September 6, 2011

Dear Sir/Madam:

The City of Alexandria Department of Transportation and Environmental Services (T&ES) has scheduled roadway maintenance on King Street between Hampton Drive and the on-ramps at I-395.

Resurfacing activities are scheduled to begin overnight on **Sunday, September 18, 2011**. The City will work to minimize impacts and disruption to the residents and businesses within the construction project area.

The milling and paving activities for this project will occur overnight during the hours of 8 p.m. to 6 a.m. Sunday through Thursday and the project is expected to last one week, weather permitting. To facilitate traffic control, we will have message boards, signs, flaggers and barricades on the job site. Some traffic delays should be expected and the roadway will be restriped as soon as possible after the resurfacing is complete.

This maintenance project has been coordinated with the planned King/Beauregard Intersection Capital Improvement Project scheduled to begin in spring 2013. However, in order to conserve limited funds, curb-to-curb resurfacing of King Street will only occur outside the limits of the planned CIP project (west of North Hampton Drive). The City has scheduled major asphalt patching within the limits of the future CIP project. For more information about the planned CIP project, visit <http://alexandriava.gov/KingBeauregard>

Please share the information about the King Street Paving Project with your neighbors and organization. If you have any questions, please contact me at (703) 746-4488, or roy.worrell@alexandriava.gov.

Sincerely,

Roy Worrell
Division Chief, Operations Division
