In Alexandria, snow and ice storms produce an average accumulation of 15 inches each year, and our Snow Operations Team clears 521 lane miles of roadway.

**The City is prepared – are you?**

## DID YOU KNOW?

- **In Alexandria, storm levels are based on type and severity of storm.** Level 1 (least severe) to Level 3 (most severe). Levels are posted on the City's website.
- **Roads are plowed by priority.** First, the snow emergency routes, followed by secondary routes then residential streets.
- **Clearing sidewalks, driveways, and entrances are the responsibility of the adjacent property owner, occupant, community association, or business.** Time limits are determined by the level: **Level 1 = 24 hours, Level 2 = 48 hours, Level 3 = 72 hours.**
- **You can help!** Clear ice, snow, and leaves from around fire hydrants and storm drains, and avoid shoveling snow into the street.

## WHAT TO DO?

- Stay off the roads in the event of snow or ice
- Don't park on snow emergency routes
- Keep shovels, salt or sand handy
