1

**Modular Play Structure**

3

**Bouncing Equipment  
3-seat See-Saw with center platform**

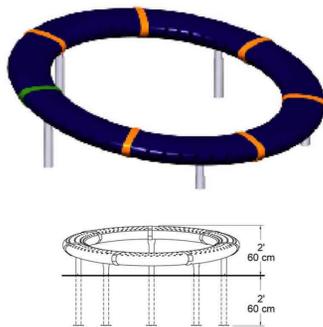

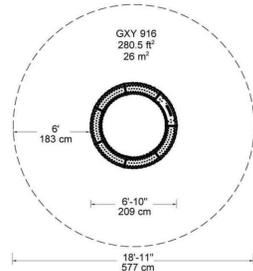

**TECHNICAL INFORMATION**

**Supernova • GXY 916**

**Best user age:** 5-12 years  
**Installation:** 2-3 hours / 4 installers  
**Mechanical installation:** 1-2 hours / 4 installers  
**The upper section of this product is pre-assembled and relatively heavy (approx. 275 lbs/125 kg). It takes 4 persons to lift it out of the packing and place it.**  
**Free height of fall:** See drawing  
**Space required:** See drawing  
**Footings:** In-ground steel footing with base plate, prepared for anchoring by means of concrete. Also available for surface installation, by means of expansion bolts.  
**KOMPAN recommends that Supernova be installed on a surfacing made of particulate material such as sand, gravel or wood chips with a minimum thickness of 8"/200 mm.**

**Supernova • GXY 916**

Use your strength and hold your balance! This seems to be the best way to describe the kind of play that takes place on the Supernova. A single child can engage in exploring its possibilities, but together with a whole group of children, this play item expresses its real potential. The large, slanting ring is set in motion by the children. Turning, spinning, balancing or just enjoying the ride are among the countless play options of the Supernova.

Equipment must be installed over resilient surfacing appropriate to the safety guidelines in your area.  
 Product development is an ongoing process. For this reason we reserve the right to make modifications in the form of product improvements in all our products.

\* Free height of fall information on free height of fall as well as space required is according to ASTM 1487.
