Fort Ward Park and Museum Area Management Plan

Why a Management Plan?

- 'a Management Plan is a document of policies and provides guidance to park management' (Jim Spengler, City of Alexandria)

What Will the Management Plan Accomplish?

- Identify sustainable practice strategies for the use, protection and monitoring of changes at the site over time
- Seek to balance the management of natural, cultural and recreational resources, including the earthwork fort, archaeological resources, interments, "The Fort" community and park features
- Identify potential enhancement opportunities, interpretation of site's African American history – 'We're Still Here' trail, the recognition and demarcation of graves/cemeteries, upgrades to park facilities and recreation infrastructure, public accessibility and plantings, etc.

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Big Picture – ultimate outcome – take what you all have compiled and add materials to create an integrated management plan for the park

---

---

Fort Ward Park and Museum Area Management Plan

Work Completed to Date

- Ad Hoc Fort Ward Park and Museum Area Stakeholder Advisory Group (FWAG), working with City staff, has developed initial ideas for how to best manage the significant historic, natural and recreational resources of Fort Ward Park
  - FWAG's Report, Recommendations for the Management of Fort Ward Historical Park, January 2011 and updated chapters
  - FWAG's Monthly Meetings and Minutes
- Consultant led informal 'Brainstorming Sessions' for two half days in the park in June 2013
- Online Survey on City's webpage in June 2013

Ongoing Study

- Stormwater Study

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

### Study Milestones - Where We are Today

Meeting	Date	Topic	Discussion Points
FWAG #3	8/14/13	Resource Management and Stormwater	<ul style="list-style-type: none"> <li>Best practices: techniques to consider to address issues to balance management of natural, cultural and recreational resources; define actions needed to mitigate adverse affects</li> </ul>
FWAG #4	9/11/13	Interpretive Framework	<ul style="list-style-type: none"> <li>Audience</li> <li>Interpretive goals, themes, topics and stories</li> <li>How to link the story to the region and other Alexandria sites</li> <li>How to expand the museum, coordinate interpretation</li> <li>How to tell "The Fort" Community story and post-Civil War stories</li> </ul>
FWAG #5	10/9/13	Enhancement Opportunities/Interpretive Facilities	<ul style="list-style-type: none"> <li>Idea of the commemorative walk -- how used thematically and to provide additional recreational resource</li> <li>How to mark gravesites and "The Fort" Community</li> <li>How to integrate with resource management</li> <li>Additional park programming and events</li> </ul>
FWAG #6	11/13/13	Facility Enhancement Opportunities	<ul style="list-style-type: none"> <li>Parking and arrival; orientation; ring road; secondary circulation; amphitheater; picnic areas; special areas; edges</li> </ul>
FWAG #7	1/8/14	Management Plan Draft Review and Implementation	<ul style="list-style-type: none"> <li>Review of Draft Document</li> <li>Additional discussion on programming, management and implementation</li> </ul>
#8	TBD	Informal Public Meeting	
#9	TBD	Combined Commission Meeting	
#10	TBD	City Council Work Session	

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Tonight focus on one piece of the puzzle or thread for our ultimate weaving of a management plan. Upcoming meetings will focus on other threads and are open to the public. Followed by discussion in January 2014 on compiled Draft – with weft and warp all woven together, then take to public in an informal meeting and to appropriate City Commissions and to City Council work session. Many opportunities over the fall for you to weigh in and provide comments and concerns.

### Fort Ward Park and Museum Area Management Plan

#### Tonight's Discussion Topics

- Existing Conditions Report, focused on Natural, Cultural and Recreational Resources
  - Status of synthesizing sources, findings yet to come
  - Please read and provide us edits, comments, etc.
- Issues Matrix - Is our listing complete?
  - Conflict and/or coordination required between issues
  - Issues requiring additional funding
- Potential Best Practices as applied to Fort Ward
  - Landscape Maintenance Practices, Turf and Meadow, Soil Erosion, Ground Disturbance, Vegetation – damage, invasive, tool for visibility

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Tonight – focus on Natural, Cultural and Recreation Resources. Won't go through the Existing Conditions report, but please provide us comments and concerns – set date of upcoming meeting – Sept 11.

Report contains a compilation and aggregation of issues drawn from our work and your report. Important to let us know if we have missed issues or misunderstood ones listed. Again, not intending to walk through each one this evening. Instead, we want to spend the short time together this evening to show you how we have recognized that some issues can be addressed, some conflict with each other, some require additional funds and some require additional coordination and share with you some examples of best practices that we think are a good fit with selected park issues that we have identified. Intend to go through them rapidly, and then open up the meeting for a robust discussion – are we on the right track? Remember, many layers to come in the next three meetings, and then we come back to you with an integrated management plan. So tonight is the launch, not the completion.

### Natural Resources - Best Practices Discussion

#### Examples of Natural Resource Management Issues

- Natural Resources
  - Preserve and Enhance Park's Natural Character
  - Define Landscape Maintenance/Cultural Practices\*
  - Declining Tree Plantings
  - Declining or Absent Ornamental Plantings
  - Declining Turf and Meadow Management\*
  - Invasive Species
  - Soil Erosion\*
- Stormwater
  - To come per URS Report

\* Best practice examples proposed for these subheadings in this presentation

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

Drawn from our issues matrix in the back of the Existing Conditions Report – three areas under the category of Natural resources to discuss this evening.

