RE: Informational Request Related to Proposed Dominion Virginia Power 230 kV Infrastructure between the Dominion Virginia Power Four Mile Run Substation in Arlington and the PEPCO Switching Station at the NRG Facility in Alexandria

Dear Mr. Boston,

As City Manager, who serves as the chief executive officer of the City of Alexandria, Virginia, I am writing to request your assistance in obtaining information required for the City to review the above-mentioned proposed project by Dominion Virginia Power (DVP), a member of PJM Interconnection.

The City has articulated to Dominion that they need to provide a detailed explanation as to the need for this project. To date, the City and community have been told the project is to resolve reliability issues in our area. The City requests that PJM share with the City any reports prepared by Dominion and/or PJM on this stated need. Our staff has reviewed the summary, PowerPoint level information posted about this project on PJM's website and wishes to review the detailed, technical information that provided the basis for PJM's decision to support Dominion's request.

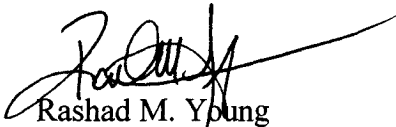

The Alexandria City Council recently established a working group to examine the effects of Dominion's proposal. The first meeting of this work group is anticipated to be held in early September. I invite PJM Interconnection to make a presentation to this working group on the need for this proposed project.

Mr. Terry Boston

Thank you for your consideration of the City's request and invitation.

If you have questions or comments, do not hesitate to contact me or William Skrabak, Deputy Director, Infrastructure & Environmental Quality, Department of Transportation and Environmental Services (T&ES) at (703) 746-4065.

Sincerely,

Rashad M. Young
City Manager
