

The Alexandria Transit Vision Plan will identify existing and future bus transit needs and community priorities in the City of Alexandria as a basis for *designing a future bus network* that improves mobility, accessibility, and overall cost efficiency.

Overview

- Opportunity to fundamentally re-imagine the city's bus network
- Consistent with City of Alexandria's Transportation Master Plan objectives
- Close partnership between DASH and City of Alexandria

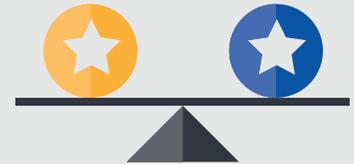

Key Project Elements

Engaging the community

Identification of the **mobility needs** of Alexandria's diverse community

Considering tradeoffs

Use of community priorities and technical information to **re-imagine the city's bus network**

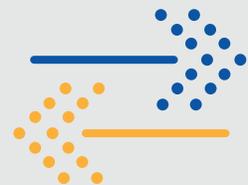

Analyzing the current system

Detailed look at how the **existing system is running**

Understanding travel patterns

Analysis of current and forecast **development and travel patterns** within the City

Embracing changing transportation trends

Consideration of how the **changing nature of travel** impacts the bus network

Process

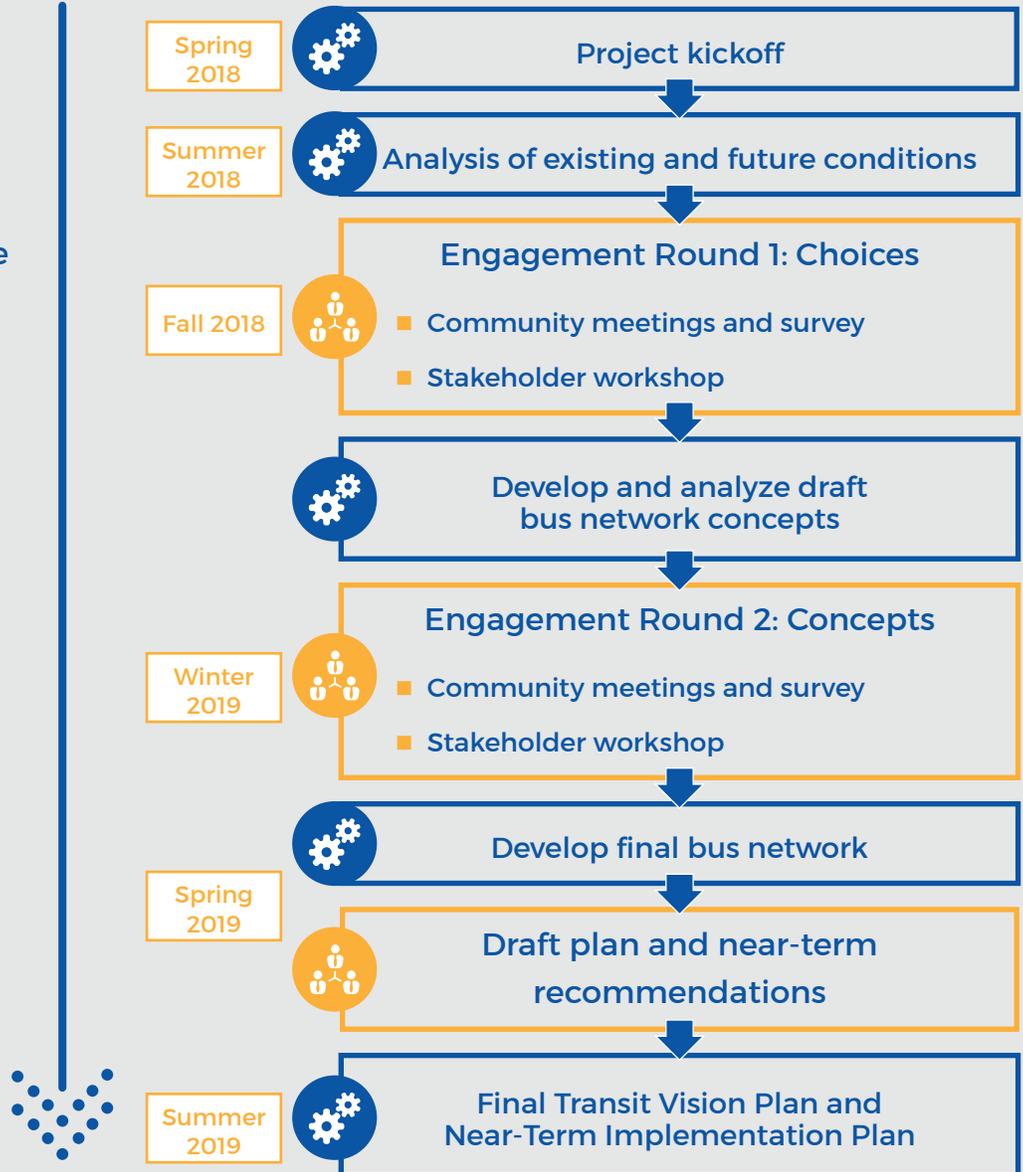

The Alexandria Transit Vision Plan began in Spring 2018 and is anticipated to be **complete by Summer 2019**. The implementation of any recommended changes would likely begin in late 2019 or early 2020.

Throughout the plan there will be:

- Updates to the project website
- Civic engagement opportunities
- Coordination meetings with other jurisdictions and transit providers
- Briefings to City leadership