---

---

---

---

**Landscape Maintenance and Cultural Practices**

Issues

- Overgrown shrubs and vines
- Leaf litter
- Tree stumps and limb decline

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Concern regarding cultural practices –  
invasive growth, tree stump removal,  
tree care, disposal and disposition of leaf litter

---

---

---

---

---

**Landscape Maintenance and Cultural Practices**

Best Practices  
Example

- Define areas for leaf litter placement, away from turf areas and sheltered from wind blow

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Example of placing leaf litter under trees,  
in area bounded by walk and fallen tree –  
clear boundaries for application and looks intentional

---

---

**Declining Turf and Meadow Management**

Issues

- Turf managed by two entities
- Meadow intention unclear

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Survey results from June session had mixed results –  
some responders thought the park was gorgeous and  
well maintained, others worried and didn't understand  
the meadow program

---

---

---

**Declining Turf and Meadow Management**

Best Practices Examples

- Establish consistent mow cycle in conjunction with two entities
- Clearly mark intentional meadow edge

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

Potential ways to manage intentional meadow; mowed paths can also be used for dog walking as is done in New River Gorge in West Virginia

---

---

---

**Soil Erosion and Compaction**

Issues

- Heavy use by recreational users
- Equipment and vehicles on turf
- Lack of paths or trails – ‘goat herd’ or make your own

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Soil Erosion and Compaction caused by heavy use, stormwater, or lack of paths

---

---

---

---

---

**Soil Erosion and Compaction**

Best Practices Example

- Combine pads into singular, soft surface in heavily used areas

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

Perhaps look to ‘soft’ surfaces for larger areas – expand on the concrete pad concept in areas of heavy use; Tonight’s look is at the intersection of the natural or cultural resource with recreational resources - will look in more detail at recreational facilities themselves in the meeting in November – dog park, playground, amphitheater, picnic facilities, etc.

---

---

---

### Many Layers of History - Ground Disturbance

**Best Practice Example**

- Stabilize resource at ground level

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

### Many Layers of History - Ground Disturbance

**Best Practice Example**

- Develop a plan
  - Know where to dig - intent is to note areas where ground disturbance will not impact archaeological resources
  - Consider archaeological resources during the planning stages in areas not cleared for ground disturbance
  - Consult with Alexandria Archaeology as most archaeological resources are unseen

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

### Soil Erosion/Vegetation Damage to Rifle Trench

**Issues**

- Exposed ground surface
- Lack of groundcover vegetation
- Tree and invasive plant growth on rifle trench and parapet
- Informal use of parapet as trail system

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

### Soil Erosion/Vegetation Damage to Rifle Trench

**Best Practice Examples**

- Repair the eroded condition of the earthwork
- Establish a new trail for visitors to replace the rifle trench parapet
- Integrate the trail with other planned trail improvements (i.e. nature trail)

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

19

---

---

---

---

---

---

---

---

### Soil Erosion/Vegetation Damage to Rifle Trench

**Best Practice Examples**

- Establish a sustainable land cover to protect against further erosion (grass or other plant material, leaf litter)
- Encourage visitor stewardship of the irreplaceable resource through signage and interpretation

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

20

---

---

---

---

---

---

---

---

### Erosion and Vegetation Damage to Earthworks

**Issues**

- Need to limit foot traffic and access
- Invasive plants
- Eroded spots
- Tree growth

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

21

---

---

---

---

---

---

---

---

**Erosion and Vegetation Damage to Earthworks**

**Best Practices Examples**

- Control or eradicate invasive species growing on the earthworks
- Address the care and needs of trees and other plants to remain

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

**Erosion and Vegetation Damage to Earthworks**

**Best Practices Examples**

- Establish management practices to support the growth of healthy grass stands while promoting visual accessibility for interpretation
- Consider using a taller, native warm-season grass for the fort parapet to reduce mowing and discourage visitors from climbing on the earthwork

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

**Erosion and Vegetation Damage to Earthworks**

**Best Practices Example**

- Establish a sustainable land cover to protect against erosion (such as use of leaf litter)
- Establish management practices to support woodland needs, limit the potential for damage to the earthworks from tree fall and other problems

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

**Making Sites Visible: "The Fort" Community**

Issues

- Preserve remnant landscape features such as line of cedars along School House Road
- Need to mark 'invisible' features for visitor

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

**Making Sites Visible: "The Fort" Community**

Best Practices Examples

- Identify the locations of "The Fort" community buildings and landscape features
- Establish protection strategies for maintaining above- and below-ground evidence of "The Fort" community
- Consider trail and interpretive options (subject of upcoming meetings)

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

**Making Sites Visible: "The Fort" Community**

Best Practice Example

- Design marking strategies to accompany interpretive program

Resource Management Discussion:  
Fort Ward Park and Museum Area Management Plan

---

---

---

---

---

---

---

---

# Next Steps

- Meeting on Interpretive Framework – 9/11/13
- Meeting on Interpretive Enhancement Opportunities – 10/9/13
- Meeting on Facility Enhancement Opportunities – 11/13/13
- Draft Review of Management Plan – 1/8/14

# Study Milestones - Where We are Today
