Re: Approval of the 2016 Transportation Long Range Plan

Dear Mayor Silberberg and Members of City Council:

At its September 21, 2016 meeting, the Transportation Commission held a public hearing and voted unanimously to approve the 2016 Transportation Long Range Plan (LRP). This action was the culmination of a review that began in April, 2016, which included discussion of the Plan's scoring process and review of new and existing candidate projects and studies.

The LRP includes a list of prioritized transportation projects that are not currently programmed in the City's Capital Improvement Plan (CIP), as well as a list of needed studies. Each year, the Commission updates the LRP with transportation projects and studies from plans adopted since the last update. Projects and studies that have received funding in the City's CIP or are no longer relevant are removed. This year, the Commission directed staff to separate projects that are contingent on development from other LRP projects that are ranked by priority.

The Commission appreciates the opportunity to prioritize the City's unfunded projects and looks forward to the pursuit of funding opportunities as they arise.

Sincerely,

J.J. King III
Chair, Alexandria Transportation Commission
