**PROJECT DESCRIPTION**

The project consists of the installation of pedestrian and ADA improvements at various transit stops in the City of Alexandria, Virginia. The improvements include the installation of curbs, sidewalks, and other accessible features to enhance pedestrian safety and accessibility. The project is designed to meet the requirements of the American Disabilities Act (ADA) and other relevant standards.

**DESIGN AND CONSTRUCTION**

The design and construction are carried out by a qualified and experienced contractor. The project is supervised by a registered professional engineer. The construction details are provided in the sheet titles listed above.

**DOCUMENTATION**

The project documentation includes detailed plans, specifications, and construction drawings. These are provided in the sheet titles listed above. The project is reviewed and approved by the City of Alexandria, Department of Transportation.

**SCHEDULE**

The project schedule is as follows:

- **Preparation and Design Phase**
- **Construction Phase**
- **Completion Phase**

The project is expected to be completed by the end of the current fiscal year.

**CONTACT INFORMATION**

For more information, contact the City of Alexandria, Department of Transportation at (703) 746-4900.
