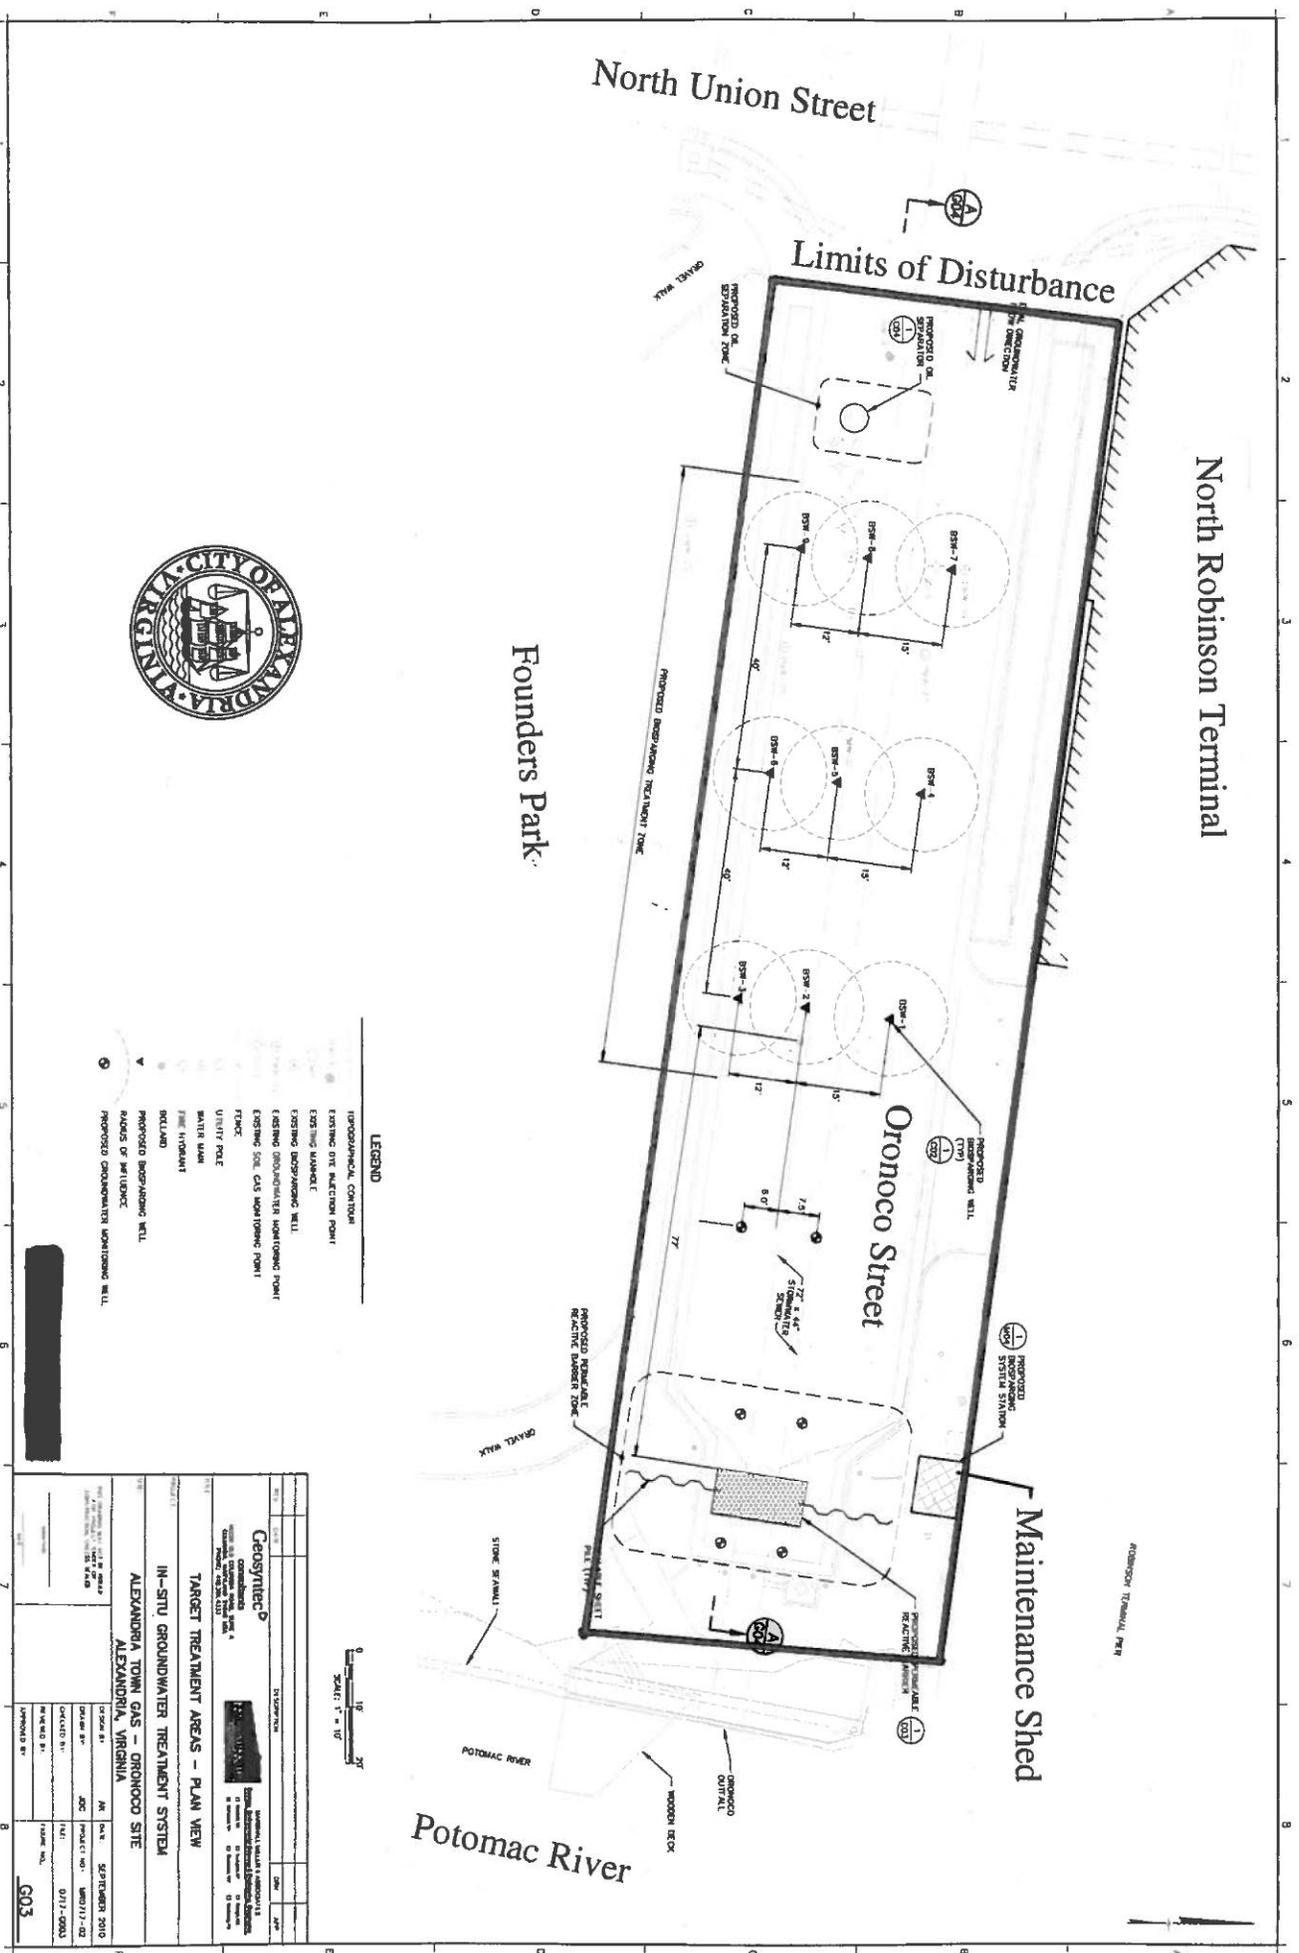

President Shubert and members of the association,

As you may be aware, the City has been actively managing environmental impacts associated with the former City owned manufactured gas plant that is the ongoing source of oily substances evident beneath the observation deck at the end of Oronoco Street. As a part of the Corrective Action Plan (CAP) undertaken by the City, a below ground remediation system to prevent discharge of the oily substances into the Potomac River has been designed and put out to bid. The City is currently in the process of awarding the project and it is estimated that construction will start in November or December of this year.

The project has been designed and construction has been scheduled to have the least possible impact on Founders Park. The most direct impact will be the need to close the sidewalk adjacent to Oronoco Street on the northern end of the park for the duration of the project. I have attached a figure of the project area for reference.

If there are any questions on the project or if the association would like to meet with city staff in person, you can contact me directly via this email address or at the telephone number below.
