

The City of Alexandria invites you to attend a free workshop on June 4th, 2011:

GREEN + HISTORIC BUILDINGS = THE BEST OF BOTH!

Learn how historic buildings are inherently environmentally friendly and identify ways to make these properties even more energy efficient without compromising historic integrity.

Hear from the National Trust for Historic Preservation about how the green building movement impacts historic preservation.

See case studies of Alexandria's green preservation projects.

Get how-to information for some of the most common, and easily undertaken, home improvement projects for historic buildings that can increase energy efficiency, save money and increase comfort.

Participants are encouraged to RSVP by email to Stephanie.Sample@alexandriava.gov.

Door prizes awarded at the event.

For more information, visit the
Green Building Resource Center:
