TO: Alexandria Park and Recreation Commission  
FROM: ACPS Operations and City of Alexandria Planning & Zoning (P&Z)  
RE: Long Range Educational Facilities Plan Phase II

The Long Range Educational Facilities Plan (LREFP) Work Group recently made final recommendations to address high school and pre-K capacity through its completion of the second phase of the LREFP. The LREFP reviews current capacity, projected growth and the effectiveness of current facilities in meeting the need throughout ACPS. The first phase of the LREFP, which determined needs and potential solutions for the elementary and middle school levels, was finalized in the summer of 2015 and adopted and endorsed by the School Board and City Council, respectively. ACPS and the City of Alexandria intend to go through a similar process with the School Board and City Council this spring to adopt the second phase of the LREFP. The second phase was a much smaller scope and did not specifically look at Park and Recreation uses or space; however, we would like to keep you informed of our progress to date. Specific site recommendations were not made by the work group. Common themes of the work group’s recommendations included increased analysis of existing space, definition of academic program and future increased space for pre-K and high school capacity.

Additional information, presentations to the work group, drafts and the proposed final draft of the work group’s recommendations can be found online here:
